The boulder has been broken by a bulldozer and the beginning of the inscription is missing. After the first l there is a slightly wavy line which might be a f, then a l and then a possible t with rather long lines. There are then other lines on the rock but it is difficult to distinguish any letters. KRS 2604 is on another part of the boulder which was broken off by the bulldozers.

Provenance:
Unspecified site, Al-Mafraq, Jordan

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023237.html
KRS 2604

\[ {\text{By M'y' r son of 's¹ son of N'}}^{\text{grant}} {\text{relief from adversity and uncertainty and security and w ḥt'}}^\text{r} \]

Commentary:
The rock is broken after the second ' and before the prayer. There are probably two letters after the third l and before the ' and there might be a letter between the ' and the r although it is not certain. The rock is chipped at the end but a r and w can be read with certainty and then a possible s¹ and another r. KRS 2603 is on another part of the rock which has been broken away.

Provenance:
Unspecified site, Al-Mafraq, Jordan

KRS 2667

l hnʾl bn ṣḥ (b)(n) (g)(b)r
By {Hnʾ{l}} {son of} Ṣb {son of} {Ghr}

**Commentary:**
The second, third, and fourth letters have been joined to each other. The fourth letter looks rather like a h but this is probably partly because of the extension of the lines for joining. The second n is joined to the preceding b by being attached to one arm and the letters of the second bn have been joined to form a circle. The next letter might be a g or it might be another b and n joined together to form a circle. The last two letters are inscribed in thinner lines. The first one is damaged by an abrasion but it might be a h since part of a fork seems to be visible.

**Provenance:**
Unspecified site, Al-Mafraq, Jordan

**References:**
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

KRS 2729

---- ’m----

---- ’m----

Commentary:
The rest of the letters are faint and illegible.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here
KRS 2730

\( i_n s^l \) bn gyz bn s^lḥb bn ‘l] w rdw ’yr l- ḫh -h w ’wr m ‘{w}r

By Ns^l son of Gyz son of S^lḥb son of ‘l] and Rdw [grant] vengeance for his brother and blind whoever {scratches out} [the inscription]

**Commentary:**
The sequence gyz bn s^lḥb bn ‘r occurs in KRS 519 and possibly in KRS 521 although in the latter text the r is doubtful. It is possible a r should be read here in the fourth name instead of a l as the lines are faint and something might be missing. The penultimate letter appears to be unfinished as the circle is not enclosed on one side of the crossbar.

**Provenance:**
Unspecified site, Al-Mafraq, Jordan

**References:**
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

KRS 2760
l ḏkr ---- bn yz{ʿ}{n}----(m)----

By ḏkr ---- bnyz{ʿ} {n}----(m)----

Commentary:
The photograph is inadequate to be certain of the reading. There appear to be one or more letters after the r. The next four letters are clear although it is difficult to know how they should be divided up as the first word could be bn or bny. The remaining letters are very doubtful.
**Provenance:**

KRS 2763

l ---- ‘n{ʿ}
By ---- ‘n{ʿ}

Commentary:
The beginning of the text has been hammered over. The letter after the l is illegible and then there is possibly a r, m, and a g, or a b and n joined together, giving the appearance of a g. The ‘ is quite clear and then there appears to be a n written under the fourth letter of KRS 2764. There is then a ‘ although the lines of the letter have been hammered over in a similar way to some of the lines of KRS 2764.

Provenance:
Unspecified site, Al-Mafraq, Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

KRS 2764

l ḏdb bn s¹wd bn ḥrt w ḥwb
By Ḫd son of S¹wd son of Ḥrt and he wept with grief

Commentary:
Some of the lines of the first two names have been re-traced with hammered lines and the inside of the first w has been scratched over. The first name is difficult to explain although the shape of the ḫ is quite clear. The author has used two different forms of ḥ one with the lines tapering to a point and the other with a straight back and three horizontal lines.

Provenance:
Unspecified site, Al-Mafraq, Jordan

References:

KRS 2810

l --- bbw(h)

By --- bbw(h)

Commentary:
The letters after the initial l are not legible on the photograph. It is difficult to make sense of the letters that can be read.

Provenance:
Unspecified site, Al-Mafraq, Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023444.html

KRS 2811

l (ṣ)m bn nʿmy bn wqr w ṭẓr s²nʾ f h ḷt s²lm

By (ṣrm) son of Nʿmy son of Wqr and he was lying in wait for enemies and so O Lt [grant] security

Commentary:
The loop of the ṣ is slightly doubtful. There are traces of further possible letters near the inscription.

Provenance:
Unspecified site, Al-Mafraq, Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023445.html

KRS 2812

h {y}{t} s¹d 'mr bn s²bn w flt b- s'\(\text{n}\)(b)

O {Y'} help 'mr son of S²bn and deliver b {s'\(\text{n}\)b}

Commentary:
The inscription is written on three faces of a small boulder. The letters of the deity's name and parts of the last letter are very faint.

Provenance:
Unspecified site, Al-Mafraq, Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023446.html

KRS 2813

l 'bdg' {b}n ġnṭ d- 'l šḥd w h lt s²{l}\(\text{m}\)

By 'bdg' {son of} ġnṭ of the lineage of šḥd and O Lt {may he be secure}

Commentary:
The initial l is a long line that continues through the second line of the inscription. The b is not a complete curve; there is a long scratch attached obliquely to the penultimate letter; and final letter is rather small and has an usual stance. For the name 'bdg' compare the names 'bdg' and 'bdlg in the Hismaic texts TII 156 and KJC 205, 647 respectively.

Provenance:
Unspecified site, Al-Mafraq, Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023447.html

KRS 2814

l mbl bn ź<<>>rr bn {y}---- bn brqn bn mny bn 'n w wgm wny w r'y

By Mbl son of {Zrr} son of {Y}---- son of Brqn son of Mny son of 'n and he grieved being feeble and he pastured

Commentary:
There is a short line after the first letter of the second name but it seems likely that it is extraneous. The third name has been damaged by the recent Arabic inscription.
Provenance:
Unspecified site, Al-Mafraq, Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

KRS 2851

I g(d)d bn ----m-----m bn 'bd w r'y h- nhl b- tlq b- (k)s¹ʾ dkr

By (Gdd) son of ----m-----m son of ’bd and he pastured the valley while snow fell in (the cosmical setting [or] full moon) of Aquarius

Commentary:
Parts of the third letter are rather doubtful in the photograph. The lines of the sixth letter from the end are rather doubtful and there is an additional line which if part of the letter would suggest it should be read as a rather carelessly inscribed m. There is probably space for three names between the first and last names but most of the letters are damaged and illegible.

KRS 2927

-----I'yhdr(t)ynn s¹nt 'd rdf {f} {r}²[y] ----

-----I'yhdr(t)ynn the year 'd rdf (and so) {he pastured}

Commentary:
There are traces of letters before the l which are illegible and it is very difficult to know how to interpret the following letters which are fairly clear. The crossbar of the first t might be an incidental scratch. The second f is partly covered by an abrasion and would be a different shape to the first f in the text. All the last three letters are partly damaged but it seems the restoration suggested here is likely.

Provenance:
Unspecified site, Al-Mafraq, Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

KRS 3029

{l} s¹ʿd bn ’nʿm bn hmlk bn n(h)(d) w tzn ḏ mny f h rdw fṣy m- bʾs¹ s¹ʿd h- ḏfy

(By) S¹ʿd son of ’nʿm son of Hmlk son of {Nh}ḍ and he awaited Fate and so O ḏfw [send] deliverance from despair [and] help the Đrite

Apparatus Criticus:
MNH p. 345 n. 269: on the occurrence of ḏfw with h- ḏfy.

Commentary:
The initial l is on the edge of the rock and is slightly doubtful and the second and third letter of the fourth name are worn and uncertain. The name nḥḍ is read on the basis of ’nʿm bn hmlk bn nḥḍ in WH 845 and hmlk bn nḥḍ in KRS 218. It seems likely the author left out a w before s¹ʿd. For the interpretation of ḏ in of ḏzn ḏ mny see Al-Jallad 2015: 84–85, though the translations here differs from the one there.

Provenance:
Unspecified site, Al-Mafraq, Jordan

_l s¹qn bn wtr d- l 'mr t 'ĝ)b (h) s¹lm w 'g'n -h 'n bn 'ns¹ {')s²n'

By S¹qn son of Wtr of the lineage of ‘mr t 'lt {ĝ)b (h)s¹ lm w’ g'n - h 'n bn 'ns¹ {')s²n'

**Commentary:**
The ĝ is a line with a slight zig-zag at one end and is a rather unusual shape. The letter read as the first h is written below the preceding b and following s¹ and was probably left out and then added later. It is possible it should be read as a s¹ as it does not have a very long stem although the abrasion might cover part of it. It is possible the fourth letter from the end is a h as one of the “forks” does not seem to be attached to the rest of the letter and is inscribed in a different technique.

**Provenance:**
Unspecified site, Al-Mafraq, Jordan

l s²ʿ{{ʾ}}l bn {{ḥ}}{{b}}n yqn{{ʾ}}l bn w{{ḥ}}fy bn {b}grt w

By S²ʿʾl son of Ḥbn son of Yqnʾl son of Whfy son of {B}grt w

Commentary:
The forks of the "s have been closed to give the letters the appearance of t's. The arms of the second b have been closed with a line and the arms of the third b have been joined to the following n. The arms of both the ḥ's have been closed to form a w. The first letter of the last name looks more like a r but the name would be difficult to explain if it was read as a r, and the g has a line going halfway across the circle. The inscription probably continues after the w at the end but the letters have been scratched over and nothing is legible in the photograph.

Provenance:
Unspecified site, Al-Mafraq, Jordan

**KRS 3117**

l bgt bn bnḥrm bn ḋmt w (q)r f wrd m{l}ḥ

By Bgt son of Bnḥrm son of ḋmt and he remained at a watering-place during Aquarius

**Commentary:**
The letter read as qr is doubtful since it looks as though the author miscalculated when carving it and drew the stem along one side of the circle rather than through the middle, making it resemble a d, though it is different from the clear d later in the text. The penultimate letter appears to have a slight prong giving it the appearance of a h. For qr cf. Arabic qarra "to remain (in /f] a place)" (Lane p. 2499a). It is followed by the preposition f "in, at". On the translation of m{l}ḥ, see Al-Jallad 2014: 218–220, and Al-Jallad forthcoming.

KRS 3137

lʾqr bn {n}y {bn} ʾmʾt {w} lwḥ lmnn

By ʾqr son of {N}y son of ṭʾmʾt {w} lwḥ lmnn

Commentary:
There are ligatures joining several of the letters some of which carelessly written and obscured by hammering. There is line joining the initial l to the following letter which has been read as an ṛ. It is possible
the third letter should be read as a d. There is some hammering above the second n. It seems likely that the second b has been joined to the preceding letters by a line going through the middle and the following n joined to the arms of the letter giving it the appearance of a w. The name ‘m’t however is not previously attested. The next two letters might be a b and n joined together giving it the appearance of a w or maybe as above it should be read as a w and lwḏ read as a verb. The translation of lmn at the end is problematic and even though it runs directly on from the ḏ perhaps it should be read as a separate text l mn “By Mn”.

KRS 3182

l s¹mn{{ʾ}} bn {bʾl} bn ----

By Sʾmnʾ son of {Bʾl} son of ----

**Commentary:**
A line has been added to the fork of the ʾ forming a ʿ and the n has been joined to the arms of the first b. The following letter has a tail and it is possible it should be read as a s¹. Equally it might be an attempt to join it to the preceding n or it might be an incidental chip. One arm of the letter is extended to join it to the following ʾ and then the ʾ is joined to the l by two ligatures. The end of the inscription is in shadow and cannot be read with certainty. There might be a h, some other letters, and then possibly a b.

**Provenance:**
Unspecified site, Al-Mafraq, Jordan
Corpus of Safaitic inscriptions

KRS 3187

\( l\) ----n b(n) dn h-ʾr

By ----n son of Dn is the hinny

Commentary:
The attempt at joining the letters and the infilling make the interpretation of the inscription extremely difficult. The first letter might be a r and the second letter might be an ʾ, t, or ṣ, depending on whether or not the joining of the fork is part of the letter. The next letter might be a g or a m, and then there appears to be a n joined to the adjacent letters by a line across one end. Then there is a b, and then probably a n which has been more or less obscured by hammering which has been extended to join the back of the following letter. For the interpretation of h-ʾr see Macdonald, M.C.A. (in press, a)

Provenance:
Unspecified site, Al-Mafraq, Jordan

References:

KRS 3227

l qrs²m bn s¹dʾl bn [[ʾ]]byn bn ṭṇṭ bn ḥr w ḥ nqmt m- mkbl

By Qrs²m son of S¹dʾl son of ṭbyn son of ḥr and ḥnqmt [grant] vengeance from Mkbl

Commentary:
The author wrote a b at the beginning of the third name and then corrected the mistake by writing an ṭ over it. After the connective it seems most likely that the ḥ should be read as a vocative particle and that, to complete the invocation, it is necessary to assume that a deity’s name was left out.

Provenance:
Unspecified site, Al-Mafraq, Jordan

References:

l ġṭ bn ġdn bn hš¹ bn ḥrs¹ bn ġṭ bn ŷl y h-'n

By ġṭ son of ġdn son of Hš¹ son of ḥrs¹ son of ġṭ son of Ŷly is the ass

Commentary:
There is a drawing of an equid and rider. The rock is chipped obscuring the head of the animal. The drawing does not look very much like an ass, but cf. Arabic ʿānah “a she-ass” (Lane 2204a), which in Safaitic may have had a masculine form *ʿān.

Provenance:
Unspecified site, Al-Mafraq, Jordan

l ḥwr bn gdy bn kmrd h- dr s‘nt gs²m w ‘wr m (‘)(w)r

‘ḥwr son of Gdy son of Kmd was here [in] the year of Gs²m and blind whoever {scratches out} [the inscription]

Commentary:
There are hammer marks over the first part of the name. The third and second letters from the end are faint. For s‘nt gs²m cf WH 1276 and the commentary to WH 3792a.

Provenance:
Unspecified site, Al-Mafraq, Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023876.html

KRS 3239

l ʾnsr bn s‘d bn ‘mrt h- ‘nffjs l h- nql

To ʾNsʳ son of s‘d son of ‘mrt belong the {monuments} at the rocky ground

Commentary:
It is possible that the letter after the second ‘ is a rectangle in which some of the lines are not joined and the horizontal lines do not appear to be as deep as the other lines and the letter should be read as a g. However it is more likely it should be read as two letters a n followed by an ill-formed f. The last four letters are inscribed in a different technique.

Provenance:
Unspecified site, Al-Mafraq, Jordan

References:

*l --- bn 'bd h- 'r w wth ]{/]l[- 'ṣ²]y²- h w ġzz b- ḥrt ]{f}[ ]{ʾ}m----- w 'wr m- 'wr*

By --- son of 'bd is the hinny and he was distraught for his companions and he was on a raid in [the] Ḥrt ]{f}[ ]{ʾ}m----- and blind whoever scratches out [the inscription]

**Commentary:**
The rock is broken in half. The first part of the name has been crossed out. The author wrote an ' after the ' of 'l and then, realising he had forgotten the l, crossed it out. The l has an extra squiggle which gives it the appearance of a s⁵ and one prong of the following ' is faint. The letters after the first m are faint.

**KRS 3281**

l ḥd bn mḥrk bn mty w ḥrš ū{n} zt h- gʾlt f h <l> t sʿlm ḡ sʿr

By ḥd son of Mḥrk son of Mty and he kept watch at ū{n}z t h- gʾlt and so O (Lt) keep safe those whoever leaves [the inscription] intact

**Commentary:**
The letter read as n in the word after ḥrš is rather long and it is possible that it should be read as a l. The cross-bar of the z is a slightly different technique to other lines of the text. The l of the deity’s name has a diagonal stroke over one end giving it the appearance of a h.

**Provenance:**
Unspecified site, Al-Mafraq, Jordan

Tell 3, unspecified region, unspecified country.
Wadi Qattaı

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024234.html

KWQ 82

l ʾs¹lm b{{n}} ---- h· šrt

By ʾs¹lm (son of) ---- is the picture

Commentary:
A line of the m has been extended to join the letter to the following b and the arms of the h are attached to the letter read as n. The line read as n is long and has a short horizontal line at one end. It is possible that the additions have been made later or the letter should be read as a z. There are then two relatively large hammered circular shapes which obscure two or more letters and there is a line hammered under them. The t at the end has arms attached to the ends of two of the crossed lines. Lane 1745a: štrah "image picture".

Provenance:
Tell 3, unspecified region, unspecified country.
Wadi Qattaı

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024235.html

KWQ 83

l qd[{|y|}] bn tm bn gbdItalic f rʾy hrt f h rdw s¹lm
By Qdy son of Tm son of Ghfl and he pastured [the] stony tract and O Rdw [grant] security

**Commentary:**
There is a short line set at an angle on the stroke of the fourth letter suggesting that perhaps the author wrote a k to begin with and then added the loop to change it into a y.

**Provenance:**
Tell 3, unspecified region, unspecified country.

\( lr(h)l \ (b)j n \ (d)r(b)\{t\} \ h-\ dr \ 'm \ f \ 'm \)

Rhl son of Drht was here year after year

**Commentary:**
It seems possible that some of the letters of have been tampered with. The prongs of the third letter appear to have been joined by a line giving it the appearance of a y and the first b has lines attached to the arms giving it the appearance of a f. The hammered dot for the loop of the first d is rather small. There is a carelessly hammered middle line attached to the second b which gives it the appearance of a ḫ and the t is partly hammered over.

LP 1

Ls²ms¹ bn mġny bn ʾnʾmn bn qḥs²

By Ls²ms¹ son of Mġny son of ʾnʾmn son of Qḥs²

Provenance:
Ruǧm al-Ḥifnah, Al-Suweidah, Syria

[Latitude/Longitude: 32.767 / 36.9814]

According to Littmann (1943: 1) this inscription was found about half an hour’s ride [that is approximately 2.2 km, see below] west of Al-Ḥifnah. The distance is based on the measures of distance and time for travel on horseback in the ḥarah given by Wetzstein (1860: map) which are the same as those given by Butler, viz "an average of two and three-quarter miles [= 4.4 km] per hour for ordinary going..." (Butler, Norris & Stoever 1930: vii). The measurement has been taken following the course of the wadi, assuming that the party was riding in the wadi bed.

I 'n'm bn 'nf bn grm'l w wgd s'fr 'n'm f ng' w r'y h- ḫl s'nt mrq nbt gw ḏ
By 'n'm son of 'n'f son of Gm'l and he found the inscription of 'n'm, so he grieved in pain [for him] and he pastured the camels the year in which the Nabataeans passed by this watering place.

**Apparatus Criticus:**
LP 4: gw ḏ "this valley" for "this watering place"
CSNS pp. 93, 192: s'post mrq ṣnt ḏ the year ḏ rebelled against the Nabataeans" for s'post mrq ṣnt gw ḏ "the year in which the Nabataeans passed by this valley"

**Commentary:**
It is tempting to make the emendation suggested by CSNS, but mrq in the sense of "he rebelled" requires ḏ-"against", and the supposed ḏ of ḏ is very large compared to the other examples in the text. On the other hand, the use of a postposed demonstrative ḏ with a noun which is not preceded by the article is very rare. See the discussion in Al-jallad 2015: 81–82. For the interpretation of gw see Groom 1983: 120. It is appropriate to Al-ṭifnah, the location of this inscription, which is place where water is retained just below the surface.

**Provenance:**
Ruğm al-Ḥifnah, Al-Suweidah, Syria

*I *mlk *bn *wṯʾ *bn *hwlʾ *w *syr *mn *rḥbt *md(w)(t)(y)(t)*

By Mlk son of ‘wṯʾ son of Hwlʾ and he returned to a place of permanent water from the Ruḥbah (which was covered with herbage)

**Apparatus Criticus:**
LP 7: *hwlʾ(y)* for *hwlʾ*.

**Commentary:**
On *rḥbt* mean “the Ruḥbah” as opposed to *h- rḥbt* which means “this rababah [a shallow depression in which water collects and produces herbage]” see Macdonald 1992: 23–25.

**Provenance:**
Al-Ḥifnah, Al-Suweidah, Syria
[Latitude/Longitude: 32.76784 / 37.00326]
The Wādī al-Shām is a wide gorge at this point and the site of al-Ḥifnah runs downstream from a series of wells in the wādī bed to a series of pools which were still full in mid-July 1995. Some of the wells are large and probably ancient, others are of the small bedouin type. In July 1995 three were blocked and one was operational. The main concentration of inscriptions is to be found on the escarpment of the left bank of the wadi, north of the pool. This is site C in Macdonald, Al Muʿazzin, Nehmé 1996. Littmann wrote “Al-Ḥifnah is
a water-place in the Wādī al-Shām, between the Hawrān mountains [Ǧabal al-ʿArab] and al-Nemārah. There are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. In the bed of the wadi there are a great many camping-places: stone fences, more or less round, encircling places of different size that are cleaned of stones. There are also several tombs, one of which is surrounded by a small fence and seems to be a Bedawin sanctuary being covered with rags and locks of hair. The Safaitic inscriptions are mostly on the banks or behind them” (Littmann 1943: 1).

Littmann wrote “Al-Ḥifānah is a water-place in the Wādī al-Shām, between the Ḥawrān mountains [Ǧabal al-ʿArab] and al-Nemārah. There are several pools in the wādī, some of which are said to contain water throughout the year. The bed of the wādī is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. In the bed of the wādī there are a great many camping-places: stone fences, more or less round, encircling places of different size that are cleaned of stones. There are also several tombs, one of which is surrounded by a small fence and seems to be a Bedawin sanctuary being covered with rags and locks of hair. The Safaitic inscriptions are mostly on the banks or behind them” (Littmann 1943: 1).

The Wādī al-Shām is a wide gorge at this point and the site of al-Hifna runs downstream from a series of wells in the wādī bed to a series of pools which were still full in mid-July 1995. Some of the wells are large and probably ancient, others are of the small bedouin type. In July 1995 three were blocked and one was operational. The main concentration of inscriptions is to be found on the escarpment of the left bank of the wadi, north of the pool. This is site C in Macdonald, Al Muʾazzin, Nehmé 1996. Littmann wrote "Al-Hifnah is a water-place in the Wādī al-Shām, between the Ḥawrān mountains [Ǧabal al-ʿArab] and al-Nemārah. There are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the
wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. l bgr bn ysʿlm

By bgr son of Ysʿlm

Commentary:
As well as this text, LP 131 [= C 3835], Dussaud M 236 (= C 3706) and Dussaud M 357 (= C 3835) are all from al-Ḥifnah and all read simply l bgr bn ysʿlm. Although it is difficult to be sure, given that all are known only from hand copies, they would appear to be four, or at least three, different texts, possibly by the same man. C 3835 identifies Dussaud M 357 with LP 131, and this is possible but uncertain.

The Wādī al-Shâm is a wide gorge at this point and the site of al-Ḥifnā runs downstream from a series of wells in the wādī bed to a series of pools which were still full in mid-July 1995. Some of the wells are large and probably ancient, others are of the small bedouin type. In July 1995 three were blocked and one was operational. The main concentration of inscriptions is to be found on the escarpment of the left bank of the wadi, north of the pool. This is site C in Macdonald, Al Mu’azzin, Nehmé 1996. Littmann wrote “Al-Ḥifnā is a water-place in the Wādī al-Shâm, between the Ḥawrān mountains [Gabal al-‘Arab] and al-Nemārah. There are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. In the bed of the wadi there are a great many camping-places: stone fences, more or less round, encircling places of different size that are cleaned of stones. There are also several tombs, one of which is surrounded by a small fence and seems to be a Bedawin sanctuary being covered with rags and locks of hair. The Safaitic inscriptions are mostly on the banks or behind them” (Littmann 1943: 1).

**LP 47.1**

ِْکتب بن ساَل بن هود

By ’ktb son of S²ll son of hwd

**Commentary:**

LP 47.1 is carved over LP 47.2. C identified LP 47.1 with Dussaud M 264 [Ç C 3734] which has the same genealogy, but the two copies are completely different, since LP 47.1 is carved over LP 47.2. In fact, Dussaud M 264 is more likely to be the same as LP 780, as Littmann pointed out in the commentary to LP 47.

**Provenance:**

The Wadi al-Sham is a wide gorge at this point and the site of al-Hifna runs downstream from a series of wells in the wadi bed to a series of pools which were still full in mid-July 1995. Some of the wells are large and probably ancient, others are of the small bedouin type. In July 1995 three were blocked and one was operational. The main concentration of inscriptions is to be found on the escarpment of the left bank of the wadi, north of the pool. This is site C in MacDonald, Al Mu’azzin, Nehmé 1996. Littmann wrote “Al-Hifnah is a water-place in the Wawi al-Sham, between the Hawran mountains [Gabal al-‘Arab] and al-Nemarah. There are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. In the bed of the wadi there are a great many camping-places: stone fences, more or less round, encircling places of different size that are cleaned of stones. There are also several tombs, one of which is surrounded by a small fence and seems to be a Bedawin sanctuary being covered with rags and locks of hair. The Safaitic inscriptions are mostly on the banks or behind them” (Littmann 1943: 1).

The main concentration of inscriptions is to be found on the escarpment of the left bank of the wadi, north of the pool. This is site C in Macdonald, Al Muʾazzin, Nehmē 1996. Littmann wrote “Al-Ḥifnah is a water-place in the Wādī al-Shām, between the Hawrān mountains [Gabal al-ʿArāb] and al-Nemārah. There are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. In the bed of the wadi there are a great many camping-places: stone fences, more or less round, encircling places of different size that are cleaned of stones. There are also several tombs, one of which is surrounded by a small fence and seems to be a Bedawin sanctuary being covered with rags and locks of hair. The Safaitic inscriptions are mostly on the banks or behind them” (Littmann 1943: 1).

By ʿ lh son of Ḟ hr son of ‘ dr

Provenance:
Al-Ḥīfah, Al-Suweidah, Syria
[Latitude/Longitude: 32.76784 / 37.00326]
The Wādī al-Shām is a wide gorge at this point and the site of al-Ḥīfah runs downstream from a series of wells in the wādī bed to a series of pools which were still full in mid-July 1995. Some of the wells are large and probably ancient, others are of the small bedouin type. In July 1995 three were blocked and one was operational. The main concentration of inscriptions is to be found on the escarpment of the left bank of the wadi, north of the pool. This is site C in Macdonald, Al Muʿazzin, Nehmé 1996. Littmann wrote “Al-Ḥīfah is a water-place in the Wādī al-Shām, between the Ḥawrān mountains [Gabal-ʿArab] and al-Nemārah. There are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. In the bed of the wadi there are a great many camping-places: stone fences, more or less round, encircling places of different size that are cleaned of stones. There are also several tombs, one of which is surrounded by a small fence and seems to be a Bedawin sanctuary being covered with rags and locks of hair. The Safaitic inscriptions are mostly on the banks or behind them” (Littmann 1943: 1).

Littmann wrote “Al-Ḥifnah is a water-place in the Wādī al-Shām, between the Ḥawrān mountains [Gabal al-ʿArab] and al-Nemārah. There are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. In the bed of the wadi there are a great many camping-places: stone fences, more or less round, encircling places of different size that are cleaned of stones. There are also several tombs, one of which is surrounded by a small fence and seems to be a Bedawin sanctuary being covered with rags and locks of hair. The Safaitic inscriptions are mostly on the banks or behind them” (Littmann 1943: 1).

The Wādī al-Shām is a wide gorge at this point and the site of al-Ḥifna runs downstream from a series of wells in the wādī bed to a series of pools which were still full in mid-July 1995. Some of the wells are large and probably ancient, others are of the small bedouin type. In July 1995 three were blocked and one was operational. The main concentration of inscriptions is to be found on the escarpment of the left bank of the wadi, north of the pool. This is site C in Macdonald, Al Muʾazzin, Nehmé 1996. Littmann wrote “Al-Ḥifnah is a water-place in the Wādī al-Shām, between the Ḥawrān mountains [Gabal al-ʿArab] and al-Nemārah. There are several pools in the wadi, some of which are said to contain water throughout the year. LP 162 (H.F.A 3; MISS.C)

I ṣn tn dr’l bn ṡ’ytn bn dr’l w ḥll ḥ- ḥs²y ḡhs²фф ḫ lt s²lm l- ḭ s²vr

By ṣn son of Dr’t son of ṡ’ytn son of Dr’t and he camped at this place where the water lies just below the surface and he dug to reach the water and so Ṭt [grant] security to whoever leaves [the inscription]
untouched

Apparatus Criticus:
LP 162: \( \l h r^t \ b n \ g l(y) \ w \ q w m \ 'l-\ h^db \) 
“and he encamped at this water-place in the year 42”

Commentary:
In small incised letters running vertical boustrophedon between the letters of LP 161. The reading is that published in MISS.C. A \( hs'y \) is a place where water sinks easily through the permeable soil or sand and is then stopped by an impervious layer of rock and is trapped relatively close to the surface and can be reached with only a small amount of digging (Lane 572c–573a, Littmann 1940: 123–124, Groom 1983: 112 under \( hs'd \)). Al-Hifnah is a place of this sort and indeed the name, \( hifnah \), means a place where water collects (see Groom 1983: 111 \( hifnah \) and 113, under \( Hifnah \)). The verb \( hs'f \) means, among other things, “he dug a well so as to reach an unceasing, or a copious, source of water” (see Lane 730b–c).

Provenance:
Al-Hifnah, Al-Suwaydah, Syria

The Wādī al-Shām is a wide gorge at this point and the site of al-Ḥifneh runs downstream from a series of wells in the wadi bed to a series of pools which were still full in mid-July 1995. Some of the wells are large and may be ancient, others are of the small Bedouin type. In July 1995 three were blocked and one was operational. Site Hf.A is the escarpment of the left bank of the wadi north of the pool, where the major concentration of inscriptions is to be found.

l ʾmrʿ bn ṭbʾl bn ʾnʾm bn ʾšʾ wr ḥll h- {d}{r} {f} ʾṣʾ tr ḥ- bkr tr {f} lt ʾwr ʾwr ʾḥwr h- ʾṣʾfr

By ʾmrʿ son of ṭbʾl son of ʾnʾm son of ʾšʾ and he camped (here) (and then) built an enclosure and [his is the drawing of] this young she-camel (and so) Lt blind whoever scratches out this inscription

**Apparatus Criticus:**
**LP: ff wr <<w>> h· bkrt "and drew <<>> the young she-camel" for (f)f s¹tr w· bkrt "(and then) built an enclosure and [his is the drawing of] this young she-camel"; w lt "and O Lt" for f lt "and so Lt".

**Commentary:**
On a stone with RR 12 and an elaborate rock drawing. This text is thinly chiselled to the left of LP 170 and runs down to the right of the camel and then curls under it. The lower parts of 3 letters (d r f) in the middle have been lost where the edge of the stone has been broken. This was already the case when Littmann copied it. However enough of the tops of the letters have survived to make the reading virtually certain. In the next phrase, the photograph shows that what Littmann copied and read as w in ff wr is actually a t and so s¹tr appears to be a better reading. This is usually found as a substantive in Safaitic, but there is one inscription, SAMAS 9.42.1 in which it occurs as a verb. The rather abrupt w h· bkrt "and [his is the drawing of] the young she-camel" can be paralleled in Ms 44. Finally, it can be seen on the photographs that what Littmann copied and read as w h before lt is actually a badly carved f, thus f lt.

**Provenance:**
Ruġm al-Ruṣayʿī, Al-Suweidah, Syria
[Latitude/Longitude: 32.7978 / 37.1043]
Ruġm al-Ruṣayʿī is a large cairn with many inscriptions of which Littmann copied only 5. It is c. 1.75 km, as the crow flies, from Biʾr al-Ruṣayʿī, around which there are many cairns, and it is not clear why was given the name Rijm al-Ruṣayʿī. The local bedouin do not appear to know it as this today.

By Mty son of 'ẓlm son of Ndm son of S¹yl

Provenance:
Al-Mróshan, Al-Suweidah, Syria

[Latitude/Longitude: 32.844275 / 37.19575]

Al-Mróshan consists of four long, low mounds, running roughly east-west in a flat area where the Wádi al-Gharz spreads out. These mounds create a series of "gorges" perhaps 3 m high in the wadi which is otherwise very flat and at this point hardly distinguishable from the surrounding area, the "wadi-bed" consisting of several channels approximately 30–80 cm deep and 4–10 m wide. The southerly three mounds are covered with graves and enclosures. Much of the rock is not suitable for inscribing. It was visited in 1995 by the Safaitic Epigraphic Survey Programme and all the published texts it rediscovered came from the most northerly of the southern three mounds, and most were concentrated at its eastern end.

By Tm son of Ḥlfn son of Ḥnhm and he grieved for S’yn

**Provenance:**
Al-Mrōshan, Al-Suweidah, Syria
[Latitude/Longitude: 32.844275 / 37.19575]
Al-Mrōshan consists of four long, low mounds, running roughly east-west in a flat area where the Wādī al-Gharz spreads out. These mounds create a series of "gorges" perhaps 3 m high in the wadi which is otherwise very flat and at this point hardly distinguishable from the surrounding area, the "wadi-bed" consisting of several channels approximately 30–80 cm deep and 4–10 m wide. The southerly three mounds are covered with graves and enclosures. Much of the rock is not suitable for inscribing. It was visited in 1995 by the Safaitic Epigraphic Survey Programme and all the published texts it rediscovered came from the most northerly of the southern three mounds, and most were concentrated at its eastern end.

Al-Mrōshan, Al-Suweidah, Syria
[Latitude/Longitude: 32.844275 / 37.19575]
Al-Mrōshan consists of four long, low mounds, running roughly east-west in a flat area where the Wādī al-Gharz spreads out. These mounds create a series of "gorges" perhaps 3 m high in the wadi which is otherwise very flat and at this point hardly distinguishable from the surrounding area, the "wadi-bed" consisting of several channels approximately 30–80 cm deep and 4–10 m wide. The southerly three mounds are covered with graves and enclosures. Much of the rock is not suitable for inscribing. It was visited in 1995 by the Safaitic Epigraphic Survey Programme and all the published texts it rediscovered came from the most northerly of the southern three mounds, and most were concentrated at its eastern end.

LP 237 (Mr. A 11)

I ḡr ḡl ḡk bn ḡr ḡk w ḡl ḡk l-[q(q)] l-[q(q)] l-[q(q)] l-[q(q)] w ḡl ḡk ḡ[ ] ḡt ḡk ḡm l- ṣfr

By ḡr son of ḡr son of ḡk son of Ṣ and he set up a standing stone
for Hlt so O Lt [grant] security in the year in which the wolf encountered ‘ns¹ and ejection [from the grave] to him who effaces this inscription

Apparatus Criticus:
LP 237: ū ḥ l l f for f l l; (g)ḥ h- ḏb ‘ns¹ “the year in which the wolf encountered men” [or ‘ns¹ in the commentary]; ḫwr for ḫwrn.

Commentary:
On one face of a large stone. The author originally wrote ḫl after the r in the fifth name but then scraped over these letters and wrote the b. The divine name/epithet hlt is also found in Slj 840. For another inscription in which the author sets up a standing stone for one deity and then immediately prays to another see RQA 9. Note the unusual plural (فحرن) in the curse.

Provenance:
Al-Mrōshan, Al-Suweidah, Syria
[Latitude/Longitude: 32.844275 / 37.19575]
Al-Mrōshan consists of four long, low mounds, running roughly east-west in a flat area where the Wādī al-Gharz spreads out. [Latitude/Longitude: 32.844275 / 37.19575]

Al-Mrōshan consists of four long, low mounds, running roughly east-west in a flat area where the Wādī al-Gharz spreads out. These mounds create a series of "gorges" perhaps 3 m high in the wadi which is otherwise very flat and at this point hardly distinguishable from the surrounding area, the "wadi-bed" consisting of several channels approximately 30–80 cm deep and 4–10 m wide. The southerly three mounds are covered with graves and enclosures. Much of the rock is not suitable for inscribing. It was visited in 1995 by the Safaitic Epigraphic Survey Programme and all the published texts it rediscovered came from the most northerly of the southern three mounds, and most were concentrated at its eastern end.

LP 258 (Mr.A 2)

\[ l\ h\ t\ t\ b\ n\ h\ t\ b\ n\ s'mk\ b\ n\ s'wr\ b\ nk\ b\ dn\ w\ \ h\ t\ l\ h\ -\ d\ r\ tbb\ m-\ hrn\ b-\ r'y\ dkr\ f\ h\ b'l's'my\ s'lm \]

By Hydt son of [H]t son of S'mk son of S'wr son of Mk son of Bdn and he camped here having become lost [on his way] from Hrn during the rising of Aries so 0 B'l's'my [grant] security

Commentary:
There is a stray scratch, shallower than the lines which form the letters, between the làm auctoris and the h. Scratches around the b of the second bn give it the appearance of a m, but it is clearly a b. The signs for b and r are clearly distinguished in this text, with r consisting of a long straight line with a short curve at one end. For the interpretation of the verb tbb compare Classical Arabic tabba "he suffered loss" or "he became lost", here in the infinitive, compare Arabic tabab, tabāb, tabīb "being lost". On b-r'y dkr see Al-Jallad 2016: 99.

Provenance:
Al-Mrūshan, Al-Suweidah, Syria
[Latitude/Longitude: 32.844275 / 37.19575]
Al-Mrūshan consists of four long, low mounds, running roughly east-west in a flat area where the Wāḍi al-Gharz spread out. These mounds create a series of "gorges" perhaps 3 m high in the wadi which is otherwise very flat and at this point hardly distinguishable from the surrounding area, the "wadi-bed" consisting of several channels approximately 30–80 cm deep and 4–10 m wide. The southerly three mounds are covered with graves and enclosures. Much of the rock is not suitable for inscribing. LP 259 (Mr.A 3)

\[ l\ h\ t\ l\ bn\ s'd\ bn\ w'l\ bn\ hgm\ l\ w\ \ gm\ t\ b'l's'm\ mn\ m-\ s'n\ {' }\]

(By) Hfl son of s'd son of W'l son of Hgm and booty B'l's'm mn from {enemies}

Apparatus Criticus:
LP 259: g'l for w'l, gm t -h "gave him booty" for gm t "booty"; b's'm(y) for b'l's'mn.

Commentary:
The làm auctoris and possibly one or more names appear to be missing. LP reads gm t -h, but gm t is clear on the photograph as is the n (not "an incomplete y") of b'l's'mn. One side-stroke of the final ' is missing. LP reads LP 259.1 as the end of this text but there seems no justification for this since it begins at the opposite side of the face from the end of LP 259. It is possible that both LP 259 and 259.1 begin on the adjacent face.
Provenance:
Al-Mrōshan, Al-Suweidah, Syria
[Latitude/Longitude: 32.844275 / 37.19575]
Al-Mrōshan consists of four long, low mounds, running roughly east-west in a flat area where the Wādī al-Gharz spreads out. to be a mistake for sʿwr (in 258), though there are no other examples of ʿ in this text for comparison, and
carving r as a straight line may simply have been an idiosyncrasy of this author. Similarly, mk for mlk (in
258) could be a mistake, though it might represent a difference of pronunciation. Note that the divine name
is bʿlsʿmy, an Arabian re-formation of the more usual bʿlsʿmn which is found in LP 259.

Provenance:
Al-Mrōshan, Al-Suweidah, Syria
[Latitude/Longitude: 32.844275 / 37.19575]
Al-Mrōshan consists of four long, low mounds, running roughly east-west in a flat area where the Wādī al-
Gharz spreads out. These mounds create a series of "gorges" perhaps 3 m high in the wadi which is
otherwise very flat and at this point hardly distinguishable from the surrounding area, the "wadi-bed"
consisting of several channels approximately 30–80 cm deep and 4–10 m wide. The southerly three mounds
are covered with graves and enclosures. Much of the rock is not suitable for inscribing. It was visited in
1995 by the Safaitic Epigraphic Survey Programme and all the published texts it rediscovered came from
the most northerly of the southern three mounds, and most were concentrated at its eastern end.

LP 271

l gyz bn ‘ll
Corpus of Safaitic inscriptions

By Gyz son of Il

Provenance:
Al-Mrōshan, Al-Suweidah, Syria
[Latitude/Longitude: 32.844275 / 37.19575]
Al-Mrōshan consists of four long, low mounds, running roughly east-west in a flat area where the Wādī al-Gharz spreads out. These mounds create a series of "gorges" perhaps 3 m high in the wadi which is otherwise very flat and at this point hardly distinguishable from the surrounding area, the "wadi-bed" consisting of several channels approximately 30–80 cm deep and 4–10 m wide. The southerly three mounds are covered with graves and enclosures. Much of the rock is not suitable for inscribing. It was visited in 1995 by the Safaitic Epigraphic Survey Programme and all the published texts it rediscovered came from the most northerly of the southern three mounds, and most were concentrated at its eastern end.

LP 276

l klmt bn ḥmyn h- ʿry

By Klmt son of Ḥmyn is the enclosure

Provenance:
Al-Namārah, Rif Dimashq, Syria

[Latitude/Longitude: 32.88545 / 37.29163]

Al-Namārah itself is an "island" in a basin at the confluence of the Wādī al-Ṣawṭ and the Wādī al-Šām. The island rises to a considerable height above the wadi bed. On its top are the ruins of a Roman fort the outlines of which, and the square north-east and south-west towers, can still be made out. However, much of the masonry has been reused to build a mediaeval mausoleum, including a lintel with an unfinished Greek inscription mentioning Marcus Aurelius (Waddington 1870: no. 2264) and stone doors. There are many Safaitic, Greek and two Latin graffiti on the slopes of the island and the banks of the wadi. In antiquity, there were small dams, cisterns, wells and diversion channels to trap the water and to lead it to nearby fields, see Macdonald 2009.

**LP 281 (Is.Mu 889)**

\[ l
d g bn m n bn "dg \- \ h s m n w wld h- m z y \]

By "dg son of M’n son of “dg of the lineage of Ḫṣmn and he helped the goats to give birth

**Commentary:**
Lightly incised boustrophedon.

**Provenance:**
Al-Īsāwī, Rif Dimashq, Syria

[Latitude/Longitude: 32.89645 / 37.31101]

Al-Īsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

**LP 282 (Is.M 26)**

\[ l r b l bn ‘nh h- n q t w \{h\} ‘lt rm n n q t m- q br 1- d y w r n - h \]

By Rb”l son of ‘nhk is the she-camel and (O) goddess of Rm’n [inflict] ejection from the grave on whoever may scratch it out

**Apparatus Criticus:**
LP 282: (3)m (w) <<→ nq’t for rm’n nq’t.

**Commentary:**
The two prongs of the fork of the h introducing the invocation have been joined making it into a y. However the prongs have then been extended beyond the join. The The first letter of rm’l cannot possibly be a ṣ as suggested by Littmann and is similar to the r of qbr. The “flaw in the stone” (LP p. 69) after this letter can be seen on the photograph. The following m is faint but clearly visible on the original. Between this and the ‘
there is a small ridge on the surface and no letter was written. The last letter of the word and the sign which immediately follows it are both considerably longer than the examples of n at the beginning of the text but appreciably shorter than the following qrb and similar in length to the penultimate letter. Rm'n is presumably a toponym referring to al-Īsāwī itself or a place nearby since the author would be unlikely to invoke the topographical name of another place to protect a drawing left here. Littmann interpreted y'wrn as the 3rd m. pl of the suffix conjugation. However, Al-Jallad (2015: 97–98) considers is more likely that it represents the energetic ending. For the interpretation of nq’t see Al-Jallad 2015: 335, under QY’

Provenance:
Al-Īsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-Īsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

LP 283 (LP 931; Is.M 24)

l ’n’m bn ’s’wd h- bkr

By ’n’m son of ’s’wd is the young she-camel

Commentary:
Written around a drawing of a camel. There are several extraneous lig htly scratched lines among the letters, and those on either side of the ‘ are particularly confusing. It is almost certain that LP 93, by one of "the servants of the Princeton University Archaeological Expedition" (Littmann 1943: iii) is another copy of this inscription.

Provenance:
Al-Īsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]
Al-Īsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. LP 284 (Is.M 25)

l b’wn bn km’d bn ’lm h- ngt

By 'b’wn son of km’d is the servant of the Ruḥbah
By Bʿwn son of Kmd son of ʿlhm is the she-camel

**Apparatus Criticus:**
LP 284: rgwn for bʿwn

**Commentary:**
Although the name bʿwn is previously unattested, Littmann's reading rgwn seems less likely. The b is identical to the examples in the two bn's and the second letter of the name would be very small for a g. Written round a drawing of a she-camel on an adjacent face to that bearing LP 283

**Provenance:**
Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]

**LP 285 (LP 1096; Is.Mu 12)**

ʾwsʾl bn sʾly bn wdm

By ʾwsʾl son of sʾly son of Wdm

**Apparatus Criticus:**
LP 285: sʾny for sʾly; LP 1096: š(h)ly for sʾly; glm for wdm

**Commentary:**
LP 285 (= LP 1096) and LP 286 (= LP 1095) are on the same face of the same rock. LP 1095–1096 were copied by "servants of the Princeton University Archaeological Expedition" (see LP p.iii) and Littmann did not recognize the identity of these two copies with LP 285 and 286, which he himself had copied. His emendation of the second name in LP 1096, was forced by the fact that the copyist had assigned the t of "ṭr in LP 1095 (= LP 286) to this text, an understandable error given its position. Since *sʾly seemed an unlikely name Littmann read it as š(h)ly.

**Provenance:**
Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]

**LP 286 (LP 1095; Is.Mu 13)**

\[ l ymlk bt ‘m bn “tr bn s^m Kl w rdy s^l \]

By Ymlk daughter of ‘m son of “tr son of S^m Kl and Rdy [grant] security

**Apparatus Criticus:**

LP 286: b(n) for bt though he notes that it was bt on the stone; "tb for “tr

LP. 1095: ‘m n bn for ymlk; bt ‘m for bt ‘m; b[n] for bn; s’b for “tr; w [h] rdy for w rdy

**Commentary:**

*By Ymlk daughter of ‘m son of “tr son of S^m Kl and Rdy [grant] security. Btt for bnt is frequent in Safaitic. The upper fork of the ‘ of the third name has been filled in. It is not necessary to assume with LP that the ‘ and t of this name were omitted and added above the line. If LP 285 (= Mu 12) was written first it would have forced a change of direction on the author of LP 286 (= Mu 13). The fourth letter of “tr has a shallower curve, like the r of rdy, unlike the tighter curves of the b’s of bt and bn. There appears to be a line joining the l of the last name and the following w. LP 1095–1096 were copied by “servants of the Princeton University Archaeological Expedition” (Littmann 1943: iii) and Littmann did not recognize the identity of these two copies with LP 285 and 286, which he himself had copied. The copyist of 1095 and 1096 assigned the t of “tr in LP 1095 to the second name (s^l) in LP 1096 (= LP 285) which Littmann then emended to s’(h)ly."

**Provenance:**

Al-‘Isāwī, Rif Dimashq, Syria

[Latitude/Longitude: 32.89645 / 37.31101]

Al-‘Isāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. Al-ʿĪsāwī Area H. Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there are also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.
Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

LP 297 (Is.Mu 25)
l ʿwqʾl bn ḫḏ(t) w rʾy h- nḥl ḡzz sʾnt qtl mʾn
By ʿwqʾl son of ḫḏt and he pastured the valley while raiding in the year in which Mʾn was killed

Apparatus Criticus:
LP: [w] ḡzz for ḡzz

Commentary:
The last letter of the first name looks like a ḥ, but it seems likely that the side bar was added later since it is slightly wider than the long stroke. The last letter of the second name is also in doubt since the horizontal bar is much thicker than the vertical, and it is possible that the name was actually ḫḏn. We take ḡzz as an active participle in the accusative of ḫāl.

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]

LP 299 (Is.Mu 31)

l nzm l bn mms y bn bʿdr b bn ḡḍṭ bn ʿndt bn wš yt w syr mn rḥbt f wd

By Nzm l son of Mms y son of Bʿdr son of ḡḍṭ son of ʿndt son of Wš yt and he returned to the watering place from rḥbt, and he became wealthy

Apparatus Criticus:
LP 299: ṣndḥ for ṣndt;

Commentary:
The inscription is carved on three faces of the stone. The final word is difficult to make out on the photograph, but the second letter is almost certainly a d rather than a g as copied by Littmann. The translation of wd is based on comparison with Arabic ṭa·d̄a·ʿa “to become wealthy”, though it could also mean “he became calm” (Hava 859).

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]

LP 305 (Is.Mu 44)

By Mnʾl son of ʿwsʾl son of Hml and he found the inscription of Mnʾl and the inscription of Tmʾl and the inscription of Ṣʾhr who are lost and so O Lt [grant] security to him who remains and revenge on him who killed [them] and he grieved for ṣʾl and for Wdʾ (his) neighbour both lost and O Bʿlsʾmn blind whoever scratches out the inscription

Apparatus Criticus:
LP 305 reads the scratched over ḍ 감 before *dlmn* as a ḍ 감; ḍ 감 *wk kl dinky* for ḍ 감 *gr {-h} dinky.*

Commentary:
After Ṣʾfr Ṣʾhr the author appears to have carved a ḍ 감 before scratching over it and carving a ḍ 감. It is impossible to know whether he had originally intended to carve something else or whether /d 감/ and /d 감/ were close enough in his dialect for him to be uncertain as to which was required. Dlmn here is the plural of the passive participle. Although, it literally means "lost", it is clear from what follows that they had been killed. Whereas, Ṣʾfr is usually found in blessings on those who leave the inscription "untouched", here, in the context of the cry for revenge on the murderer(s), it would seem to refer to the author as the one who was not killed, and so "remains". After ṢʾFr, Littmann reads ḍ 감 *dinky* despite the fact that his copy has ḍ 감 *gr {-h}*. We have interpreted ḍ 감 on the basis of Arabic ḍ 감 "neighbour". If the next letter is a ḍ 감, as we have read it, its fork has been covered by a thicker line running from the ḍ 감 across it and the r and ending just above the g. Dinky here would be the dual referring to the two men for whom he was grieving. In the following prayer, the author first continued the divine name bʾlsʾmn on the same face, but then realised that he did not have enough space for the rest of the prayer and so scratched out the letters lmn and recarved them on the adjacent face with the rest of the prayer.

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria

[Latitude/Longitude: 32.89645 / 37.31101]

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. References:
[Is.Mu] Inscriptions recorded at al-ʿĪsāwī by Muna Al-Muʿazzin, on the Safaitic Epigraphic Survey
By Bnʾlh son of ʿhm son of ʿgrr and he was heavy-hearted on account of his brother and of his father and of his paternal uncle and he was afraid of the enemy and so O Lt [and] Gdʾwḏ [grant] protection; and he found the inscriptions of his companions and he was sad.

**Apparatus Criticus:**
LP 306: ‘zkr for ʿgrr; [?=]b - h for ʿb - h; w gdwḏ for [[[w]]] (w) gdwḏ

**Commentary:**
The second letter of the third name is clearly ǧ and though the next looks at first like a k it has a hook at the bottom of the stem making it a r. The name ʿgrr is unattested but compare Arabic ʿajr “of a bright complexion”. The author erased a letter between ‘l- and ʿḥ. Between lt and gdwḏ he wrote w twice and seems to have tried to erase both. We follow Littmann’s interpretation of the words ẓql and qnt.

**Provenance:**
Al-ʿĪsāwī, Rif Dimašq, Syria

I hgr bn tr bn kn h-ḥṭṭ

By Hgry son of Ṭry son of Kn is the carving

Apparatus Criticus:
LP 311: hghy for hgry; omits bn kn; reads h-ḥṭṭ with LP 312.

Commentary:
Associated drawing to be numbered. See also photo PH ZF 7-8 This author may be the same as that of C 54. The reading of the third and fourth letters is complicated by the fact that the surface in this area of the face has flaked and repatinated to exactly the same colour as the letters. It is this flaking which is responsible for the apparent fork at the end of the fifth letter which caused Littmann to read it as h. The second bn is at 90° to the rest of the text and the b is square as opposed to the rounded first b. Although the letters h-ḥṭṭ are incised (like M 90) rather than chiselled (like the rest of M 89) their size and position suggests that they are more likely to belong to 89 than to 90.

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria

LP 315 (Is.M 88)

lʿdr b n ghm

By ʿdr b Ghm

Apparatus Criticus:
LP 315: ʾdr for ʿdrb but in the commentary ʿdrb is given as one of several possible alternative readings.

Commentary:
The r and the b of the first name are clearly distinguished and the latter is identical to the b of bn. There is therefore no doubt about the reading ʿdrb. Immediately after the b there is a failed attempt at writing bn and Littmann copied this rather than the successful second attempt immediately below it.

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. Al-ʿĪsāwī, Rīf Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-ʿNamārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

LP 325 (Is.M. 112; MISS.G 1)

I mṯr bn 'm bn mṯr bn 'n'm bn qdm ḡ- 'l'wḏ w dmy l- -h 'b -h w ḫrs h- nw m‘ ḡ -h m- mdbh f h lt s¹lm w ḡnt t- ḡ d'y h- s'fr w 'wr w ḫrs l- ḡ y wr h- ḫṭṭ

By Mṯr son of 'm son of mṯr son of 'n'm son of Qdm of the lineage of 'wḏ and his father drew a picture for him and he kept watch with his brother for the migrating group from the desert and O Lt [grant] booty to whoever leaves the inscription [intact] and blind and strike dumb whoever scrathes out the carving

Apparatus Criticus:
LP 325: w ḫrs -h m‘ ḡ -h m- mdbh “And there appeared to him [a vision of] his father and he looked out for him with his brother from the desert” for w ḫrs h- nw m‘ ḡ -h m- mdbh “and his father drew a picture for him and he kept watch with his brother for the migrating group from the desert”
Macdonald 1990: 27 n. 5: w dmy l- -h 'b -h” and his father drew a picture for him”
The final ḡ of ḡṭṭ, missed by Littmann, can be seen just below the chin of the Bactrian camel.

Commentary:
The reading is dear though some parts are visible only in certain lights. The inscription is finely incised and the letters have square forms from the beginning up to and including the first two letters of ḫrs, after which the “normal” script is used. The text clearly postdates the drawing, since it carefully avoids encroaching on it and thus was carved by the author after his father had made the drawing. On dmy l- -h see Macdonald, Al Muʿazzin & Nehmé 1996: 470; on h- nw see p. 471. Note that the stone bearing LP 403 was found a few metres away from this stone and is by a first cousin of the author of LP 325 who says that the drawing of a dancing girl encircled by his text was made by his paternal uncle ‘m, the father of Mṯr in LP 325. The meaning of the verb dmy “to draw a picture” was first proposed by G. Lankester Harding in the commentary to HCH 73. Another example of the expression w dmy l- -h “and drew a picture for him” can be found in C 1186. The syntax of the phrase w ḫrs h- nw m‘ ḡ -h m- mdbh is awkward and the literal meaning “while they kept watch for the tribal migration with his brother from the inner desert.” could also mean that “they kept watch for the tribal migration in which his brother was taking part [on its way] from the inner desert.” In either case m‘ ḡ -h may have been an afterthought.

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]

**LP 326 (Is.M 113; MISS p. 473)**

\[ l m s¹k bn 'brqn b[n] (m) s¹j w [r] (f) y h- d'n s¹nt s¹r mlk b- h- 'rd f h lt s¹lm \]

By Ms¹k son of 'brqn son of (Ms¹k) and (he pastured) the sheep the year Mk served in the great army and so O Lt [grant] security

**Apparatus Criticus:**

LP 326: s¹nt s¹r (h-) mlk - h- 'rd "the year (the) king travelled in this valley [?]" for s¹nt s¹r mlk b- h- 'rd "the year Mk served in the [great] army."

**Commentary:**

The inscription was carved after the drawing and LP 325, which it carefully avoids. The s¹ of the third name is attached to the y of yʾwr in LP 325 and the letter(s?) before it is/are damaged by abrasions. The word after s¹nt is clearly s¹r (on both the original and Littmann's copy) and LP's reading s¹r h- mlk is therefore impossible. For our interpretation see MISS p. 468. The last three letters are lightly scratched. For the verb s¹r "to serve in a military unit" see Macdonald 2014: 59–160, and n. 78. For 'rd compare Arabic arḍ/ird an "army" or a "great army" (Lane 2007a, 2008a).

**Provenance:**

LP 326.1 (Is.M 114, 115; MISS p. 473)

\( l \text{ mn’} \quad \text{bn mr(’)} \quad \text{(-s²)} \quad \text{fj’r \ hî (h)} \quad \text{mmk} \)

By Mn’ son of Mr(’): \( s²řђ \) (his) maternal uncle mmk

Apparatus Criticus:
Not read in LP.

Commentary:
The text starts just behind the head of the dromedary and runs up the front of its hump and down the back of it. There is something between the front legs of the Bactrian camel but it is too damaged to interpret and may not belong to the inscription. There is a patch of heavy hammering immediately above the dromedary’s hump which has obscured part of the text and only the lower parts of an \( s² \) and a \( f \) can be seen after it. The last three letters are facing in the opposite direction to the rest of the text and may not belong to it. They were read as a separate inscription by Is.M 115.

Provenance:

AlʾĪsāwī, Rif Dimashq, Syria

[Latitude/Longitude: 32.89645 / 37.31101]

AlʾĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

l hn’ bn šrkn bn mlhm bn ’dnt bn wrd bn ngbr d- l’wd w wgd s’t fr ’s’zy ’h f ndm s:n wq br w ’zz h- hmy ’l’w d’ fr h gd’wd w ds’r w ñm w’nm l- d-s’t fr w gnmt m- s’hš w mhlt w hšrs’ w ’rg l- ñbl h- s’fr w gnmt l- d’ y

By Hn’ son of Srkn son of Mlhm son of Dnt son of Wrd son of Ngbr of the lineages of Wd and he found the inscription of his companions and so he was devastated by grief in the year of the struggle of Qbr and ‘zz [over] this protected area of pasture of the lineages of Wd and so O Gd’wd and Ds’r and O Lk [grant] secure help to whoever leaves this inscription untouched and freedom from want but [inflict] dearth of pasture and dullness and lameness on whoever would damage this writing and [grant] booty to whoever would read [it] aloud

Apparatus Criticus:
LP 342: s:n wq br w ’zz h- hmy ’l’w’ in the year in which he united tombs and made them honoured as a sanctuary of the people of Wd” for “in the year of the struggle of Qbr and ‘zz [over] this protected area of
pasture of the lineage of 'wd'

Commentary:
The expression h- hmy l 'wd is an example of the demonstrative adjective h- used before a genitive construction, on which see Al-Jallad 2015: 77–78. For hmy (cf. Arabic himā) as an area of protected pasture, either forbidden to the animals of all but a certain group, or tribal leader, or dedicated to a deity, or a sort of reservation where wild and domestic animals could graze without being hunted or slaughtered. See, for instance, Chelhod 1964: 230–231; 1979: 393; Henninger 1981: 256–258. The word m'wn is either an epithet of Lt (as in Al-Jallad 2015: 268) or could be in construct with s'lm as interpreted here. Compare Classical Arabic maʿān, maʿwanah, maʿwanah "help, assistance" (Lane 2203c).

Provenance:
Al-ʾĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]
Al-ʾĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. LP 343 (Is.Mu 118)
l ʾznʾl bn sʾlm bn sʾlm w rʾy sʾnt sʾmh h-qy
By ʾznʾl son of Sʾlm son of Sʾlm and he pastured in the year in which he pastured the desert

Apparatus Criticus:
LP 343: sʾnt sʾmh h- qṣl "the year in which he let the small herd of camels pasture" for sʾnt sʾmh h- qy "the year in which he pastured the desert"

Commentary:
Unfortunately LP’s interpretation was based on taking the t as a š and taking a stray line at the end of LP 342 as a š belonging to the end of this text. As can be seen on the photographs, the line is much thicker and more firmly incised than the last two letters of this text and there would have been no reason for the author to have placed it there if it was part of his text. There are thinly scratched lines crossing between LP 343 and the last line of of LP 342 and one of these crossed the bottom of the final y in LP 343. LP seems to have mistaken this for the fork of a š. All the letters are clear but it is difficult to interpret the text. The translation offered here is not very satisfactory. It is based on the Arabic verb sammahā "to let [beasts] pasture" (Hava p. 337b) and Arabic qyy "desert" (Hava p. 636a).
Provenance:
Al-ʿĪṣāwī, Rif Dimashq, Syria

[Latitude/Longitude: 32.89645 / 37.31101]
Al-ʾĪsawi is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

\[ l \ 's^1 \ bn \ 's'd \ bn \ rb'l \ bn \ n'm \ bn \ ms'k \ bn \ s'kr \ bn \ g'mnt \ bn \ 'bd \ w \ wrf(d) \ {b-} \ {h-} \ mrb \ w \ hw's^1 \ 'bl \ -h \ {'}b \ -h \ {'}h-gw \ sfl \ h \ -s'ty \ s'nt \ nwy \ wdn \ m- \ rm \ <<<>>

By 's^1 son of 's'd son of Rb'l son of 'n'm son of Ms'k son of G'mnt son of 'bd and (he came to water) (at) (this mrb) and (his father) sent his camels to water one by one in the \( gaww \) the winter having brought no rain the year Wdn fled from Roman territory

**Apparatus Criticus:**
LP 406: \( w \ wrf(d) \ {b-} \ {h-} \ mrb; w \ hw's^1 \ 'bl \ {'}[l]r \ d \ wsl \ f \ h \ -s'ty \ for \ w \ hw's^1 \ 'bl \ -h \ {'}b \ -h \ {'}h-gw \ sfl \ h \ -s'ty \)

MST p. 7 & n. 30: By \( w \ sfl \ h \ -s'ty \ "the winter brought no rain"

**Commentary:**
\( w \ wrf(d) \ {b-} \ {h-} \ mrb: \) As can be seen on the photographs, Littmann’s reading \( w \ wrf(d) \) is not possible. A marābb in Arabic is an area of “low-lying ground where the rain-water of a channel is absorbed” (Groom 1983: 177), hence the water is not very far below the surface. \( w \ hw's^1 \ 'bl \ -h \ {'}b \ -h \ {'}h-gw: \) Again, Littmann’s reading is not supported by the photographs. In Arabic, a \( gaww \) is topos graphical term meaning “a basin in which water collects”, an “open plain with many wells” (Groom 1983: 129), and clearly the context requires something similar to this \( sfl \ h \ -s'ty \). In Classical Arabic, the basic meaning of the root \( S-L-F \) is to “disappoint expectations” and the verb is used in for instance salīfa ‘l-sahāb “the clouds had in them no water” (Lane 1717c-1718a), hence here “the winter having brought no rain” (see Macdonald 1992: 7 and n. 30). At the end of the text, there is wahī looks like a \( h \) carved at right angles to the letters \( rm \) and which does
not seem to be part of the text.

l wrd bn hr bn wrd w bll (h-) dr w r'y bql b- ks²ünchen mt w ngy s¹nt (')b's¹ m- s²ry h- ns¹ 'ld -h w dll h- n'm f h
bís¹mn rwh l- ḍ ʾl ṣwr w wr' l- ḍ ywr h- s²fr

By Wrd son of Hr son of Wr and he camped here and pastured on spring herbage during the cosmical setting/full moon of Libra”; w ngy s¹nt b's¹ m- s²ry h- ns¹ ‘ndh” and he rushed forth in the year in which he was grieved by the soff of the people” for w ngy s¹nt (')b's¹ m- s²ry h- ns¹ ‘ld -h” and he was saved the year in which calamity befell his children through the epidemic of pox [lit. the pox of the people] and the live-stock died [lit. went astray] and so 0 B'ls³mn [send] relief to whoever leaves intact andblindness to whoever scratches out the writing

Apparatus Criticus:
LP 407: hb for hr; 'r'y bql b- ks²uchen ‘mt “and he tended flocks seeking green fodder at the expense of the community” for 'r'y bql b- ks²uchen ‘mt “pastured on spring herbage during the cosmical setting/full moon of Libra”; w ngy s¹nt b's¹ m- s²ry h- ns¹ ‘ndh” and he rushed forth in the year in which he was grieved by the soff of the people” for w ngy s¹nt (')b's¹ m- s²ry h- ns¹ ‘ld -h” and he was saved the year in which calamity befell his children through the epidemic of pox [lit. the pox of the people]”; w dll h- n'm “he drove together and lost the camels for "and the livestock died [lit. went astray]”.

O’Connor (1986: 609-610) wrongly emends what is clearly m- s²ry to read ms²rk.

Commentary:
The r's in this text have hooks and the second name is clearly hr. For b- ks²uchen ‘mt meaning “during the cosmical setting/full moon of Libra” see Al-Jallad 2016: 101. Littmann omitted the (’) after s¹nt on his copy. On the black-and-white photograph showing a detail of this section of the text the very faint lower fork of the (’ can be made out. In s¹nt (’) b's¹ m- s²ry h- ns¹ ‘ld -h, the verb is ‘b's¹”=calamity befell (him)” (Lane 146a), the subject being ‘ld -h (‘awladu-hu). In the expression s²ry h- ns¹, s²ry would seem to be cognate with Classical Arabic s²ran “a kind of pox (Lane 1545c) and h- ns¹ “of the people”, thus “the pox of the people”, i.e. “an epidemic”. dll may be meant literally “went astray” or metaphorically “died”.

O’Connor (1986: 609-610) wrongly emends the text in order to create the word ms²rk.

Provenance:

The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

Provenance:
Al-Ṭṣwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]
Al-Ṭṣwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. LP 434 (Is.L 66)

I ḥnnʾl bn ns²mʾl w ḥdr h- dr

By ḥnnʾl son of Ns²mʾl and he camped here near permanent water

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

LP 442 (Is.L 63)

l mʾd bn ḥʾmn h- bkrt f h rʾdw nqm l- nhḍ

By Mʾd son of Ḥʾmn is [the drawing of] the young she-camel so O Rʾdw [grant] revenue for Nhḍ

Apparatus Criticus:
LP 442 takes the inscription to be "a document of property or a record of sale".

Commentary:
It is not clear what nhḍ means here. In Arabic, nahda means to "arise, hasten" and inhadha (√H-D-I) means "to be broken or crushed", neither of which seem suitable for this context. It seems therefore better to take it as the personal name which is known in Safaitic.

Provenance:
Al-ʿĪsawi, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]

AlʿĪsawi, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]
AlʿĪsawi is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

**LP 463 (Is.R 135)**

l ṛhn bn ʾṣgʿt h-frs¹

By ṛhn son of ʾṣgʿt is the horse

**Apparatus Criticus:**

LP ʾṣgʿ for ʾṣgʿt

**Commentary:**

On the same face as LP 464. It seems that the author of LP 464 drew the picture but that the author of this inscription (LP 463) then appropriated the credit for the drawing and rendered the original author’s name unrecognizable. In view of this, it seems likely that the author of LP 464 used the end of of 463 (t h-frs¹) as the end of his own inscription.

**Provenance:**

By ṣṭmn son of ṣ’d son of ṣṭmn

Provenance:
Al-Ṭsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]
Al-Ṭsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

"On the road from Qabr Nāṣir to Sanayim al-Gharz, not far from east from Ghadir al-Darb" [Littmann 1943: 170], Rif Dimashq, Syria
[Latitude/Longitude: 32.8333 / 37.0667]
Unfortunately, the Safaitic Epigraphic Survey Programme was unable to locate the sites of Qabr Nāṣir and Sanayim al-Gharz and they do not appear in Geonames. Duassaüd & Macler describe Ghadir al-Darb as "a muddy pool of water" in Wādī al-Gharz (1903: 27 [429]). The co-ordinates given above are those provided by Geonames, but this places it some 220 m north of the left bank of the wadi, so they should be taken as approximate.

l ḏb bn thmy bn ḍbd bn wrd

By ḏb son of Thmy son of ḍbd son of Wrd

Provenance:
Al-Ḥifnah, Al-Suweidah, Syria
[Latitude/Longitude: 32.76784 / 37.00326]
The Wādī al-Shām is a wide gorge at this point and the site of al-Ḥifnah runs downstream from a series of wells in the wādī bed to a series of pools which were still full in mid-July 1995. Some of the wells are large and probably ancient, others are of the small bedouin type. In July 1995 three were blocked and one was operational. The main concentration of inscriptions is to be found on the escarpment of the left bank of the wadi, north of the pool. This is site C in Macdonald, Al Muʿazzin, Nehmé 1996. Littmann wrote "Al-Ḥifnah is a water-place in the Wādī al-Shām, between the Ḥawrān mountains [Gabal al-ʿArab] and al-Nemārah. There are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. In the bed of the wadi there are a great many camping-places: stone fences, more or less round, encircling places of different size that are cleaned of stones. There are also several tombs, one of
which is surrounded by a small fence and seems to be a Bedawin sanctuary being covered with rags and locks of hair. The Safaitic inscriptions are mostly on the banks or behind them” (Littmann 1943: 1).

Some of the wells are large and probably ancient, others are of the small bedouin type. In July 1995 three were blocked and one was operational. The main concentration of inscriptions is to be found on the escarpment of the left bank of the wadi, north of the pool. This is site C in Macdonald, Al Muʾazzin, Nehmé 1996. Littmann wrote "Al-Ḥifnah is a water-place in the Wādī al-Shām, between the Ḥawrān mountains [Gabal al-ʿArab] and al-Nemārah. There
are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the wadi is wide enough to secure pasture for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. In the bed of the wadi there are a great many camping-places: stone fences, more or less round, encircling places of different size that are cleaned of stones. There are also several tombs, one of which is surrounded by a small fence and seems to be a Bedawin sanctuary being covered with rags and locks of hair. The Safaitic inscriptions are mostly on the banks or behind them” (Littmann 1943: 1).

[Latitude/Longitude: 32.76784 / 37.00326]

The Wādī al-Shām is a wide gorge at this point and the site of al-Ḥifnah runs downstream from a series of wells in the wādī bed to a series of pools which were still full in mid-July 1995. Some of the wells are large and probably ancient, others are of the small bedouin type. In July 1995 three were blocked and one was operational. The main concentration of inscriptions is to be found on the escarpment of the left bank of the wadi, north of the pool. This is site C in Macdonald, Al Muʾazzin, Nehmé 1996. Littmann wrote "Al-Ḥifnah is a water-place in the Wādī al-Shām, between the Ḥawrān mountains [Ǧabal al-ʿArab] and al-Nemārah. There are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. In the bed of the wadi there are a great many camping-places: stone fences, more or less round, encircling places of different size that are cleaned of stones. There are also several tombs, one of which is surrounded by a small fence and seems to be a Bedawin sanctuary being covered with rags and locks of hair. The Safaitic inscriptions are mostly on the banks or behind them" (Littmann 1943: 1).

The main concentration of inscriptions is to be found on the escarpment of the left bank of the wadi, north of the pool. This is site C in Macdonald, Al Muʾazzin, Nehmé 1996. Littmann wrote "Al-Ḥifnah is a water-place in the Wādī al-Shām, between the Hawrān mountains [Ǧabal al-ʿArab] and al-Nemārah. There are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. In the bed of the wadi there are a great many camping-places: stone fences, more or less round, encircling places of different size that are cleaned of stones. There are also several tombs, one of which is surrounded by a small fence and seems to be a Bedawin sanctuary being covered with rags and locks of hair. The Safaitic inscriptions are mostly on the banks or behind them" (Littmann 1943: 1).

By S²gr son of Gmr son of

Provenance:
Al-Ḫīnāh, Al-Suweidah, Syria

The Wādī al-Shām is a wide gorge at this point and the site of al-Ḫīnāh runs downstream from a series of wells in the wāḍī bed to a series of pools which were still full in mid-July 1995. Some of the wells are large and probably ancient, others are of the small bedouin type. In July 1995 three were blocked and one was operational. The main concentration of inscriptions is to be found on the escarpment of the left bank of the wadi, north of the pool. This is site C in Macdonald, Al Muʿazzin, Nehmé 1996. Littmann wrote "Al-Ḫīnāh is a water-place in the Wādī al-Shām, between the Ḥawrān mountains [Ǧabal al-ʿArab] and al-Nemārah. There are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. In the bed of the wadi there are a great many camping-places: stone fences, more or less round, encircling places of different sizes that are cleaned of stones. There are also several tombs, one of which is surrounded by a small fence and seems to be a Bedawin sanctuary being covered with rags and locks of hair. The Safaitic inscriptions are mostly on the banks or behind them" (Littmann 1943: 1).

Al-Mrōšan consists of four long, low mounds, running roughly east-west in a flat area where the Wādī al-Gharz spreads out. These mounds are covered with graves and enclosures. Much of the rock is not suitable for inscribing. It was visited in 1995 by the Safaitic Epigraphic Survey Programme and all the published texts it rediscovered came from the most northerly of the southern three mounds, and most were concentrated at its eastern end.

By Mrtn son of Ḫrd

Provenance:
Al-Mrōshan, Al-Suweidah, Syria
[Latitude/Longitude: 32.844275 / 37.19575]
Al-Mrōshan consists of four long, low mounds, running roughly east-west in a flat area where the Wādī al-Gharz spreads out. These mounds create a series of "gorges" perhaps 3 m high in the wadi which is otherwise very flat and at this point hardly distinguishable from the surrounding area, the "wadi-bed" consisting of several channels approximately 30–80 cm deep and 4–10 m wide. The southerly three mounds are covered with graves and enclosures. Much of the rock is not suitable for inscribing. It was visited in 1995 by the Safaitic Epigraphic Survey Programme and all the published texts it rediscovered came from the most northerly of the southern three mounds, and most were concentrated at its eastern end.

By S²ʿ son of S¹ʾb son of Qdm

Provenance:
Al-Mrōshan, Al-Suweidah, Syria

[Latitude/Longitude: 32.844275 / 37.19575]
Al-Mrōshan consists of four long, low mounds, running roughly east-west in a flat area where the Wādī al-Gharz spreads out. These mounds create a series of "gorges" perhaps 3 m high in the wadi which is otherwise very flat and at this point hardly distinguishable from the surrounding area, the "wadi-bed" consisting of several channels approximately 30–80 cm deep and 4–10 m wide. The southerly three mounds are covered with graves and enclosures. Much of the rock is not suitable for inscribing. It was visited in 1995 by the Safaitic Epigraphic Survey Programme and all the published texts it rediscovered came from the most northerly of the southern three mounds, and most were concentrated at its eastern end.

**Provenance:**
Al-Namārah, Rif Dimashq, Syria
[Latitude/Longitude: 32.88545 / 37.29163]

Al-Namārah itself is an "island" in a basin at the confluence of the Wādī al-Šawṭ and the Wādī al-Shām. The island rises to a considerable height above the wadi bed. On it's top are the ruins of a Roman fort the outlines of which, and the square north-east and south-west towers, can still be made out. However, much of the masonry has been reused to build a mediaeval mausoleum, including a lintel with an unfinished Greek inscription mentioning Marcus Aurelius (Waddington 1870: no. 2264) and stone doors. There are many Safaitic, Greek and two Latin graffiti on the slopes of the island and the banks of the wadi. In antiquity, there were small dams, cisterns, wells and diversion channels to trap the water and to lead it to nearby fields, see Macdonald 2009.

Provenance:
Al-ʾIsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]
Al-ʾIsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

Al-ʿIsawi is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

[Latitude/Longitude: 32.89645 / 37.31101]
Al-ʾĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

Provenance:
Al-ṭaswî, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]
Al-ṭaswî is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-ʾNamārāh dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

1 km d bn ḍt bn bd bn ḍt w ḡd b(t)(t) ( (){ḥ) ḍf ṣl ( {ḥ) ḍ l- ḍf ḍ l s l-m l- ḍ s r d

By Km d son of ḍt son of bd son of ḍt. And he found the writing of his brother. And he made a sister give shelter to her brother. So, O lt, [grant] security to him who ran away!

Apparatus Criticus:
(copy of 412: And he found the writing of his brother. And he made a sister give shelter to her brother. So, O lt, [grant] peace to him who ran away!)

Provenance:
Al-ʿĪsawī, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]
Al-ʿĪsawī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

Al-Taswī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

Al-Ṭisawi, Rif Dimashq, Syria

[Latitude/Longitude: 32.89645 / 37.31101]

Al-Ṭisawi is the name of a probably ancient well between two headlands on the eastern side of the Wadi Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

Commentary:
See the commentary in Macdonald, Al Muʿazzān, & Nehmé 1996: 473-476. The stone was rediscovered and photographed by the Safaitic Epigraphic Survey Programme in 1995 and the reading here is made from those photographs. It should be noted that Littmann was working from a hand copy made by one of the servants of the Princeton Expedition, and had not seen the original.

l ḫs²ʾt bn ʿs¹wd bn ʿlhm

By ḫs²ʾt son of ʿs¹wd son of ʿlhm

Provenance:
Al-ʿĪsawi, Rif Dimashq, Syria
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

Riǧm Qaʿqūl, Rif Dimashq, Syria
Latitude/Longitude: 32.9764 / 37.3136

The name "Riǧm Qaʿqūl" was applied by nineteenth-century travellers to at least four large outcrops at the southern end of the Ruḥba, to the south and south-west of the modern water tower. This helps to explain the curious fact that there is no overlapping between the "Riǧm Qaʿqūl" copies of de Vogüé, Wetzstein and Dussaud & Macler, and only in a very few cases between those of de Vogüé and Waddington who were travelling together. The probability that there were multiple cairns with this name is supported by the fact that while Waddington wrote that it was 10 minutes [ride] from al-ʿUdaysiyah to Riǧm Qaʿqūl, Dussaud & Macler say that the journey between the two took 30 minutes. In 1995, the Safaitic Epigraphic Survey Programme identified the sites visited by Wetzstein and by Dussaud & Macler but did not find those where de Vogüé and Waddington had worked. The inscriptions found at Riǧm Qaʿqūl "A" were all texts copied by Wetzstein and no one else. It is likely therefore that this is the place he regarded as "Riǧm Qaʿqūl". Note that the co ordinates given here are very approximate.

MA 1

l ṯrm bn b[n] (n) w thr w ḍḥh (l-) rdy w ḡnm nqt

By ṯrm son of (Bnn) and he was purified and he sacrificed to Rdy and gained as booty a she-camel

Apparatus Criticus:
MA: l ṯrm bn ṭḥ w bn[ y] w ḍḥh w rdy w ḡnm nqt “To ṯrm bn ṭḥ who built (married) scarified [sic “sacrificed”?] and was consequently satisfied. He gained a she-camel.”

Commentary:
The ed. pr reads the letters in a bizarre order (p. 34). The order suggested here seems more reasonable and produces better sense. On the photograph there are what look like two “n”s or possibly n(y) after the first letter of the second name. The letter before rdy is unclear even on the stone (MA p. 34) but what is visible looks like a l. In Arabic thr I Form means “become clean” in both a physical and a ritual sense (Lane 1886c) and ḡnm I Form of course means “obtain booty”. I would take nqt as an adverbial accusative “(in the form of) a she-camel”. The authors say that the letters were “scraped on a solid chalky stone with a smooth surface”. On the photograph they certainly do not look “scraped” at least in the sense we are using the term.

Provenance:
Al-Ruwaysiyd Wādī Salma or al-Asḥāqīf al-Janūbī (MA p. 33), unspecified region, unspecified country.
H4/Ruwaysiyd

References:
soon as the night was lowered" (p. 41)

water or he came to the water at night)" (p. 38) or "he put up his camels for a night

And he spent the night with some camels and came to water at Gdf. And so O Bʿls¹mn [send] dearth to whoever scratches out these inscriptions

Apparatus Criticus:

MA: ḡrm for ḡys; hyt b-­‐ bl wrd l-­‐ ḡdf "he lodged his camels for the night and came to the water (the filthy water or he came to the water at night)" (p. 38) or "he put up his camels for a night and came to water as soon as the night was lowered" (p. 41)
**Commentary:**
The edge of the stone at the point where the inscription begins has been obscured on the photograph and there may have been room for more than simply the *lām auctoris* to have been lost. It is uncertain on the photograph whether the second letter of the first name is a q or a w (cf. the w’s in line 4). There is a diagonal stroke at the top of the b of the first bn which makes it look like a k. On the photograph this looks deliberate hence the <b>. The g of *galm* has a mark like a cross-stroke within it but this is clearly accidental. The sᶜ in the name *rgsᶜ* could possibly be a z though it is more likely a sᶜ and is certainly not a m as read in the ed. pr. The expression *wrd l-ṣdf* might also be interpreted “he came to water for easy living” (cf. *Ar. jadaf* “a state of ease or plentifulness” *Lane 1159b*) although one would expect *h-ṣdf* in this context. The syntax is easier if *ṣdf* is taken as a place name cf. Ṭwādī al-Ghadaf south of Azraq (Map 1 50 000 sheet K.3353 II approximately 31° 46 N 36° 50 E according to the Official Standard Names Gazetteer). The ed. pr.’s interpretation of the statement is grammatically impossible. A 15 generation genealogy for *wṣd* is very unusual. See C 2256 for one with the same last 5 generations.

MA 10

l bdl bn dlʾ bn (n)rn——

By Bdl son of Dlʾ son of (Nrn)——

Apparatus Criticus:
MA drʿ for dlʾ; nr for (n)rn——

Commentary:
Ed. pr. says that the rock is limestone but it looks more like basalt on the photograph. The second letter of the second name looks very like a l and is quite different from the r of (n)rn. Cf. SIT 32 where the second letter of the name is a clear l and quite different from b and r in the same text. The first n of nrn is more of a large dot than a line and so the reading is not certain and the inscription clearly continues after the r of the name with a clear n.

Provenance:
Al-Ruwayshid Wādī Salma or al-ʿAshāqīf al-Janūbī (MA p. 33), unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0017846.html

Madaba Museum Saf 1

l sΣhr bn tm ḏ-ʾ l df ngy {ḥ)b(r)b(m){r}

By SΣhr son of Tm of the lineage of ḏhe escaped {ḥ)b(r)b(m){r}

Commentary:
The inscription is on a small piece of basalt which is chipped at one end. The other faces are not inscribed. Note that the "normal" Safaitic form of ḏ and ḏ are used in this text in contrast to Madaba Museum Saf 2 where ḏ is hooked and ḏ takes the form of two concentric circles, as in Hismaic. We can find no interpretation for the letters following ḏf.

Provenance:
Unknown, unspecified region, unspecified country.

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0052118.html

MDT 1

l ḫls bn ṣ¹[---]d bn ksʾt bn ṣ¹{fb} w wgm l-ʾ b-ḥ wʾ-ḥt -h wʾ-ḥt(w) ḫ wʾ-ḥn wʾ-ʾs¹ḥ wʾ-ʾs¹wdn

By ḫls son of ṣ¹[---]d son of ṣ¹fb and he grieved for his father and for his sister and for Hrt and for Ḥn and for ṣ¹ḥ and for ṣ¹wdn

Apparatus Criticus:
MDT 1: l ḫls bn ṣ¹[---]d bn ksʾt bn ṣ¹{fb} w wgm l-ʾ b-ḥ wʾ-ḥt -h wʾ-ḥt(w) ḫ wʾ-ḥn wʾ-ʾbḥ wʾ-ʾs¹wdn

Commentary:
There is a chip obscuring most of the second name. Only the beginning of the ṣ¹ is visible the second letter has been destroyed and only part of the third letter remains. The third letter of the fourth name is more
similar to the b's of the text than the s¹'s as suggested by the author's reading. It is also possible that the curve is an unfinished g or even l. The second letter of the first name after wgm might be a f but it would be a different shape from the other example of that letter in the text and it seems likely that the "middle stroke" is incidental and the letter should be read r. The second letter of the word after the fifth l- is more like a s¹ and the third letter could be a k rather than an h.

Provenance:
Mafrak area, unspecified region, Jordan

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0017860.html

---

**MDT 2**

\[l \text{lh} bn (\text{s})(\text{t})(\text{n}) bn ms¹\]

By \(\text{lh}\) son of \(\text{tn}\) son of \(\text{ms}^1\)

**Apparatus Criticus:**

MDT 2: \(l \text{lh} bn (k)tn bn ms¹[k]\) p. 113: lt’n for ktn.

**Commentary:**
The reading is very doubtful after the first name. The author has a dot for the first n but it is not legible on the photograph. The first letter of the second name appears to have a loop at one end and might be a s or possibly a t. The crossbar of the following t could be part of a cartouche and it is possible the letter should be read as a n. The next letter is rather far away from the preceding one. There seems to be no justification from either the photograph or copy to restore a k in the third name.

Provenance:
Mafrak area, unspecified region, Jordan
[Latitude/Longitude: 32.190827 / 37.123804]

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0017861.html

---

**MDT 3**

\[l \text{h'sd} bn s\text{fw}n bn 's¹ bn '(\text{l})\text{fl(h)}\]

By H's^1 d son of s\text{fw}n son of 's¹ (son of) 'l\text{flh}

**Apparatus Criticus:**

MDT 3: \(l h's^1 d bn s'wfn bn 's¹ bn 'l'fh\)

**Commentary:**
The published photograph is not adequate to check the readings of all the letters. The n of the second bn has been left out in the copy. The first l of the fourth name is not legible in the photograph and in the copy it is drawn as a straight line without a hook. The second l appears to have a hook which is not drawn in the copy. The dotted n's suggest that the script might be Hismaic and it is possible the last letter should be read as a t and the name 'l'fh read or possibly 'l'ht.

Provenance:
Mafrak area, unspecified region, Jordan
[Latitude/Longitude: 32.190827 / 37.123804]

References:
MDT 4

\[l \text{s}^1 \text{hm} \text{bn} \text{bn}^\prime \text{d} \text{b(n)} \text{s}^1 \text{hm} (w) \{s^2\}rq \text{b} \cdot \text{h} \cdot \text{m}^\prime(z)jy\] ----

By S¹hm son of Bnʿ {son of} S¹hm {and} {he migrated to the inner desert} with the {goats} ----

**Apparatus Criticus:**

MDT 4: \[l \text{s}^1 \text{hm} \text{bn} \quad \text{d}^l \text{h} \cdot \text{m}^z \text{f} \text{rq} \text{b} \cdot \text{h} \cdot \text{m}^\prime(z) \text{b} \cdot \text{h} \cdot \text{m}^\prime[z] \text{b} \cdot \text{h} \cdot \text{m}^\prime[y] \text{t} \text{f} \text{h} \text{lt} \text{s}^1 \text{lm} \quad \text{haḍæ l-makæn aṣ-ṣulb fa raqaba al-mi'zæ bi-l-} \text{t} \text{f} \text{h} \text{lt} \] "haḍæ l-makæn aṣ-ṣulb fa raqaba al-mi'zæ bi-l-"t fa yæ allæt"

**Commentary:**

The inscription is written around the edge of the rock which is very damaged. The third ‘ in the author’s transliteration is a mistake for y which is clear in the copy. The letters read by the author after the second z probably belong to another text which starts below the third m of MDT 4. MDT 4 might continue near the edge of the rock but it is difficult to distinguish any letters because of the abrasions on the rock.

MDT 7

[----]----bn tm bn ḥtl bn [----]

---- son of Tm son of Ḥl son of ----

Apparatus Criticus:
MDT 7: read with ḥ from MDT 8 and part of MDT 7.1 ----bn tm bn ḥtl bn ḡwn b

Commentary:
It seems most likely that this text does not continue with the adjacent ḥ but probably on another face of the rock or on a piece of rock which has broken off. The dotted n’s and possibly the shape of the ḥ suggest that the text might be Hismaic.

Provenance:
Mafrāq, unspecified region, Jordan
[Latitude/Longitude: 32.190827 / 37.123804]

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0017867.html

MDT 7.1

[----]----({g}w]nb

---({g}w]nb

Apparatus Criticus:
MDT 7: read as last part of MDT 7

Commentary:
There are traces of letters not read in the edition before the letter read as a g and then the rock is broken. It seems most likely that these letters are not part of MDT 7 but part of another text the beginning of which is lost. It is possible that the letter read as a g is an ‘.

Provenance:
Mafraq area, unspecified region, Jordan
[Latitude/Longitude: 32.190827 / 37.123804]

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0017865.html

MDT 8
l til bn ‘bn[----]

By Tll son of ‘bn----

Apparatus Criticus:
MDT 8: l ḥll bn ‘bn

Commentary:
The ḥ read here is read in the edition as part of MDT 7 but the position and stance of the letter suggests that it belongs to this text which continues either on another face of the rock or on a piece of the rock that has broken off. The shape and stance of the second letter is more like a t than a h. It is possible that the text is Hismaic as the n’s are dots and the h is typical of that script.

Provenance:
Mafraq area, unspecified region, Jordan
[Latitude/Longitude: 32.190827 / 37.123804]

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0017868.html

MDT 9
[----]m w n’rt w ng{ʿ}

---m w n’rt w ng{ʿ}

Apparatus Criticus:
MDT 9: ---- mwng bnt ‘rn

Commentary:
The above is read as Hismaic. It is difficult to see from the photograph the second n read by MDT as there appears to be only the crossbar of the following t in the arms of the r. There appears to be a n the shape of a dot after the second w. The final letter is read as an ‘ as the arms appear to be enclosed although this is not entirely certain from the photograph. It is difficult to justify the reading of a further n at the end although there is a small chip which might be a letter.

Provenance:
Mafraq area, unspecified region, Jordan
[Latitude/Longitude: 32.190827 / 37.123804]

References:

---

MDT 10

[...]-wt r(?)]-y

---t and (he pastured)

Apparatus Criticus:
MDT 10.1 wrn wt--- "By wrn wt---

Commentary:
MDT read the text in the opposite direction. After the w there are two slightly dotted chips and it is possible that one of them should be read as a n but equally they could both be incidental. The letter after the r has slight abrasions over the top and it is possible that it should be read as a w but it is slightly smaller than the first w. The letter read as a l by MDT has a slight fork at the edge and it seems likely that it is the beginning of the loop of a y that has broken off.

Provenance:
Mafraq area, unspecified region, Jordan
[Latitude/Longitude: 32.190827 / 37.123804]

MISS.A 1

---[l/q] b kl ( > y/g/r ) n ( > g/r/h/" ) r(l > d/z ) ( > s¹/d ) d ( > q ) l ( h > r ) y m n ( > ' ) ' ( > d/" ) r ( > t ) k z s² t h d q g t s² f g b y t
--- B K L Y ġ R N ġ R H ’ R L D Z S¹ Ğ D Q L H R Y M N ’ ’ ’ D R Ṭ K Z S¹ T H D Q D Ġ T S² F G H Y T

Commentary:
The fourth surviving letter l seems to have been altered to read first y, then ṣ; and then r. Similarly, the following letter, n, seems to have been transformed first into a q, then a r then a h and finally a a’. This is succeeded by a r and the next letter, l seems to have been modified to a d and then a z; and the r + l were then altered to a a and finally a d. The following d has been made into a q, the following l into a h and then a r. This is followed by ym and then n which has been transformed into a a’, and ‘ which has been transformed into a d and then with a t carved over it. This is followed by a r which has been made into a t. After this the remaining letters appear to have been left as they were carved. Altogether, the original contained 29 letters comprising all the letters of the Safaitic alphabet except q and w. It is therefore not an abecedary as such, but may have been an exercise. One might speculate that the alterations to the letters in the first half were made by someone trying to show the similarity in shape between various letters. See Macdonald, Al Mu’azzin & Nehmé 1996: 439-441.

l ‘bys¹ bn ṭ r bn dd bn gd
By ‘bys¹ son of ṭ son of Dd son of Gd

Commentary:
The s¹ is written next to the y and the b.

Provenance:
Mithnayat Rāǧil, Al-Mafraq Province, Jordan
Mithnayat Rajil

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024376.html

MKMR 5

l m{|l{|l}} bn y{ṭ}t ----
By (M‘ll) son of Y{ṭ}t ----

Commentary:
A hammered dot has been added to one end of the second l. The next letter might originally have been a l to which a hammered dot has been added at either end or a y to which one hammered dot has been added. If the latter is the case then the name would read m‘ly. There is a further letter to the left of the t which might be a h and it is possible the inscription continues under an incrustation on the rock.

Provenance:
Mithnayat Rāǧil, Al-Mafraq Province, Jordan
Mithnayat Rajil

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024377.html

MKMR 6

l m{|l}t bn {{’}|dm bn s²dy
By (M‘lt) son of ’dm son of S² dy

Commentary:
Some of the letters have been joined using lines. The initial l is attached to the m and a hammered line which obscures the following ‘ attaches the m to the l. One arm of the first b has been extended and attached to the n. One prong of the ‘ of the second name has been hammered over and the letter has been joined to the following d by further hammering. A horizontal line seems to have been attached to the second n in an attempt to join it to the previous d and there is hammering attaching it to the following s². There is a cartouche surrounding the inscription.

Provenance:
MKMR 7

l’dy bn s’lm bn {’y}

By ’dy son of S’lm son of {’y}

**Commentary:**
It is possible the final letter is a l as the dotted loop is not very distinct. The arms of both the b’s have been extended to join the following n’s.

**Provenance:**

**MKMR 91**

lʾṣyt bn s²ʾnʾ

By Qṣyt son of S²ʾnʾ

**Provenance:**
Mithnayat RāğiɅ, Al-Mafraq Province, Jordan
Mithnayat Rajil

**URL:** http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024466.html
**MKMR 92**

$l s(l)l bn db(n)$

By $sll$ son of $Dbn$

**Commentary:**
It is possible the first name should be read $s^d$ or $syl$ but it seems most likely that the hammered dot after the $s$ and the additional hammering to the last two letters are crude changes to join the letters. There is a line slightly to the side of the second $b$ which might be a $n$ or possibly part of an unfinished letter.

**Provenance:**
Mithnayat Rāǧil, Al-Mafraq Province, Jordan

**URL:** [http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024467.html](http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024467.html)

---

**MKMR 93**

$l m(b)q nt$

By $Mbqnt$

**Commentary:**
The reading is very doubtful. The third letter might be a $s^1$ and the fourth letter has only one line. There is a small scratched camel near the inscription.

**Provenance:**
Mithnayat Rāǧil, Al-Mafraq Province, Jordan

**URL:** [http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024468.html](http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024468.html)

---

**MKMR 93.1**

$---f(l)fwl$

$---f(l)fwl$

**Commentary:**
There are some possible letters to the left of the group of text MKMR 89-93. It is possible they should be read as $---gwt$ where the $g$ is two parallel lines.

**Provenance:**
Mithnayat Rāǧil, Al-Mafraq Province, Jordan

**URL:** [http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024469.html](http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024469.html)

---

**MKMR 94**

$l gbl bn y^t$

By $Gbl$ son of $Y^t$

**Commentary:**
There is a hammered shape like a Safaitic $h$ after the $^t$. There is a cartouche surrounding this inscription and MKMR 95.

**Provenance:**
Mithnayat Rāǧil, Al-Mafraq Province, Jordan
Mithnayat Rajil

**URL:** http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_00244470.html

---

**MKMR 95**

*l ngs² bn s¹by*

By Ngs² son of S¹by

**Commentary:**
The initial l has a line attaching it to the second b of MKMR 94. It also has an arm at one end. The g has some hammering on one side which might be an attempt at joining the letter to the previous one. There is a cartouche surrounding this inscription and MKMR 94.

**Provenance:**
Mithnayat Rāǧil, Al-Mafraq Province, Jordan
Mithnayat Rajil

**URL:** http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_00244471.html

---

*l qdy bn sỳh bn ´lg*

By Qdy son of Sỳh son of ´lg

**Commentary:**
There is a cartouche surrounding the inscription. The prongs of the fourth letter are damaged by hammering and both b’s have been joined to the following n’s.
Provenance:
Mithnayat Rāġil, Al-Mafraq Province, Jordan
Mithnayat Rajil

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024474.html

---

MKMR 98

I s¹ḫ(r) bn 'm
By {s¹hr} son of 'm

Commentary:
The letters are crudely hammered. The arms of the r are rather doubtful.

Provenance:
Mithnayat Rāģil, Al-Mafraq Province, Jordan
Mithnayat Rajil

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024475.html

---

MKMR 99

I h(r)
By {Hr}

Commentary:
It is rather doubtful whether this is an inscription. The arms of the last letter are short. It looks as though an attempt has been made to attach the l to the prong of the h and then to attach the h to the r by the addition of a short line.

Provenance:
Mithnayat Rāģil, Al-Mafraq Province, Jordan
Mithnayat Rajil

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024476.html

---

MKMR 100

I {'s¹l} bn wdn̪n
By {'s¹l} son of Wdn̪n

Commentary:
It is possible the second letter should be read as a ḫ. There are some traces of a hammered cartouche surrounding the inscription and the second letter has been joined to the following s¹.

Provenance:
Mithnayat Rāģil, Al-Mafraq Province, Jordan
Mithnayat Rajil

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024477.html

---

MKMR 101

I {'h}ls bn hdrs¹
By {'hls} son of Hdrs¹

Commentary:
Parts of the second letter have been hammered over and a line has been added between two of the arms. The space between the arms of the s³ have been filled in. The inscription is surrounded by a cartouche.

**Provenance:**
Mithnayat Rāǧil, Al-Mafraq Province, Jordan
Mithnayat Rajil

**URL:** [http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024478.html](http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024478.html)

**MKMR 102**

*l șw{m}*

By Șwm

**Commentary:**
The final letter is damaged by hammering. The inscription is surrounded by a cartouche which is attached to the cartouche around MKMR 101.

**Provenance:**

32° 10' 55.71" N 39° 07' 50.23" A place some 3 km south-west of Al-Šafawi where the road to Al-Azraq crosses the the Wādī al-Šafawi, to the north of the road.

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024336.html

MKWS 3
Provenance: Wadi Safawi, Al-Mafraq Province, Jordan
[Latitude/Longitude: 32.182141666666666 / 39.130619444444444]
32° 10' 55.71" N 39° 07' 50.23" A place some 3 km south-west of Al-Ṣafawi where the road to Al-Azraq crosses the the Wādī al-Ṣafawi, to the north of the road.

MKWS 4

lʾṣg bn ʿs²y

By ʾṣg son of ʿs²y

Commentary:
The field notes suggest the last letter is a y.

Provenance: Wadi Safawi, Al-Mafraq Province, Jordan
[Latitude/Longitude: 32.182141666666666 / 39.130619444444444]
32° 10' 55.71" N 39° 07' 50.23" A place some 3 km south-west of Al-Ṣafawi where the road to Al-Azraq crosses the the Wādī al-Ṣafawi, to the north of the road.

MKWS 5

l ʾṣly bn s²rk bn ḥlʾ l bn ʾshwn

By ʾṣly son of ʾṣrk son of ḥlʾ l son of ʾshwn

Provenance: Wadi Safawi, Al-Mafraq Province, Jordan
[Latitude/Longitude: 32.182141666666666 / 39.130619444444444]
32° 10' 55.71" N 39° 07' 50.23" A place some 3 km south-west of Al-Ṣafawi where the road to Al-Azraq crosses the the Wādī al-Ṣafawi, to the north of the road.

MKWS 6

lʾṣf y bn ʾṣʾd bn s²rk bn ṭḥ ʾqmr ṭ kmn mʾ- ʾṭbr

By ʾṣf y son of ʾṣʾd son of ʾṣrk son of ṭḥ of the lineage of ṭqmr and he lay in wait with his paternal uncle ṭ mʾ for ṭbr

Commentary:
A line has been hammered across the prong of the h of ṭmʾ. After the second ṭ the author wrote a line with a small prong and then seems to have lightly scratched over it to change it into the third l. MKWS 8 is written by ṭl bn s²rk bn ṭḥ who would presumably be the paternal uncle referred to. Hava: kamana "to lay hid"; Syr. kemen "lie in wait"; Aph. atbar "to rout" "for a rout" at the end?

Provenance: Wadi Safawi, Al-Mafraq Province, Jordan
[Latitude/Longitude: 32.182141666666666 / 39.130619444444444]
32° 10' 55.71" N 39° 07' 50.23" A place some 3 km south-west of Al-Ṣafawi where the road to Al-Azraq crosses the the Wādī al-Ṣafawi, to the north of the road.

Mr.A 6

\( l \ 's^3 \ hr \ bn \ 'q \ bn \ 'q \ bn \ 'g\yt \ w \ 's^2 \ ry \ m \ - \ '{q} \ bn \ '{h} \ h \ 'dmyt \ w \ '{w}r \ l \ '{y}\{'w}\r \)

By \('s^3 \ hr \ son \ of \ 'q \ son \ of \ 'g\yt \) and he bought from \('q \ son \ of \ (h) \ brother \ the \ drawing \ and \ (blindness) \ to \ whoever \ (scratches \ [it] \ out) \)

Commentary:
Mr.A 6 to 8 are on the same stone. This text is written in large incised letters under the drawing, up the right hand edge of the stone and along the right side of the top. In the sentence \('s^2 \ ry \ m \ - \ '{q} \ bn \ '{h} \ h \ 'dmyt \) it may seem unlikely that he bought the drawing from his nephew. Littmann suggested that in LP 1166 \( dmyt \) might mean “a mare from Dūmā”, and certainly Ahmad Al-Jallad (following C.J. Robin) has suggested that in some inscriptions \( h-dmyt \) could be the nisbah for a man from the oasis of Dūmā (2015: 310). The problem with taking \( dmyt \) as “the mare from Dūmā” here is that the horse seems clearly to be a stallion, and unless one takes \( dmyt \) as referring to the animal being hunted — the sex of which is not shown — which seems unlikely, one has to fall back on the normal meaning of \( dmyt \) “drawing”, until another solution can be proposed.

Ms 50

$l\ k\hl\ b\n\ n\q’n\ l\ b\n\ s^1\r\ b\n\ n\zr\ w\ h\ l\t\ q\lt\ l\ d\ y\ ’\w[r]\ h\ h\h\t$

By Khl son Qnʾl son of S¹r son of Nzr and O Ṭlt [grant] relief from illness and O Lt [inFLICT] ejection from the grave on whoever {scratches out} the carving

Apparatus Criticus:
NAID I p. 53:

Commentary:
The the author tried to write the q of s²qm immediately after the s¹ and then realising that there was insufficient space left it incomplete and wrote the q again further to the left. There appears to be a l between the n and q of nqʾt but it is more shallowly scratched than the rest of the letters. The author appears to have omitted the r in yʾwr.

Provenance:
Unspecified site, unspecified region, unspecified country.
Wadi Ḥaḍād

By Sʿkrn son of ḏrmʿl and found the inscription of ---- ḏ rṣlk f----

Commentary:
The photograph is inadequate to read the inscription with certainty.

Provenance:
Wādī al-Ḥashād, unspecified region, unspecified country.
[Latitude/Longitude: 32.511956 / 37.308245]

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0030149.html

Ms 67
klmlk bn ḏrmʿl bn <<>>mlk
klmlk son of ḏrmʿl son of mlk

Apparatus Criticus:
NAID p. 61: There are further lightly scratched letters. A further sʿ between the k/lam auctoritis an l between the l and k of mlk a b between the k and b of bn and an n after the first bn. The author has made two errors the g of ḏrmʿl has a tail and there is a l before the m of the third name which is probably the result of metathesis i.e. the author started to write lmk instead of mlk but realised his mistake in time to insert a second l in the correct position.

Commentary:
A k has been added to the initial l to form a palindrome of the author’s name.

Provenance:
Wādī al-Ḥashād, unspecified region, unspecified country.
[Latitude/Longitude: 32.511956 / 37.308245]

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0030150.html
Ms 68 69

lʾqr bn rmyn bn tmʾl (l{(b)}){(n)}) dl w rʾy

By ʾqr son of Rmyn son of Tmʾl son of Dl and he pastured

Apparatus Criticus:
Ms 69: l fdl w rʾy - By Fdl and he pastured

Commentary:
The third b and n are written as a monogram. The editor reads Ms 68 and 69 as separate texts but suggests that maybe they should be read together. He points out that the above reading does not account for the line attached to the circle of the bn-monogram. On the other hand if it is a separate text it is difficult to explain why the initial l is so short.

Provenance:
Wadi al-Ḥashād, unspecified region, unspecified country.

\[ l qdm bn ghm w wrd 'dyt h- 'wdy bn ṣr(q) \]

By Qdm son of Ghm and he came to the pool of stagnant water of H-*wdy* bn ṣr. (there)

**Commentary:**
The last letter is not completely clear on the photograph but looks more like a q than a d. For 'dyt cf. Ar. adāh "a pool of stagnant water" (Groom Dictionary of Arabic Topography 32). In view of the fact that it is followed by bn ṣr it is difficult to see how h-*wdy* could mean "the Awādiete". "The Awādiete Ibn ṣr" would normally be expressed as "bn ṣr h-*wdy*. On the other hand H-*wdy* is quite a common PN and it seems possible that h-*wdy* could also be used in this way. In what sense this pool was the H-*wdy* bn ṣr’s is not clear. It is unlikely to have been his personal private property and it is more likely that the pool was named after him because of some event there in which he was involved.

**Provenance:**

National Museum of Qatar 1

l Mnʾt bn {Ḥbrt} bn ṣm ṣʾl bn gm({ḥ}){ṣʾm} dʾʾl ṣy jdw ṣ Ḥy ḫ ḫsʾʾ ḫnm

By Mnʾt son of {Ḥbrt} son of ṣʾl son of {Ḥmḥ} son of {Ḡsʾm} of the lineage of Ḥy and he had been robbed and so ḫsʾʾ ḫnm [grant] booty

Commentary:
The script is mixed between Safaitic (see the form of ḫ and the r of ḫsʾʾ) and Hismaic (see the forms of Ḫ and ḫ). The word ʿdy seems to have occurred only once before as a verb in SSWS 80 w mr bʾʾ ḫ ḫy ḫʾ ṳ ḫbl ḫʾʾt. According to Lane (1977c), ʿuḍiya ʿalay-ḥi can mean "he had his property stolen" and while the phrase lacks the preposition here, it could have a similar meaning, which could be why he was praying for "booty".

Provenance:
Unspecified site, unspecified region, unspecified country.

**NRE.B 1**

\[l\text{wyb} (b)\{n\} t\{q\} w\text{mrḥ}\]

By Wyb \{son of\} \{Tq\} and he rejoiced greatly

**Commentary:**
Carefully direct hammered. The \(b\) and \(n\) of \(bn\) are joined. For the meaning of \(mrḥ\) compare Classical Arabic mariḥa "he was very joyful and glad" (Lane 2704a).

**Provenance:**
East of the "Roman road" from al-Namārah to the Ruḥbah, Rif Dimashq, Syria
This is the only site along this track at which we found published inscriptions. Those we sampled here are from the group recorded by Dusaud & Macler (1901) between the debouchment of Wādī Gharz and al-Namārah (C 2265-2275, but note that 3265-3281 were also recorded on this journey). The "Roman road" would have been the most obvious and direct route between these two points, and the c. 4.5 km from where the road ends on the edge of the Ruḥbah to this site would have been the normal distance covered in the one hour it took them to get from the mouth of Wādī Gharz to the place where they copied the inscriptions. It is therefore possible that they came down this road. The only problem is that they say that the site is on the "right" of the track, whereas coming from the north it would be on the left. Either this is a simple slip, or they were riding parallel, and to the east, of the road. Two of the texts they recorded here (C 2274 and 2275) were also copied by Wetzstein, Waddington and Dunand. The last presumably supplied the provenance quoted in C "on the east side of the Roman road between al-Namārah and the Ruḥbah", since
Corpus of Safaitic inscriptions  

the Dunands must have been in the area at about the time Poidebard identified the road, which had first been noted by von Oppenheim (Poidebard 1928: 118–120, fig.1). Wetzstein gave the provenance as "on the way between al-'Udaysiyah and al-Namārah", to which C adds "not far from al-Namārah". It is therefore probable that Wetzstein would not have been travelling on the "Roman road" but on a track to the east of it, somewhere between it and the modern route between Zalaf and the Ruḥbāb water tower. This site is near where he would have had to turn south-west towards al-Namārah. The other texts Wetzstein copied on this journey are C 3223–3248, of which C 3244–3248 were recorded at Ishbikkat al-Namārah since they are identified with copies made at this place by Dussaud & Mascler (1901: 88).

**NRW.D 1**

{l s¹krn bn qdm ʾl ʾsʾb w ʾly h- ʾfs¹ l-frs¹ grmʾl f h lt bjft

By S¹krn son of Qdm of the lineage of Sʾb and he raised the memorials to Cavalryman Grmʾl and so O Lt [may he have] a successor
Commentary:
This text is incised and runs boustrophedon. The author omitted the s' of frs I but squeezed it in between the r and the next letter. This small site (NRW.D) seems to have been the grave or some form of memorial to frs I grm l since several texts there mention him. This would be the first time a "double name" of this sort had been found in Safaitic, and it is more likely that frs I here is a title (i.e. "cavalryman") thus "Cavalryman Grn l". While, in this case, one might expect either "grm l h-frs I" or "h-frs I grm l", compare mlk 'grf in Is.H 763 (=LP 1064+1065) as opposed to h-mlk grf in KRS 1023, 1039 and Al-Namârah.H 91.

Provenance:
Unnamed site west of the "Roman road" from al-Namârah to the Ruḥbâh. Clearly the burial place of frs I grm l, unspecified region, unspecified country.

NSR 9

\[ l\ nhm\ bn\ nmr\ bn\ s^{1}\ (n)m\ w\ bny\ ‘l\ gh(\ f)\ (\ f)’rgm \]

By Nhm son of Nmr son of S^{1}\ (n)m and he built for Gh(\ f) and so he built a cairn

**Apparatus Criticus:**
NSR: ‘lmn for s^{1}\ (n)m and ghs^{2}\ h\ rgm for g+ h + l {f} (\ f)’rgm. JAŚ 51: s^{1}\ nmm for s^{1}\ (n)m; gns^{2}\ bn\ glm for g+ h + l {f} (\ f) (\ f)’rgm.

**Commentary:**
The g’s in this text are circles with an additional curve attached so that they look like unfinished w’s. The additional curve in the second g might have been added in order to join the letter to the following m. The additional curve in the first g however does not attach the letter to another one. The h of the name after ‘l is written above the the line of the text and was presumably added later by the inscriber of the text. Below it is a horizontal line which might have been the start of his initial attempt to add the letter which he abandonded because he thought there was not room to complete it.

**Provenance:**
Corpus of Safaitic inscriptions

NSR 11 (JaS 68.1)

l d(g){g} (b){n} “bd bn dgg bn yny bn bdd bn ṣd----{t}----- (w) ḫyṭ

By (Dgg) {son of} “bd son of Dgg son of Yny son of Ṣd----{t}----- (and) he journeyed without stopping

Apparatus Criticus:
NSR: dgg bn for d(g){g} (b){n} and bn ṣd w ḫyṭ for bn ṣd----{t}---- (w) ḫyṭ. JaS 68.1: dwm for d(g){g} and bn ṣdḥ bn yn’m ḫyṭ for bn ṣd----{t}---- (w) ḫyṭ.
Commentary:
Only parts of the reading can be checked from the photograph which is very dark and virtually illegible. The uncertainties in the SD reading reflect the quality of the photograph rather than what it is probably possible to read from the stone. The form of some of the letters in the last part of the text in the NSR and JaS copies suggest that their readings are not correct. In NSR the d in dṯ is of a radically different form to the other d’s in the text and in JaS the h of šdh is larger and more square than the other ḥ of the text. JaS is correct in reading further letters on the stone see NSR 11.2 and 11.3.

Provenance:
ʿArʿar area, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010336.html

NSR 11.2

yth----
yḥ----

Apparatus Criticus:
NSR: The letters are not read by NSR although they are clear on the photograph. JaS 68.2: łyḥb "By yḥb".

Commentary:
The photograph is bad but the reading of y and ḥ is clear. The reading of l and b by JaS are unlikely but cannot be checked.

Provenance:
ʿArʿar area, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010523.html

NSR 11.3

{ʿ}ḥhr

{ḥhr}

Apparatus Criticus:
NSR: The text is not read in NSR. JaS 68.3: 1ḏḥ ṣbd "By Dḥṣ. He has stayed [here]".

Commentary:
The interpretation of these letters is doubtful. The sign read as {ʿ} is interpreted by JaS as a sun with rays but it is more likely that the “rays” are abrasions made by direct hammering. The last first three letters are directly hammered and the last three are incised on to the rock. It is doubtful that the signs read as ḷ ḡ and ḥ by JaS are letters.

Provenance:
ʿArʿar area, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010527.html
NSR 12

l’rb bn ’bd bn ’rb bn M’tm bn w’l bn ’s²g bn Rhs² bn Zhfy d- ’lfhr w mty

By ’rb son of ’bd son of ’rb son of M’tm son of W’l son of ’s²g son of Rhs² son of Zhfy of the lineage of Fhr and he journeyed quickly

Apparatus Criticus:
NSR: s²hr for fhr.

Commentary:
It is more likely that the first letter of the lineal name should be read s² rather than f as the letter does not have as many indentations as the s² of ’s²g.

Provenance:
‘Ar’ar area, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010337.html

l mnm bn ḡnm bn mn’m w q̧ṣṣ ‘r {ʾ}l ybgỵ ḡwt dgnt

By Mn’m son of ḡnm son of Mn’m and the chief of the ‘l Ybgỵ took revenge on the ḡwt whilst they remained

Apparatus Criticus:
NSR: ‘rṣ---ḥwtl--- for ‘r {ʾ}l ybgỵ ḡwt dgnt. HST p. 9: w q̧ṣṣ ‘rṣ?---ḥwtl for the last part. JaS 88: w q̧ṣṣ ‘rṣly bfyḥ ḡwt s’gnt “And ‘r has narrated deceiving about the abundance of herbage. And Lt imprisonment”. JMAA III p.113: read as JaS 88. H unp.: or ---ḥwtl--- for the last part.

Commentary:
The twenty third letter has been read by previous editors as ʿṣ. It is however clear from the photograph that the original letter was an ‘ and that the circle was added later. If it was added to change the letter into a ʿṣ then it was a strange way to make the alteration as a more usual form of the letter could have been produced by closing one of the forks of the ‘. It is possible the circle is an ‘ which was missed out and added later or as has been read here that it is extraneous to the text. There are other letters written next to the letters of the text that are clearly not part of the text: a b written next to the m of the first name; two slightly wavy lines next to the n of ḡnm; two m’s in which the outlines are incomplete on either side of the sixteenth letter; possibly an incomplete ‘ next to the q and the first ṣ of q̧ṣṣ; a q with a hooked line attached next to the l of ‘l and a n next to the second ḡ. Some of the letters have been embelished the circles of the y’s have been hammered in and the lines of the second t have been given hooks turning it into a swastika shape. There are also incised lines on the surface of a lighter patina some of which are wusm. For ‘r cf. Arabic ‘ayr - “lord chief” and for dgnt cf. Arabic dajana bi-l-makān - “he remained dwelt in the place”. The lineal name Ybgỵ is new although it is attested as a personal name in WH 231.

Provenance:
On the way to GhadIr Budayna, unspecified region, unspecified country.

NSR 25

l bkr bn ġṯ bn nḏ(b) w dtʿ (b)n(h)

By Bkr son of ġṯ son of (Nḏ) and he spent the season of the later rains (b)n (h)

Apparatus Criticus:
NSR: s²ṯ for nḏ and bns¹ for bnh. w dtʿ bns¹ “wa irtabaʿa bi-ṅs”. Nṅs is either the name of a place or a period of time. H unp.: s² cannot be read in the second name and the last letter of the name is b. Read bnh for bns¹ at the end.

Commentary:
It is difficult to be certain of the distinguishing features of the b’s and r’s of the text although the former seem to be more rounded. The interpretation of the end of the text is uncertain. What has been read as (h) at the end is of a light patina than the other letters of the text and it is possible that it is a later addition and the end should read bn.

Provenance:
Corpus of Safaitic inscriptions

In Ghadhr Budayna on the slopes of the nearby hillside of Ruṣayfa (?), unspecified region, unspecified country.

References:

NSR 26.1

l ʾys¹ b----lm w s²rt m- bʾs¹

By 'ys¹ (son of) Lm and [grant] security and protection from misfortune / illness

Apparatus Criticus:
NSR: The text is read as two inscriptions: NSR 26.2: l ʾys¹ bn -- and NSR 26.1: l mnwf bn tm bn 's¹. H unp.: l ʾys¹ b[n]----s[ ]lm w (g)rt or (s)[ ]b]l m bʾs sy??.

Commentary:
It is unlikely that the letters hṣy are to be read at the end as suggested by H because of their position on the rock. If they were a continuation there is no apparent reason why the inscriber could not have continued after the s¹ of bʾs¹. It is possible they should be read after sʳt and were written to the side because they were originally left out. Equally they might be a demonstration or practice showing the difference between a y and a ṣ and a h and a ṣ.

Provenance:
In Ghadhr Budayna on the slopes of the nearby hillside of Ruṣayfa (?), unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010357.html

NSR 31.2

Provenance:
In Ghadr Budayna on the slopes of the nearby hillside of Ruṣayfa (?), unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010530.html

NSR 32

\( l \ nb{s¹} \ bn \ t(q)lt \)

By \( \{nbs²\} \) son of \( \{Tq\}lt \)

Apparatus Criticus:
NSR: \( l \ nbs² \ bn \ tylt \) H unp.: \( nb\{s²\} \) for \( nbs² \)

Commentary:
The third letter is two lines joined together at one end with very little space between the srms. The vertical slightly squiggly line which was read as \( s² \) by NSR and H does not seem to be as definite as the rest. The second letter of the second name has a downward stroke which is not as long as the other one and which is partly covered by a chip. There is possibly an \( s¹ \) in a lighter patina above the first b.

Provenance:
In Ghadr Budayna on the slopes of the nearby hillside of Ruṣayfa (?), unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010367.html

NSR 33

\( l \ ‘m(r) \ bn \ m(r)n \ nb \ m(r)n \ w \ hîl \)

By \( ‘m(r) \) son of \( \{Mrn\} \) son of \( \{Mrn\} \) and he stopped [there]

Apparatus Criticus:
NSR: ‘mr for ‘m(r) and \( mġn \) for the second and third names.

Commentary:
The first r is partially covered by subsequent hammer marks. There is a dot after the r of the second name which is a different colour and might be part of later damage. The second letter of the third name might be a \( g \) as in NSR but the upper part of the zig-zag is a lighter colour. There is no lower arm to the letter.

Provenance:
In Ghadr Budayna on the slopes of the nearby hillside of Ruṣayfa (?), unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010368.html
Corpus of Safaitic inscriptions

NSR 34.1

l ḫbn bn ḫlf bn ḫlf [b][n] {ṣ²}g’ <w> dt’ w ng’ f gls¹ w wgm ‘l- s¹’d

By ḫbn son of ḫlf son of ḫlf {son of} {ṣ²}g’ {and} he spent the season of the later rains and he pastured and camped and grieved for ‘sd

Apparatus Criticus:
NSR: bn fgʾ w dt’ for [b][n] {ṣ²}g’ <w> dt’. H unpub.: {ṣ²}g’ for fgʾ and {w} dt’ for w dt’.

Commentary:
The third bn is damaged by hammering and the lines of the {ṣ²} are of varying widths and techniques. The author has written a g rather than w before dt’.

Provenance:
In Ghadhr Budayna on the slopes of the nearby hillside of Ruṣayfa (?), unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010369.html

NSR 34.2

l r(ḍ) bn s¹lm

By (ṛḍ) son of S¹lm

Apparatus Criticus:
NSR: ḥḍ for r(ḍ). H unpub.: possibly bdl for ḥḍ

Commentary:
There are two lines after the r of the first name and there is short dash protruding from the first one. It is not as deep as the other lines of the letters of the text but it might be intentional and might be either the cross-bar of a d as suggested by NSR or the dash of a d as suggested by H. There is a line and a circle beyond the end of the text which might be a l and a g or a wasm.

Provenance:
In Ghadhr Budayna on the slopes of the nearby hillside of Ruṣayfa (?), unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010370.html

NSR 35

l s¹’d

By S¹’d

Provenance:
In Ghadhr Budayna on the slopes of the nearby hillside of Ruṣayfa (?), unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010371.html

NSR 36

{l{s¹}ʿd bn ----

By {s¹}ʿd son of ----

Apparatus Criticus:
NSR: ls¹d bn --

Commentary:
It is likely this is practice text or written by someone who was unfamiliar with the alphabet. There is a dot between the first and second letter but it is probably a stray hammer mark. The s¹ is in the shape of a V facing vertically in which the two lines are incompetently joined. The d seems to have been formed by inscribing a vertical and a horizontal stroke first which have then been clumsily joined together to form a loop. There are three hammered dots below the bn and then some larger hammered marks which were probably an attempt to continue the text.

Provenance:
In Ghadr Budayna on the slopes of the nearby hillside of Ruṣayfa (?), unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010372.html

NSR 37

----.{b}d bn (ė)ng bn ----hg

----.{b}d son of (Zng) son of ----hg

Apparatus Criticus:
NSR: ls¹d bn žng bn nhg. H unp.: possibly read s¹d for ʿbd.

Commentary:
The ʿ is close to the edge of the stone and there is only room for one letter before which would probably be l. The first b is written at 90° and facing in the opposite direction to that faced by the (ė). The first letter of the third name is obliterated by hammering.

Provenance:
In Ghadr Budayna on the slopes of the nearby hillside of Ruṣayfa (?), unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010373.html

NSR 38

{l----{b}-----mr w h ---- w d(t)ʻ/}

l----{b}-----mr and h---- and (he spent the season of the later rains)

Apparatus Criticus:
Corpus of Safaitic inscriptions

NSR: lṣ’d bn nmr w bll w ḍṭ’ H unp.: The first name cannot be reconstructed from the photograph and other letters of the text need to be restored.

Commentary:
There is the fork of the first letter of the first name but nothing remains of the other letters and most of the next part of the text is hammered over. The letters after ḍ have been obliterated. There is a cross and a circle on another rock in the slide.

Provenance:
In Ghādir Budayna on the slopes of the nearby hillside of Ruṣayfā (?), unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010374.html

By ġt (son of) ----(f) (f) t son of (’s¹) son of ṭmṭ and he built

Apparatus Criticus:
NSR: l ḡt bn gfft bn ’s¹ bn ṭmṭ w bny. JaS 121: syr for ḡt; for the translation of bny see NSR 43. H unp: The
Corpus of Safaitic inscriptions

'ṭm[ṭn] for 'ṭmtn.

Commentary:
The n has been restored in 'ṭmtn on the basis of other occurrences of the name in these texts.

Provenance:
Al-Shāzi, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010385.html

NSR 49

l hḥṣ ----m

By ḥḥṣ ----m

Apparatus Criticus:
NSR: lḥḥṣ ---- JaS 120.2 +120.1: 1 ḥḥṣ bn wʾl; 120.1: l btl bn ḡnm.

Commentary:
It is difficult to be sure of the reading from the photograph but it is more likely that there is one text rather than two as in JaS. Five lines are visible after the m and it is possible that the following hammer mark covers two more. There are also some crudely hammered dots.

Provenance:
Al-Shāzi, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010386.html

NSR 50

l ḡnt bn km bn ----t (w) {b}n(y)

By ḡnt son of Km son of ----t (and) {he built}

Apparatus Criticus:
NSR: gft w bny for ----t (w) {b}n(y). JaS 114: krb for km; for the translation of bny see NSR 43. H unp.: Only the t of the third name is visible on the photograph.

Commentary:
The n’s are joined to the b’s in both the occurrences of bn. All the letters of the third name except for a t are covered by lichen as are parts of the letters of the following words.

Provenance:
Al-Shāzi, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010387.html

NSR 51
I mhgr bn {w}----{r}
By Mḥgr son of {W}----{r}

Apparatus Criticus:
NSR: wrtr for {w}----{r}. JaS 112: l mḥbr bn wmr. H unp.: The second name is very doubtful.

Commentary:
The first letter of the second name is probably a w but has two sets of prongs attached to it. The following hammer mark might be extraneous and the next letter is partially covered by lichen.

Provenance:
Al-Shāţ, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010388.html

---

NSR 52.1

I brd bn ẓʾn bn mrṭ bn {t}ʾ{n}ʾ{m} w wgm ʾl-ʾ{z}ʾ{n}ʾ{m} w ʾl-ḥnn ʾl-ʾykn
By Brd son of Ẓʾn son of Mrṭ son of {ʾnʾm} and he grieved for {ʾnʾm} and for Ḥnn he of the lineage of Ykn

Apparatus Criticus:
NSR: ‘nʾm for {ʾ}ʾ{n}ʾ{m} and ẓʾn for {ʾz}ʾ{ʾ}ʾ{n}; ʾlʾykn refers to Ḥnn. JaS 134.2: gbr for ‘nʾm and ʿykn for ykn; ʾl refers to Ḥnn. H unp.: The third and fourth names are very uncertain and so is the occurrence of ẓʾn following wgm ʾl.

Provenance:
Al-Shāţ, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010389.html

---

NSR 52.2

I qsʾ bn qdy {b}ʾ{n}ʾ{t}ʾgr bn ʿgfft w wgm ʾl-ʾgfft w ʾl-Ḥlf ṭ bny
By Qsʾ son of Qdy (son of) {ʾt}ʾgr son of Gift and he grieved for Gift and for Ḥlf and he built

Apparatus Criticus:
NSR: bnʾ’gr for {b}ʾ{n}ʾ{t}ʾgr and he suggests the text continues. JaS 134.1: reads the text as NSR except qt for qs; for the translation of bny see NSR 43. H unp.: bnʾ’gr is not there and bny is doubtful.

Provenance:
Al-Shāţ, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010390.html

---

NSR 53.1

I {b}ʾrdt {b}ʾ{n}ʾ gsʾ{m}----
By {Brdt} {son of} {Gs²m}---

**Apparatus Criticus:**
NSR: 1 brdt bn gs²m bn ḥrm JaS 132.2 first part: 1 brdt bn gs²m bn ḥrwz. The second part of NSR 53.2 is read as a continuation. H unp.: possibly srdt for brdt; the rest of the text is extremely doubtful.

**Commentary:**
From the angle of the photograph it is difficult to be sure whether the second letter has a tail and should be read as an s² as suggested by H. JaS has read the second part of NSR 53.2 as a continuation of this text. It is impossible to check this from the photograph as the letters have been obliterated by subsequent abrasions.

**Provenance:**
Al-Shāği, unspecified region, unspecified country.

----(t)bw’(m)----

Apparatus Criticus:
JaS 107: ---]lh bn w’m [---

Commentary:
The rock is broken and only a few letters and part of the cartouche remains. There is possibly a n after the b but the technique is different from the other letters.

Provenance:
Al-Shażzi, unspecified region, unspecified country.

References:
Corpus of Safaitic inscriptions

NSR 58

{l}ʾṣd bn y(q)m ʾl wqrʾl w wgm ʾl-ʾm -h w l-ʾty w trḥt

By ʾṣd son of Yqm of the lineage of Wqrʾl and he grieved for his mother and for Tʾly and she was untimely dead

Apparatus Criticus:
NSR: tgly for tʾly; trḥt interpreted as a personal name.

Provenance:
AlʿUwaysji, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010404.html

NSR 59

Ilḥṣ bn msʾlm w ḏʾr

(By) Ḥlṣ son of Msʾlm and he spent the season of the late rains

Apparatus Criticus:
NSR: lḥṣ bn smʾl ṣʾhl ṣ m w ḏʾr; ṣʾm is interpreted as a personal name. H unp.: msʾlm for sʾmʾl ṣʾhl ṣʾm.

Commentary:
The edge of the rock at the beginning is cut off in the photograph but the restoration of ṣʾm is probably justified. The signs read by NSR as sʾh and ṣʾ are in a different technique and do not belong to the text. There is a further extraneous circle next to the w which is not in NSR’s copy.

Provenance:
AlʿUwaysji, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010405.html

NSR 60

lr bn wʾl {b}{n} bgt b[n] fgʾ

By Nr son of Wʾl {son of} Bgt {son of} Fgʾ

Apparatus Criticus:
NSR: bn --- rgt for {b}{n} bgt. H unp.: there is no gap between bn and rgt; read sʾgʾ for fgʾ.

Commentary:
There is a faint mark after the b of the third bn which might be the n but it is not as deep as the other letters of the text.

Provenance:
AlʿUwaysji, unspecified region, unspecified country.

References:
Corpus of Safaitic inscriptions

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010406.html

---

**NSR 61.1**

\[s²dt b(n) tmlh bn b(d)bn\]

By \(s²dt\) son of \(Tmlh\) son of \(\{Ḥḍ\}bn\)

**Commentary:**

The \(b\) of the first \(bn\) has been filled in and the \(n\) hammered over. The letter read as \(d\) is two concentric circles; it is somewhat doubtful as the centre has been hammered in and the inner circle is not completely clear.

**Provenance:**

Al-ʿUways; unspecified region, unspecified country.

**References:**

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010408.html

---

**NSR 61.2**

\(--\) \(f\) \(w\) \(\{g\}m \) \(l\) \(b(n)\) \(g\) \(t\) \(w\) \(l\) \(w\) \(‘qr b\) \(w\) \(l\) \(– \{g\}\{t\}\{f\}\{n\}\) \(w\) \(l\) \(– \{ms\}\) \(w\) \(rg m\) \(m n y\) \(l\) \(– \) ‘bny \(w\) \(h\)

\(--\) \(f\) and \(\{he grieved\}\) for \(\{bngt\}\) and for \(W\) \(--\) \(f\) \(s¹\{h\}m\) and for \(\{qrb\}\) and for \(\{Gṭ fn\}\) and for \(\{Ms\}\) and humbled by Fate \(l\) ‘bny \(w\) \(h\)

**Apparatus Criticus:**

NSR: l\(hlf\) w \(wgm\) l \(bngt\) w \(l\) \(w\) \(l\) \(s³lm\) w \(l\) \(qrb\) w \(l\) \(lgtfn\) w \(l\) \(ms¹\) w \(rğm\) \(mny\) \(l\) \(bny\) \(w\) \(l\) \("wa-karaha al-mawt li-abnæ’ w\) \(T\). H unp.: l\(hlf\) is doubtful and not the beginning of the text which could be a continuation of 61.1. \(gṭ fn\) for \(gṭ\), \(w\) at the end.

**Commentary:**

The only letter which is visible at the beginning is a \(f\). The \(n\) of the first name after \(wgm\) is doubtful as it is inscribed in a different technique to other letters of the text. It is difficult to read any letters after the \(l\) of the third name after \(wgm\) although it is possible that a \(w\) should be restored before \(l\). The reading of \(\{g\}\{t\}\{f\}\{n\}\) is extremely doubtful. The text ends in \(w\).

**Provenance:**

Al-ʿUways; unspecified region, unspecified country.

**References:**

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010408.html

---

**NSR 61.3**

\(l\) \(\{n\}\) \(s¹\{lm\} f bbs²\{s\}\{r\}y\)

\(l\) \(\{n\}\) \(S¹\{lm\} f bbs²\{s\}\{r\}y\)

**Commentary:**
The form of the (l)\{n\} read at the beginning are clear but it is not certain that they belong to the text as they are written to one side. Also if the first letter is a l it does not have a hook as does the l in s\^1\{m\}. The s\^2 is a zig-zag and the r is distinguished from the b by being a small rounded curve. It is possible that y read at the end should be read at the of NSR 61.4. It is unlikely that the text is a continuation of either NSR 61.1 or NSR 61.2 as the letters are inscribed in a different technique to those of the other texts.

Provenance:
Al-\^Uwaysji, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010409.html

---

NSR 61.4

\(n(b)\{k\}n(y)\{b\}---d\)
\(n(b)\{k\}n(y)\{b\}---d\)

Commentary:
The text is near the bottom of the rock below NSR 61.3. The (b) is inscribed at 90\(^\circ\) and the tail of the k is doubtful. The circle of the (y) is hammered in and the bottom part of the letter is obscured by hammering. The y read at the end of NSR 61.3 might belong to this text following the ‘.

Provenance:
Al-\^Uwaysji, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010534.html

---

NSR 61.5

---\(f\)---\{y\}---
---\(f\)---\{y\}---

Commentary:
The text is inscribed above the first part of NSR 61.2.

Provenance:
Al-\^Uwaysji, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010535.html

---

NSR 62.1

\(l\{g\}---l\{b\}n\{t\}\{h\}---

By G---l\{b\}n\{t\}\{h\}---

Apparatus Criticus:
NSR: l grzt bn ‘\(\^t\)\{s\}’.
Commentary:
There is a circle belonging to the third letter but the rest is obscured by part of the y of NSR 61.3. The last letter of the first name is a l the faint cross bar is not intentional.

Provenance:
Al-ʿUwaysi, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010410.html

NSR 62.2

l---ms¹ bn s¹(r) bn ṭ(s¹)
By ---ms¹ son of {s¹r} son of {ts¹}

Apparatus Criticus:
NSR: l hms¹ bn s¹r bn ṭs¹

Commentary:
The second letter is obliterated. The form of the second letter is clear but it is possible that it should be read as a b as there is no feature which distinguishes it from the other b.

Provenance:
Al-ʿUwaysi, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010411.html

NSR 62.3

l ṭs¹ bn s¹(r) bn ṭs¹
By ṭs¹ son of {s¹r} son of ṭs¹

Apparatus Criticus:
NSR: l ṭs¹ bn s¹r bn ṭs¹

Commentary:
The {r} is partially obscured by hammering and it is difficult to tell whether it should be read as b.

Provenance:
Al-ʿUwaysi, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010412.html

NSR 62.4

ṭs¹ bn {k}s¹
--- ṭs¹ son of {K}---s¹
Apparatus Criticus:
NSR: ---ʿṣ¹ bn hms¹

Commentary:
Only ʿṭs¹ has been drawn in NSR’s copy and not the second name. The signs in thicker lines drawn at the beginning of the copy are later hammer marks which obscure the beginning of the text. The letter read as h by NSR has a slightly curving tail and is probably a k or possibly a g. The middle letter of the second name is covered by abrasions.

Provenance:
Al-ʿUwayṣi, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010413.html

NSR 62.5
----{s¹} bn ----
----{s¹} son of ----

Commentary:
The text is inscribed above the beginning of NSR 62.2 and 62.3.

Provenance:
Al-ʿUwayṣi, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010414.html

NSR 63
l ghš² bn bgt bn gs²m
By Ghš² son of Bgt son of Gs²m

Apparatus Criticus:
NSR: rgt for bgt.

Provenance:
Al-ʿUwayṣi, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010415.html

NSR 64.1

Apparatus Criticus:
NSR: 1 mlṯ r dlṯ. H unp.: the text could be part of NSR 64.2.

Commentary:
See under NSR 64.2 this is the continuation.

Provenance:
Al²-Uwaysj, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010416.html

NSR 64.2
l ’qr b w r’y w mtr w dτ'
By ’qr and he pastured and it rained and he spent the season of the later rains

Apparatus Criticus:
NSR: l’qr b w r’y. H unp.: could be read with NSR 64.1.

Commentary:
Read with NSR 64.1. The second w is not read by NSR although it occurs in the copy. The line read as l before mtr is almost certainly extraneous as the hammer marks are inconsistent and not as deep as the others in text. There are two curves facing the opposite directions after the ’ at the end. They are possibly an unfinished letter or a wasm.

Provenance:
Al²-Uwaysj, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010417.html

NSR 65
l ḫṣ bn mġyr bn ḥwt bn s²h{r} w [ ] whd w swy f h lt w ds²r {s¹}lm w s²kr
By ḫṣ son of Mġyr son of ḥwt son of {s²hr} and [ ] he was alone and built a cairn and so OLt and Ds²r {[grant] security} and w S²kr

Apparatus Criticus:
NSR: s²hr for S²hr(t); s¹lm for {s¹}lm. H unp.: possibly ḫḥ for s²hr; there is a gap between w which is doubtful reading and whd.

Commentary:
The arms of the (r) of the fourth name are joined at an acute angle and the letter is written on the edge of the rock. The stone is broken between the second w and the w of whd. If the break was there when the text was inscribed then the inscriber continued on another edge rather than turning towards the centre of the rock which he could have done. If the break has occurred subsequently there are several letters missing between w and whd.

Provenance:
Al²-Uwaysj, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010418.html
NSR 66

\[ \text{(h') } \text{w} \text{dg} \text{r}h \text{[lyrd]} \text{b}{'} \text{s}^{2} \text{hrs}^{2} \text{w} \text{'} \text{r}f \text{s}^{1} \text{fr} \} \text{n qbr m{s}ry f (n)} \text{jdm} \]

\[ \text{(h') } \text{w} \text{dg} \text{r}h \text{[lyrd]} \text{b}{'} \text{s}^{2} \text{hrs}^{2} \text{w} \text{'} \text{fS}^{1} \text{fr} \} \text{n the grave of (Msry) and so (he was sad)} \]

**Apparatus Criticus:**

NSR: 1 \text{w} \text{dg} \text{bn rhny } d \text{r hr f w} \text{g} \text{s}^{1} \text{fr l qbr m} \text{sry f ndm}; translated from \text{f w} \text{g} \text{a} \text{s: fa-waga' a (ta'allama) fa-safara (fa-kataba) alae qabr m} \text{sry fa-nadima. H unp.: l \text{w} \text{dg} \text{bn rhny } d \text{r l (h) r (f) \text{w} \text{g} \text{s}^{1} \text{fr l qbr m{s}ry f (n)} \text{jdm}}

**Commentary:**

The first letter has a line joining the vertical stroke to form a h. It is not a deep as the rest of the letter but is probably intentional. There is a chip in the rock after the h and it is possible that NSR and H are justified in reading a n. The first s² is inscribed near the top of the stroke of the following h. The ' of (') is larger than the other ' of the text. It is possible it should be read as m although it is not as elongated as the other m's.

**Provenance:**

Al-Uways, unspecified region, unspecified country.

--- (b)n yḥ
--- {son of} Yḥ

Apparatus Criticus:
H unp.: l yḥ

Commentary:
The letter read by H as a l is rather short and more likely to be a n. There seem to be a b and other smaller letters before it.

Provenance:
Al-ʿUwaysi, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010431.html

--- l ṭ mlh bn zdt {b}n yḥ bn sʾrʾ w ḥlī w ḡld mʿzy ---ṭṭ
By Mṭy son of Zdt (son of) {ʾnhb} son of Sʾrʾ and he stopped [there] and helped the goats give birth ---ṭṭ

Apparatus Criticus:
NSR: l ṭ mlh bn zdt bn ʾnhk bn ṣʾrʾ bn ḥlī w ḡld mʿzy ---ṭṭ; translated from ḡld as: "wa-ʾlṣälāt miʿzæ". H unp.: l ṭ mlh bn ḍḥl [n] ʾnhb bn sʾ bʾ w ḥlī w ḡld [h] mʿzy ---ṭṭ? the end is very doubtful.

Commentary:
There is a break in the rock and only part of the b of the second bn is legible and the n has completely disappeared. The b of ʾnh(b) is partly covered by abrasions and there is a gap caused by the break between the d of ḡld and the m of mʿzy it is possible that H is right to restore a h.

Provenance:
Al-ʿUwaysi, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010432.html

--- l ṭ mlh bn h{nt} bn lʾsʾ w
By Tmlh son of {Hnt} son of Lʾsʾ w

Apparatus Criticus:
NSR: l ṭ mlh bn h{nt} H unp.: read bn lʾsʾ at the end.
Commentary:
The n of the second name is very faint. The text is unfinished.

Provenance:
AlʿUways; unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010433.html

NSR 73.2

l ṭg bn ṣʿdtʃ jy wgm ʿl- m---- w ʿl- b - h (f)h---- ʿsh ʿhr ----

By ṭg son of ṣʿdtʃ he grieved for M---- and for his father (f)h---- ʿsh ʿhr ----

Commentary:
The d is two concentric circles. There is a gap between the d and t of the second name. The letters after the second m are on the edge of the rock only a line with a circle is visible and it is impossible to check whether it is a y ṣ or t. The letter after the h of bḥ might be an f or an s². It seems likely that NSR 73.3 which ends in w w shares the letters of this text from the g of wgm onwards.

Provenance:
AlʿUways; unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010434.html

NSR 73.3

---- bnlh w w
---- Bnlh w w

Commentary:
It is difficult to know how to interpret these letters. There is a horizontal chiselled line before the b but no letters are distinguishable. The second w is written next to the g of NSR 73.2 and it seems likely that this text was written to share the remaining letters of that text i.e. w w and then NSR 73.2 gm-1 m---- etc. "and he grieved for M---- etc.

Provenance:
AlʿUways; unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010435.html

NSR 74.1

l ḥld bn (f)bdlh

By ḥld bn (f)bdlh

Apparatus Criticus:
Corpus of Safaitic inscriptions

Commentary:
The letter read as ‘(‘) is relatively large and the ‘(b) could be a r as it is slightly squarer than the other b of the text.

Provenance:
Al-ʿUwaṣṣ; unspecified region, unspecified country.

References:

NSR 75

l ---mr bn ‘(r)s²bd b[n] gff(t) b)n ‘s¹ h g(w)y
By ---mr son of ‘(r²) ‘bd (son of) Gfft son of ‘s¹ h g(w)y

Apparatus Criticus:

Commentary:
Several letters of the text have been infilled and hammered over either by the author of the text or subsequently and the text is partly covered by abrasions. It is unlikely that the second letter is an ‘ as read by NSR but it could be a z as part of a cross-bar at the top of a horizontal stroke is visible. The second letter of the second name could be a r or a b it is slightly more square than the b’s of the text. It is possible that bn has been left out between this name and ‘bd. Part of the b of ‘bd is destroyed by a chip and the d is written on its side. The following b is written right up against the g and no n is visible. If the third letter of gfft is to be read as f then it is facing in the other direction to the other f. The b of the following bn has been hammered over and its original shape is not visible. The line across the circle of the w of the last word is indistinct. Three dots are visible and there are possibly more which are not certain in the photograph.

Provenance:
Al-ʿUwaṣṣ; unspecified region, unspecified country.

Corpus of Safaitic inscriptions

1 ḥdmy b[n] (h){ʾ}lm b[n] ḥdmy w----

By Ḥdmy (son of) (Ḥʾlm) (son of) Ḥdmy w----

Apparatus Criticus:
NSR: l ḥdmt b[n] ḥlm ʿf h ṭl ʿr. H unp.: ḥḍ(m) [t] for ḥdmt; {ʾ}lm for ḥlm.

Commentary:
The letters read by NSR after the second name belong to NSR 81.1. The continuation of the text as read here is written on the other side and is not read by NSR. Several of the letters are covered by lichen which makes the reading difficult. The y of the first name is written below the ṭ. There is no legible after the first b and the following letter is very doubtful although possibly a stroke with a prong is visible. The n of the second bn cannot be read and the letters after the w are not clear.

Provenance:
Al-ʿUwaysj, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010450.html

NSR 82

l gry bn ʿdnt bn ʿsr bn ḥwr w dtʾ w (ṣ)wy

By Gry son of ʿdnt son of ʿsr son of Ḥwr and he spent the season of the later rains and (he built a cairn)

Apparatus Criticus:
NSR: ṣwy for (ṣ)wy.

Commentary:
There is no copy of the slide and the text is read from the facsimile alone.

Provenance:
Al-ʿUwaysj, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010452.html

NSR 83

l {ʾ}---- bn ḥ[n]ḍmt w dtʾ

By {ʾ}---- son of (Ḥnḍmt) and he spent the season of the later rains

Apparatus Criticus:
NSR: bn ḥḍmt w dtʾ H unp.: first name ʾnn ?, the second name is extremely doubtful.

Commentary:
There is no copy of the slide and the reading is from the facsimile alone. It is possible the second letter is y although the stroke is not joined to the circle. There is a short line after the h of the second name which might be a n or part of another letter. There is a dot next to the w which probably does not belong to the text.

Provenance:
Al-ʿUwaysj, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010453.html

L mḥr bn bngdrn

By Mḥr son of Bngdrn

**Apparatus Criticus:**

NSR: Lmḥrb bn gdrn.

**Commentary:**

There is definitely a dot after the first b although it and part of the b have been very lightly hammered.

**Provenance:**
Al-ʿUwaysi, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010456.html

NSR 87

l khs'mn bn hmnt bn nm{s¹} bn yqm bn wd bn '----{s²}{t} bn whf bn 'km

By Khs'mn son of Hmnt son of {Nms¹} son of Yqm son of Wd son of '{---s²}{t} son of Whf son of 'km

Apparatus Criticus:
NSR: nmr for nm{s¹}; 'nfq for '{---{s²}{t}; whs² for whf. H unp.: 'ns²{t} for 'nfq ?; whs² or whf for whs² and '{(k)m for 'km.

Commentary:
The last letter of the third name is damaged by a chip. It is more likely to be a s¹ than r as the arms of the letter which are visible are quite close together. There are traces of a letter after the ' of the sixth letter but it is unclear what it might have been.

Provenance:
Al-ʿUwaysi, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010457.html

NSR 88.1

----h{l}(d) bn ----lh bn ymlk w wgm 'l----

----{Hld} son of ----lh son of Ymlk and he grieved for ----

Apparatus Criticus:
NSR: wd for h{l}(d); ---klh for ----lh. H unp.: first name h{l}ld or gd ?; ---{k}lh for ---klh.

Commentary:
After 'l the text runs into the letters that have been read as NSR 88.2 and it is possible that some of the letters of that text should be read here they are mostly indistinct however because of subsequent hammering.

Provenance:
Al-ʿUwaysi, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010457.html

NSR 88.2

{l} '{}----

{By} '{}----

Commentary:
The text cuts cross 'l of NSR 88.1. The initial l is a rather long line and the other letters have been hammered over. There is a cartouche which is not complete

Provenance:
Al-Uwaysi, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010459.html

NSR 89.1

l bdt bn br bn qymt bn bdd bn bdt (b)n m[s²]{s¹}{y} bn ḥdd bn 'mr{n}(n) bn ms¹k bn 'mnrn bn ds¹ bn [|[|] fhrn ('){b}r w ḥll w ḏ----s²{'}----im----

By Bdt son of Br son of Qymt son of Bdd son of Bdt (son of) {Ms²s¹y} son of Ḥdd son of (mnrn) son of Ms¹k son of (mnrn) son of Ds¹ son of Fhrn son of (br) and he stopped [there] wd----s²{'}----im----

Apparatus Criticus:
NSR: the first five names are read as a separate text NSR 98.1 and the rest of the genealogy and ḥll and the following 2 letters are read in NSR 89.2 as: bn ḥdd bn 'mr bn ms¹k bn 'm bn bnds¹ bn fhr bn 'ṣr w ḥll w g[l¹]; w g[l¹] wa-j[nalasa] (ātē najdan). H un.: read bn ms²rh after the second occurrence of bdt; NSR 89.2 is a continuation of the text and 'mnrn bn ds¹ bn (f)hr bn ('){s²} should be read for 'm bn bnds² bn fhr bn 'ṣr. The text continues after g[l¹].

Commentary:
The seventh name is difficult to explain but the(s²) and (s¹) are fairly clear. It is possible the last letter of the name is a k. The n in the nineth name is doubtful as it is very faint. After the bn following the name ds there is an 'l. The letter and next part of the rock have been covered by incised lines as though an attempt has been made to cross-out a mistake. It is likely the author started to write the thirteenth name and then remembered he had forgotten to write the name fhrn and so covered his mistake with lines and continued the text slightly to the side of the previous part. The first letter of the thirteenth name is slightly covered by hammer marks. There is a small curve to one side of the letter which does not seem to be attached. The (b) of the name appears to have a tail in some lights which probably led NSR to read ṣ lying on its side at this point. The ' is the circle of the letter read by NSR the (b) read here the fork and the two are joined by the apparent tail. The ḏ is two concentric circles. Parts of the rock following it are covered by lichen and it unclear whether the rest of the letters are a continuation of this text or part of another one.

Provenance:
Al-Uwaysi, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010459.html

NSR 89.2

Commentary:
See NSR 89.1.

Provenance:
Al-Uwaysi, unspecified region, unspecified country.

l gbn b----‘t----dl(l)---- bn msʾ k wg’----w(t)----‘(l) (f) lg

By Ghn b----‘t----dl(l)---- son of Msʾ k wg’----w(t)----‘(l) (f) lg

Commentary:
The text was not read by NSR. It starts on the edge of the rock next to the beginning of NSR 89.1.

Provenance:
Al-ʿUwayṣ, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010461.html

NSR 90

l h(z)mt bn r(w)ḥ bn bgrt bn grm bn ʿ(m)n w ḏʾ

By (Ḥzmt) son of (Rwt) son of Bgrt son of Grm son of ḏm and he spent the season of the later rains

Apparatus Criticus:
NSR: l ḥzmt bn r(w)ḥ bn bgrt bn grm bn ʿ(m)n w ḏʾ. H unp.: ḥ(z)mt for ḥzmt; possibly ḡ for rwt; ṣ(m) or ḥmn for ṭm.  

Commentary:
The second letter of the first name is damaged by abrasions but it is possible to see traces of a vertical stroke and a cross-bar at the top suggesting the letter should be read as z. It is difficult to be certain as to whether the circle of the second letter of the second name has a line across it or a dot in the middle. If the latter is the case then the letter should be read as either a ṣ or ḍ [REF]. The first letter of the fifth name does not have a central line between the two forks and it is possible that H is correct in reading the letter as ḥ. It is possible the second letter of the same name should be read as a f as the spine which would form a m is covered by a subsequent hammer mark and might be extraneous to the reading of the letter.

Provenance:
Al-ʿUwayṣ, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010462.html

NSR 91

l ẓnn bn sʾdlih

By Ẓnn son of Sʾdlih

Apparatus Criticus:
NSR: ḵmn for ẓnn.

Commentary:
There is a cartouche of dotted chisel marks surrounding the text.

Provenance:
Al-ʿUwayṣ, unspecified region, unspecified country.
References:

$l khāl bn `bd w dīʾ$

By Khāl son of `bd and he spent the season of the later rains

Provenance:
Al-$Uwaysj$, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010477.html

---

**NSR 104.2**

$l Ḥāmy bn ṣd$

By Ḥāmy son of ṣd

Apparatus Criticus:
NSR: l ḥmy bn ṣd.

Commentary:
There is a scratched cartouche around the text which is not complete.

Provenance:
Al-$Uwaysj$, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010478.html

---

**NSR 105**

$l ḡlb w t(ʿ)m$

By ḡlb w t(ʿ)m

Apparatus Criticus:
NSR: l ḡlb w tdgn "li-ḡlb wa-tdgn". H unp.: possibly tʿm for tdgn. The word after w would not be a name.

Commentary:
The letter read by NSR as a d does have lines extending from the circle but they are not inscribed in the same technique as the rest of the text and one is facing away from the circle and the other towards it.

Provenance:
Al-$Uwaysj$, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010479.html

NSR 106

I yd’ bn n’rt bn hgn w dt’ fh lt s’lm

By Yd’ son of N’rt son of Hgn and he spent the season of the later rains and so O Lt [grant] security

Commentary:
The second ‘ is written slightly above the n and r of the name as though it had originally been left out. There are some hammer marks and possibly further letters near the beginning of the text.

Provenance:
Al-Uwaysj, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010480.html

NSR 107

I bgrt bn mjyr w syr w syd ‘gl

By Bgrt son of Mjyr w syr w syd ‘gl

Apparatus Criticus:
NSR: w syr w syd ‘gl "wa-ṣæra (‘æra) wa-ṣæda ‘ıglan". H unp.: w syr w syd ‘gl "And he returned and hunted calves ? or quickly ".

Provenance:
Al-Uwaysj, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010481.html

NSR 108

I m(ʻ)mr w wgm ‘l-‘d

By (M’mr) and he grieved for ‘d

Apparatus Criticus:
NSR: l m(ʻ)mr w wgm ‘l’dy. H unp.: l m(ʻ)mr w wgm ‘l’d(y).

Commentary:
The hammering over the third letter makes it difficult to read with certainty. It could be an ‘. It is difficult to justify the reading of a y at the end. There might be a circle but no tail is visible.

Provenance:
Al-Uwaysj, unspecified region, unspecified country.

References:
NSR 109

\[
\text{l } \text{w}’lt \text{ bn } nmr \text{ bn } mḥrt \text{ w } wgm \{']-[\} } \text{-----}(m)r
\]

By \{W’lt\} son of Nmr son of Mḥrt and he grieved \{for\} \text{-----}(m)r

**Apparatus Criticus:**

NSR: l w’lt bn nmr bn mḥrt w wgm ‘l \text{-----}. H unp.: l g’lt bn nmr bn mḥrt w wgm ‘l nfr.

**Commentary:**

The slide is out of focus and the reading cannot be properly checked. There seems to be a cross-bar to the second letter suggesting it should be read \text{w} rather than \text{g}. It is most likely that the penultimate letter is a \text{m} rather than \text{f} as in H.

**Provenance:**

Al-ʿUwaysj, unspecified region, unspecified country.

**References:**

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010483.html

NSR 110.3

lḫlf bn ʾṣḥl w bḥl

By Ḫlf son of ʾṢḥl and he stopped [there]

Provenance:
Al-ʿUwaysi, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010486.html

NSR 110.4

lʾḥbb w ḥṣ(y)t

By ʾḤbb and (he journeyed without stopping)

Apparatus Criticus:
NSR: ʾrb for ʾḥbb; w ḥṣ(y)ṯ marra bi-haad al-makæn. H unp.: the reading of the name is uncertain.

Commentary:
The two letters following the ʿ are the same and it is most likely they should be read as b. The tail of the y is indistinct.

Provenance:
Al-ʿUwaysi, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010487.html

NSR 111.1

----(ṣ) b[n] ḥyr bn ḥr bn wṯr bn qymt ḏ-ʾl wṯr w wgm ḏ- wny ḏ-h ḫrjm mnty

----(ṣ) (son of) Ḥyr son of Wṯr son of Qymt of the lineage of Wṯr and he grieved for Wny his brother humbled by Fate

Apparatus Criticus:
NSR: lḥrṣ bn ḥy bn bḥr for ----(ṣ) b[n] ḥyr bn ḥr; wnṣ for wny. H unp.: t(r)s for ḥrṣ; qym(t) for qymt; ḏ for ḏ l; wny for wnṣ.

Commentary:
There is lichen and abrasions over the first part of the text and it is possible that ṣ should be read but nothing else is legible from the photograph. The ḥ of the second name is an unusual shape and different from the shape of the other ḥ in the text. A fork has been inscribed and then the third middle line has been attached to a line of the fork rather than to the centre. The n of the second bn is inscribed on the edge of another letter possibly a r in thicker chiselled lines which is followed by a ḥ. The different technique of inscribing and the position of the ṳ suggest that these letters are another text NSR 111.2 rather than a part of this one. It is difficult to tell whether they were inscribed before or afterwards see NSR 111.2.

Provenance:
Al-ʿUwaysi, unspecified region, unspecified country.

References:
Corpus of Safaitic Inscriptions

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010488.html

NSR 111.2

\( h \)

\( r \)

**Apparatus Criticus:**

H unp.: added after NSR 111.1.

**Commentary:**

See NSR 111.1. The letters are probably an unfinished text.

**Provenance:**

Al-ʿUwaysj, unspecified region, unspecified country.

**References:**

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010539.html

NSR 112

\( h \)bn ḡmr bn ʿbd w ḥl w tḥwf fh l[t] s¹lm w bny ḫfs¹

By Ḥbt son of ḡmr son of ʿbd and he stopped [there] w tḥwf and so Lt [grant] security and he built ḫfs¹

**Apparatus Criticus:**

NSR: hrt for Ḥbt; w tḥwf fh l t; s¹lm w bny ḫfs¹ "wa-taḥawwa fa-yā-Lt lawman w banā al-qabr". H unp.: Ḥbt for Ḥrt; s²mr for ḡmr; fh l[t] for fh lt; letters ʿl after bny. w bny ḫfs¹ "And he built stelae" ?.

**Commentary:**

There is no t after the letters h l in the prayer but the s¹ is quite clear although it has a small extra line. There is a hammer in the indentation of the f at the end and it is possible it should be read as a n. The letters after bny would then read ʿl(n)fs¹.

**Provenance:**

Al-ʿUwaysj, unspecified region, unspecified country.

**References:**

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010489.html

NSR 113.1

\( nm(r) \) bn bnʿtmn bn (q)ymt w ṣwy

By Nmr son of Bnʿtmn son of (Qymt) and he built a cairn

**Apparatus Criticus:**

NSR: leaves out bn before ʿtmn; w ṣwy at the end "wa-banāe qahran". H unp.: nm(r) for nmr; bnʿtmn for "tmn.

**Commentary:**

It is possible that the last letter of the first name should be read as a s¹. The first letter of the third name has
been hammered over and the circle of the y is filled in. There is a line across the middle of the second and third m. The w before šwy is written below the t of qynt. There is also a hammered circle which might have been the first attempt to add the letter.

Provenance:
Al-ʿUwayṣi, unspecified region, unspecified country.

References:

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0010490.html

NSR 113.2
wtl
wtl

Commentary:
The letters are incised in the middle of NSR 113.1. There is a thicker chiselled line before the w.

Provenance:
Al-ʿUwayṣi, unspecified region, unspecified country.

l y[sʾ] bn gʾrm w wgm 'l- ḫ -h 'sʾ w 'l- hnʾh w 'l- 'mt w 'l- tʾmr

By yʾsʾ son of Gʾrm and he grieved for his brother 'sʾ and for Hnʾʾh and for 'mt and for Tʾmr

**Apparatus Criticus:**
QSZB 8: ḥṣḥ for ḥʾnʾh; ḏʾmr for ṭʾmr

Commentary:
The photograph is far from clear in places but the reading offered here seems plausible. Many of the letters have "square" forms. Where QSZB read ṣ there seems to be a clear ʾ, and they give no explanation of why, in the last name, they read ḏ a sign which in their tracing appears like a ḏ. In fact, there is not room for the sign in their tracing and a ṭ can be seen clearly. The name ḥʾnʾh is found in Dadanitic (see HE 75 and QṢ unp 3 and 5).

Provenance:
Unspecified site, unspecified region, Jordan

**Commentary:**

---
C 4043–4046 (= QWs 3, 5+6, 11) and QWs 4, 7–10 are on a long low boulder with a dark red, shiny surface. This text was recorded by the Safaitic Epigraphic Survey Programme in 1995. It is lightly incised and begins below the third letter of QWs 3 and above the point where QWs 4 turns back on itself. The first letter after ḍ-'l could be m, s', or g.

Provenance: Qalʿat al-Wāsim, unspecified region, unspecified country.

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0036088.html

QWs 12

Commentary:
Number not used.

Provenance: Unspecified site, unspecified region, unspecified country.

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0036091.html

QWs 16

----' (){()}--- mn- 'l rm (f) ----

---- from the Romans (and so) ----

Commentary:
C 4039–4042 (= QWs 13–15, 17) and QWs 16 are carved on a long low rock with a deep mauve shiny surface. QWs 16, which was not copied by Dussaud and Macler, runs downwards from the junction of the end of C 4039 and the beginning of C 4040 and then turns to the right to run horizontally along the bottom of the face before turning upwards again to end by the middle of C 4040. Most of it is barely visible on the photographs and a small part seems to have been lost in the area of the face which has disappeared.

Provenance: Qalʿat al-Wāsim, unspecified region, unspecified country.
Harra east of the Hawrān

RaIM 3074.1

I mʿz bn sʿlm bn sʿny bn hʿnʾl bn sʿlm bn sʿny ʿl- ʾlʿ sʿll w glsʾmn dm ḡt sʿnt ngy s- ---y w ḏty w wgm ṣ- ʿḥ sʿny w ṣ- ṣḥlm w ṣ- hʿnt bn dd(h) w ṣ- ----sʿll bn ----t w ṣ- nsg w (')[')ṣʾ y ḥ- sʾ(ʾ)ʾr]r

By Mʿz son of Sʿlm son of Sʿny son of Hʿnʾl son of Sʿlm of the lineage of Sʿll and glsʾmn dm ḡt the year ngy s- ---y and he spent the season of the later rains and he grieved for his brother Sʿny and for Ṣḥlm and for Hʿnʾl bn dd(h) and for ----sʿll son of ----t and for Nsg and for (ʾsʾy)

Commentary:
The reading is from a hand-copy made by Dr Farouk Al-Rawi. The reading until the first ʿ is fairly certain but after the ʿ the copy is incomplete and it is doubtful whether the next part is a continuation of the same inscription or part of another one. The letter after the word dd has a loop at one end although it seems most likely that this belongs to another letter which would be a t. The letter before the second sʾ is doubtful and there is room after the letters bn for another letter although there is no indication of this on the copy. The eighth ʿ has a crossbar but it seems likely that it is an inaccurate copy. The second prong of the final name is uncertain and it is possible the letter is a h. It is uncertain that the last two letters should be read as rʾs.

Provenance: Unspecified site, unspecified region, unspecified country.
Iraq
RaIM 3074.2

----ʿw bn ḫ---y
----ʿw son of ḫ---Y

Commentary:
The reading is from a hand-copy made by Dr Farouk Al-Rawi. It seems likely that these letters do not belong to RaIM 3074.1 although without a photograph or better copy this must remain uncertain. There is a possible ḫ and a wavy line above what might be the beginning of the inscription.

Provenance:
Unspecified site, unspecified region, unspecified country.
Iraq

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024095.html

[---]g b[n] wtm(b) ngm w ḫdl w ℓm

[---·g] son of [---·n] {son of} wtm(b) ngm and he took possession and he camped and ℓm

**Commentary:**
The reading is from a hand-copy made by Dr Farouk Al-Rawi. The rock is broken and it is difficult to make sense of some parts of the copy. The first legible letter has a slight tail. Part of the letter read as the third g has broken off and there is possibly a letter between it and the following h. The next two letters read as n are possibly incidental as they are not rounded, unlike the n before the g. The letter read as the first m might be a r followed by a f in which case the text after b(n) should be read as wtr f ngm.

**Provenance:**
Unspecified site, unspecified region, unspecified country.

**URL:** http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024114.html

{l} ls²ms¹ bn ʾrs¹k bn (t)gt w wgm ℓ- ʾrs¹k w bny ℓ- rʾd w ℓm Ṭ- wd

By {ls² ms¹} son of ‘rs¹k {of (tgt) and he grieved for ‘rs¹k and he built for rʾd and he joined the mourning for Wd

**Commentary:**
The reading is from a hand-copy made by Dr Farouk Al-Rawi. The second letter is damaged and it is possible it should be read as h. There is a dot in the copy after the first ℓ and it is possible that the name should be read as ‘ngt. However such a name would be very difficult to explain and it seems likely that the dot is a copyist’s mistake. ℓm here is explained on the basis of Classical Arabic maʿtam “a place of assembling in a case of rejoicing or mourning” (Lane 13c–14a).

lʾysʾmʾl bnʾsʾ ---- bn ʾmʾl bn nʾmʾl

By ʾysʾmʾl son of ʾsʾ ---- son of ʾmʾl son of Nʾmʾl

Commentary:
On a loose piece of rock near RMenv.C 1–3. It is not certain that any letters have been lost under the patch of abrasion between the second and third names.

Provenance:
Unspecified site, unspecified region, unspecified country.

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0035962.html

---

RMenv.D 1

lʾwsʾn bn Mrʾ

By Wsʾn son of Mrʾ

Commentary:
Chiselled within the same cartouche as RMenv.D 2. There is a text in another cartouche on another face of the same stone, which can just be seen, but not read, on the photographs.

Provenance:
Unspecified site, unspecified region, unspecified country.

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0035815.html

---

RMenv.D 2

lʾʾʾsʾq bn gwk bnʾrn

By ʾʾsʾq son of Gwk son of ʾrn

Commentary:
The text is chiselled within the same cartouche as RMenv.D 1. Some of the letters have been vandalised by additions, closing loops (as in the two examples of ʾ) or adding lines as in the first b, the g, the k and the last two examples of n. These additions show up as having a lighter patina on the photographs. The first two names are previously attested in Safaitic.

Provenance:
RMenv.D 3

l ḫr

By ḫr

Commentary:
The text is chiselled on a face adjacent to that bearing RMenv.D 1 and 2.

Provenance:
Unspecified site, unspecified region, unspecified country.

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0035817.html

RMenv.D 4

l znʾl bn rgl bn grmʾl bn qhs² w nfr mn mlk

By znʾl son of rgl son of grmʾl son of qhs² and he escaped from mlk

Commentary:
There is nothing after mlk. Could it refer to one of the kings of Nabataea called Malichus.

Provenance:
Unspecified site, unspecified region, unspecified country.

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0035818.html

RMenv.D 5

lʾmhm bn nqm

Byʾmhm son of nqm

Commentary:
Only partially visible on the photograph.

Provenance:
Unspecified site, unspecified region, unspecified country.

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0035819.html

RMenv.D 6

l ḫlʾ bn ʾlmn w sʾr q mdbr n [----rddʾfn(y){z²}ʾnʾm

By ḫlʾ son of ʾlmn and he migrated to the inner desert n [----rddʾfn(y){z²}ʾnʾm

Commentary:
On the same face as RMenv.D 7. The stone is broken at one end and parts of both (?) texts have been lost. Both texts are in broad scratched letters. The line below RMenv.D 6, which has been read with it, could equally well be the end of RMenv.D 7, or part of a separate inscription.

Provenance:
Unspecified site, unspecified region, unspecified country.

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0035867.html
RMenv.D 7

l s¹ʿd bn lʿṭmn w ḫrṣ ‘h m- mdbr f h [----]

By S¹ʿd son of Lʿṭmn and he was looking out for his brother [coming] from the inner desert and so O ----

Commentary:
On the same face as RMenv.D 6. The stone is broken at one end and parts of both (?) texts have been lost. Both texts are in broad scratched letters. The line below RMenv.D 6, which has been read with it, could equally well be the end of RMenv.D 7, or part of a separate inscription.

Provenance:
Unspecified site, unspecified region, unspecified country.

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0035868.html

RMenv.D 8

l ṭm bn ṭm bn s¹ny q- l ngbr w sy(r) (m-) bdr s¹nt h- mmtt

By ṭm son of ṭm son of S¹ny of the lineage of Ngbr and (he came to water) (m-) bdr s¹nt h- mmtt

Commentary:
In lightly incised letters around the edge of one face of a stone. The s¹ of s¹nt looks more like a m.

Provenance:
Unspecified site, unspecified region, unspecified country.

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0035869.html

RMenv.D 9

l bqmh m- ‘blt

By Bqmh from ‘blt

Commentary:
Direct-hammered letters within a cartouche. For ‘blt as a place-name see C 1868 and possibly WH 1902.

Provenance:
Unspecified site, unspecified region, unspecified country.

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0035892.html

RMenv.D 10

l ns¹k bn kʿmh bn šḥbn bn kбрt bn ṭr bn ḫbt bn ḫ(n)yṯ bn ḥrm bn ḏf

By Ns¹k son of Kʿmh son of Šḥbn son of Kbrt son of ṭr son of ḫbt son of ḫ(n)yṯ son of ḥrm son of ḏf

Commentary:
On the same face as 11. The beginning of the text is scratched the middle incised and the end chiselled.

Provenance:
Unspecified site, unspecified region, unspecified country.

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0035945.html

RMenv.D 11
Corpus of Safaitic inscriptions

l’dλ b’n ’sïlm
By ’dλ son of ’sïlm

Commentary:
In lightly scratched letters running to meet the end of RMenv.D 10. The last two letters are not visible on the photographs and are taken from the copy.

Provenance:
Unspecified site, unspecified region, unspecified country.

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0035946.html

RMenv.D 12
lwhbn b’n ’lh(t)
By Whbn son of ‘lh(t)

Commentary:
RMenv.D 12 to 14 are on the same face. This text is on the left of the face. The penultimate letter is only partially visible on the photograph and has been read from the copy.

Provenance:
Unspecified site, unspecified region, unspecified country.

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0036056.html

RMenv.D 13

RQA 1
l ṣt bn ms¹k bn ḥṛg bn ḥt w s²ry h- frs² m- mlk b- s²r n mny

By Ğt son of Ms¹k son of Ḥṛg son of Ḥt and he bought the horse from Mlk for twenty minas

Commentary:
The text is written in large incised letters around the drawing. There is a clear distinction between b and r in this text, except it seems and the first word of the narrative which looks like s²ry where the sense demands s²ry “he bought”. The only other record in the Safaitic graffiti of the purchase of a horse (this time for five minas) is C 3916.

Provenance:
Ruğm Qaʿqūl A, Rif Dimašq, Syria

“Ruğm Qaʿqūl A” is about 900 m to the south-east of the Ruḥbah water tower, on the right bank of Wādī Shām before it arrives in the Ruḥbah. It is a large cairn with a few ruined houses and very few inscriptions. The name “Ruğm Qaʿqūl” was applied by nineteenth-century visitors to at least four large outcrops at the southern end of the Ruḥbah, to the south and south-west of the modern water tower. This helps to explain the curious fact that there is no overlapping between the “Ruğm Qaʿqūl” copies of de Vogüé ( de Vogüé 1868-1877; nos. 212-215, 217, 219-224, 226-234, 389) and Waddington ( de Vogüé 1868-1877; nos. 235-253, 388, 390-393, 397-400), Wetzstein (1860; nos 41-48, and at “a mound 10 minutes from Ruğm Qaʿqūl”, nos 68-88) and Dussaud/ Macler (1903; nos 30-51, 53-124), and only in a very few cases between those of de Vogüé and Waddington. We only identified the site visited by Wetzstein (Ruğm Qaʿqūl A) and by but have
not yet found those where de Vogüé/Waddington and Dusaud/Macler worked. The inscriptions we found at Rijm Qaʿqūl A were all texts copied by Wetzstein and no one else. It is likely therefore that this is the place he regarded as "Rijm Qaʿqūl".

RQ.A 10

\[\text{l m's}k \text{bn h(d) bn s'ḥr bn ḥd bn mhrb d- 'l fr[t] w [ ][][]s'ṛ t l- mlk h- s'ṭtn s'n(t) bḥnr 'ml---- lmsy ḥ b- {'][s]r [ṛfr]mfn w b- mʾ f'y frs}

By Ms'k son of {ḥd} son of S'ḥr son of Ḥd son of Mhrb of the lineage of {Fr[t]} and he served [in an army unit] under the possessor of authority [the year] Bḥnr 'ml---- lmsy with {ten} {archers} and with two hundred horsemen.

**Commentary:**
The text is carved in a semi-square version of the script around a small drawing. Parts of the text are badly abraded. The first ḥd has a stray line, thicker than the letter, in the h, and a crescent, again in thicker lines,
above the d. A second w was carved before s'rt but was then cancelled with three lines crossing it. The h-
before s'ltn was originally carved as a ‘ and its lower fork was then scratched over. Unfortunately, the let-
ters after bnhr are extremely difficult to interpret and it can be seen on the photographs that the letter
which was read as k in our initial reading, followed by Al-Jallad (2015: 276), is of a completely different
shape to the other examples in the text and both this letter and the one before it have been damaged. It
should also be noted that Al-Jallad’s reading (2015: 276) omits the letters lmsy after the supposed ‘ml[k].
The expression s’rt ‘l- occurs in two other Safaitic inscriptions, in one, KRS 1024, we find s’rt ‘l- hr hdy
which we have translated “he served (under) Ḥr the commander”, literally “he served, Ḥr being
commander”, compare Arabic “alay-hi amrn” “command lies upon him, he is in command” (Lane 2145a and
see Macdonald 2014:160, n. 78). The other occurrence is in C 2076: s’rt ‘l- (ḥ)dd ḥgr b- ḱf rgū w m’t [r]s’t
“he served [in an army unit] on [literally against] the borders of Ḡgr with a thousand foot soldiers and a
hundred horsemen” (see Macdonald 2014:160, n. 78). In the present text we follow Al-Jallad’s translation
(2015: 149), rather than those proposed in Macdonald 2014:160, n. 78. The end of the inscription, b- ([s]t)r
[r]m’n w b- m’t y frs’t, appears clear despite the two damaged letters in ‘sr. These were previously thought
to be the letters ‘z and it was suggested that they may have been used as numbers (Al-Jallad 2015: 93–94).
However, it now seems more likely that they are part of the word ‘sr and that the [r] of the following word,
rm’n, assimilated to the [r] of ‘sr. Al-Jallad has explained rm’n as derived from rmy “archers” or “lancers”

Provenance:
Rūjīm Qaʿqūl A, Rif Dimašq, Syria

“Rūjīm Qaʿqūl A” is about 900 m to the south-east of the Rubbah water tower, on the right bank of Wādī Shām
before it arrives in the Rubbah. It is a large cairn with a few ruined houses and very few inscriptions.
The name “Rūjīm Qaʿqūl” was applied by nineteenth-century visitors to at least four large outcrops at the
southern end of the Rubbah, to the south and south-west of the modern water tower. This helps to explain
the curious fact that there is no overlapping between the “Rūjīm Qaʿqūl” copies of de Vogüé (de Vogüé 1868–
388, 390–393, 397–400), Wetzstein (1860: nos 41–48, and at “a mound 10 minutes from Rūjīm Qaʿqūl”, nos
68–88) and Dussaud/ Macle (1903: nos 30–51, 53–124), and only in a very few cases between those of
de Vogüé and Waddington. We only identified the site visited by Wetzstein (Rūjīm Qaʿqūl A) and by but have
not yet found those where de Vogüé/Waddington and Dussaud/Macle worked. The inscriptions we found
at Rūjīm Qaʿqūl A were all texts copied by Wetzstein and no one else. It is likely therefore that this is the
place he regarded as “Rūjīm Qaʿqūl”.

RQA 11

l --- ṭrn bn s'ḥr bn ḥd ----

By (Rtn) son of S'ḥr son of Ḥd

Commentary:
In small letters on a broken segment of the same stone as RQA 10.

Provenance:
Riǧm Qaʿqūl A, Rif Dimāq, Syria

"Riǧm Qaʿqūl A" is about 900 m to the south-east of the Rubinah water tower, on the right bank of Wādī Shām before it arrives in the Rubinah. It is a large cairn with a few ruined houses and very few inscriptions. The name "Riǧm Qaʿqūl" was applied by nineteenth-century visitors to at least four large outcrops at the southern end of the Rubinah, to the south and south-west of the modern water tower. This helps to explain the curious fact that there is no overlapping between the "Riǧm Qaʿqūl" copies of de Vogüé (de Vogüé 1868–1877: nos. 212–215, 217, 219–224, 226–234, 389) and Waddington (de Vogüé 1868–1877: nos. 235–253, 388, 390–393, 397–400), Wetzstein (1860: nos. 41–48, and at "a mound 10 minutes from Riǧm Qaʿqūl", nos 68–88) and Dussaud/ Macler (1903: nos 30–51, 53–124), and only in a very few cases between those of de Vogüé and Waddington. We only identified the site visited by Wetzstein (Riǧm Qaʿqūl A) and by but have not yet found those where de Vogüé/Waddington and Dussaud/Macler worked. The inscriptions we found at Riǧm Qaʿqūl A were all texts copied by Wetzstein and no one else. It is likely therefore that this is the place he regarded as "Riǧm Qaʿqūl".

RQ.D 5

lʾʾnʾm bnʾmigntybnwḥsʾbnwʾlwngfʾlʾbtʾḥdlmnʾgmsʿḥ

Byʾʾnʾʾm son ofMignty son ofWḥsʾson ofWʾlwndhegrievedinpainforhisimmediatefamilymanyofwhomwerelost

Commentary:
See the commentary to 3. This text is lightly scratched and written boustrophedon. Note the curious form of theḥinWḥsʾ, which looks more like aḏ. There is an extraneous scratch, which is lighter and thinner than the lines which make up the letters running from theʾ ofngʾ and across theg, making theʾ look at first sight
like a y. In view of the gender of ḏll, bt presumably represents ṣbayt “immediate family, tent-group” rather than bint “daughter”. The passage ḏll mn- gm- ḥ would seem to mean literally “lost from much of it”, that is “much of which was lost”. The passive participle ḏll is used in Safaitic both of those who are lost and of those who are dead and it is not possible in this context to say which is intended here. For gm compare Arabic ġammm “many, much” (Lane 449a).

Provenance:
Rīǧm Qaʿqūl D, Rif Dimashq, Syria
“The name ‘Rīǧm Qaʿqūl D’ is a low outcrop with cairns and ruined structures about 100 metres south of the water tower at the Ruhbā. None of the inscriptions found here had been published. By Mrʾ son of Gnnʾl son of Mrʾ son of Sʾf and he anticipated the affliction of enemies and ---- O Lt deliver Šgr and misfortune be to them who seek [to cause] affliction
Commentary:
On the same small stone as RR 1, 2 and 3. This text starts at the right side, above 3, running from right-to-left. But half way across the face it turns up and runs back to the right edge where it turns left and runs along the top of the face to the left edge where it turns down. The translation is that in Al-Jallad 2015: 276.

Provenance:
Rūjīm al-Ruṣayʿī, Site 21, Al-Suwaydah, Syria
Site 21 is a large cairn with many inscriptions of which Littmann copied only 5. It is c. 1.75 km, as the crow flies, from Bīr al-Ruṣayʿī, around which there are many cairns, and it is not clear why this one was given the name Rūjīm al-Ruṣayʿī. The local Bedouin do not appear to know it as this today. Two texts from this site are clearly identifiable as LP 169 and 170 respectively, and another as LP 174, all from Rūjīm Ruṣayʿī.

On the same small stone as RR 5 to 9 and 11. This text is a fragment scratched in large letters running left-to-right between the ends of 8 and 9. Nothing else visible on the photographs.

Provenance:
Unspecified site, unspecified region, unspecified country.

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0036101.html

RR 11

l nkf bn ----

By Nkf son of

Commentary:
On the same small stone as RR 5-10. This text is a fragment scratched in large letters running vertically upwards to meet (and cross?) 10.
Corpus of Safaitic inscriptions

Provenance:
Unspecified site, unspecified region, unspecified country.

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0036102.html

RR 14

[----] wrd bn’s bn h(ṣ) w r’y h-’bl f h lt s’tlm w ġyrt

---- Wrđ son of ’ṣ son of Ḥg and he pastured the camels and so O Lт [grant] security and abundance

Commentary:
On a broken stone with RD 11 and RR 15. Parts of both inscriptions are lost.

Provenance:
Unspecified site, unspecified region, unspecified country.

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0036105.html

RR 15

[----] ’lh bn’n’m h-ḥṭṭ

---- ’lh son of ’n’m is the carving

Commentary:
On a broken stone with RD 11 and RR 14. Parts of both inscriptions are lost.

Provenance:
Unspecified site, unspecified region, unspecified country.

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0036106.html

RR 16

{l} {j}{d}{r} {b}{n} zh{k} bn m----{r} w h rdy ‘wr ḏ y’wr h-ḥṭṭ

By ’d’r son of Zhk son of M----R and O Ṛdy blind whoever scratches out this inscription

Commentary:
On a large stone with RD 6. This text is chiselled around the drawing, starting in the top left hand corner. RR 21 is on another face of this stone.

Provenance:
Unspecified site, unspecified region, unspecified country.

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0036107.html

RR 17

l mtn bn l’tmn bn ’m bn ḥṣ’t{n} w h rdy {n}q’t ḏ y’wr

By Mtn son of L’tmn son of ’m son of (Ḥṣ’tnn) and so Ṛdy may whoever erases [it] be thrown out [of their grave]

Commentary:
On another face of the rock bearing RR 16 and RD 6.

Provenance:
Unspecified site, unspecified region, unspecified country.
Corpus of Safaitic inscriptions

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0036247.html

RR 18

l ḡyrʾl ṣb(n) 'm bn rwh bn bʾlh bn 'nʾm bn rbd w wrd ṭrbš f h bʾlsʾmn rwh

By ḡyrʾl son of 'm son of Rwh son of Bʾlh son of 'nʾm son of Rbd and he came to water at ṭrbš. So, O Bʾlsʾmn [grant] relief from adversity and uncertainty

Commentary:
On a small stone bearing RR 19-21 and RD 7, which has been superimposed on parts of 18, 19 and 21. This text begins in the bottom right hand corner (on the photograph) and runs up the right side of the face and across the upper centre and then doubles b

Provenance:
Unspecified site, unspecified region, unspecified country.
