Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-Ṭāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-\'Isawi, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-\'Isawi is the name of a probably ancient well between two headlands on the eastern side of the Wadi Shama as it runs northwards from the modern Al-Namarah dam to the Ru\'bah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined
and with stone water-channels running from it. The main concentration of published inscriptions is on the
top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the
well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī, Rif Dimaṣq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wadi Shām as it runs northwards from the modern Al-Namārāh dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿIsawi is the name of a probably ancient well between two headlands on the eastern side of the Wadi Shami as it runs northwards from the modern Al-Namarah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsawi is the name of a probably ancient well between two headlands on the eastern side of the Wadi Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī, Rif Dimaq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the
well and on the southern headland, on the crest of which is a stone tower.

**Is.K 8 (LP 987 + 986)**

\[l ḥn bn bġd (b)n ml bn ʿml\]

By Lḥn son of Bġd (son of) Ml son of ʿml

**Apparatus Criticus:**
LP: The first two names of the text are read in LP 987 and it seems likely that LP 986 is the last part of the text read in the opposite direction although LP's copy is written in a straight line without bn 'ml occurring at an angle to the rest. LP 986 is read ḥ my bn gml. RyLPAdd p. 350 LP 986: ḥy for my. JSafN p.11 n.18: l my bn 'ml.

Commentary:
The third bn and fourth name are written at an angle after the ʿ of bġd rather than straight on from the second name where there would have been plenty of room. It is possible that the name ml is an error and the author realising that he had left out the ʿ wrote bn and the correct name at an angle to rectify his mistake.

Provenance:

Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

**Commentary:**
The text is on a rock which was probably moveable but which is now firmly wedged in the ground next to H 3-H 11. It is difficult to see anything after the n because of the angle but it is most likely the author did not complete the text because of the pitting in the rock after the n.

**Provenance:**

Al-'Isawi, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-'Isawi is the name of a probably ancient well between two headlands on the eastern side of the Wadi Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

There is a hammered dot between the first and second z which is probably extraneous to the text.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Rūḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī
Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

**Provenance:**
Al-ʿĪsāwī, Rif Dimašq, Syria

**Commentary:**
Associated drawing to be numbered. There are traces of further letters after the m and of another text to the left of the drawing.

**Is.K 148**

**Provenance:**
Al-ʿĪsāwī, Rif Dimašq, Syria

**Commentary:**
The text is surrounded by a cartouche and there are some lines scratched over the first part. Cf LP 1069 (= Mu 336) (M&Mu)

Corpus of Safaitic inscriptions

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

*i mnʾ bn nnḥ (t) b[n] (w)----*

By Mnʾ son of (Hnḥt) {son of} {W----}  

**Commentary:**
The shape of the fourth letter of the second name is unusual. There seems to be a loop at the top but it is uncertain because of a later abrasion. The bottom part has what might be an unfinished loop and it is possible it should be read as a t. The text is very worn after the w and there are traces of another text written horizontally through the drawing.

**Provenance:**

Commentary:
The text is surrounded by a cartouche with seven lines attached.

Provenance:
Al-ʾĪsāwī, Rif Dimašq, Syria

[Latitude/Longitude: 32.903569 / 37.320314]

Al-ʾĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Area A. By the same author as L 8 (which is on a contiguous large stone) and by the father of the author of L 6 (which is on the same stone). The drawing on this stone appears to be claimed by the authors of L 5 6 and 8. However since the word ḫṭṭ can refer to both inscriptions and drawings it is not certain whether any or all of them are claiming the picture. Associated drawing to be numbered.

Provenance:
AlʿĪsāwī, Rif Dimašq, Syria

I ṭn[m] bn ḫs² bn ws¹m h-ḥ[f-]---- is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namařah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

l ẓnnʾl bn ʿsmʾn bn ṭḥwm

By Ẓnnʾl son of ʿsmʾn son of ṭḥwm

Apparatus Criticus:
LP 1073: ʾṣbʾn for ʿsmʾn and {ʾṣ¹}<g>lm for ṭḥwm.

Commentary:
Area A. One of the forks of the two ‘s is closed by carving a line between the branches of the fork thus forming a triangle. Despite this peculiarity they are different from the ṣ which has a semi-circular (and not triangular) loop. It is possible that the ṭ of ṭḥwṃ is in fact an ‘ or even a ā with both loops closed but as the author has apparently tried to avoid confusion it is more likely to be a ż.

Provenance:
Al-ʿIsawi, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿIsawi is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. By S²kr son of ‘mn son of (Bql) son of M’n’il

Commentary:
Area A. The l of Bql is not very clear on the stone. There are possibly two letters scratched under l s²kr but they don’t make any sense. See also Photo Misc PH 26.

Provenance:
Al’Isawi, Rif Dimashq, Syria

[Latitude/Longitude: 32.903569 / 37.320314]

Al’Isawi is the name of a probably ancient well between two headlands on the eastern side of the Wadi Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined
and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

l grmʾl bn dʾb bn kn w wsʾq - h- sʾl b- rʾ {{h-}} gml sʾnt wsʾq ʾl qdm ʾl hrm f ḥ lt sʾlm

By Grmʾl son of Dʾb son of Kn and tuberculosis injured him at the year the ṣ Qdm contended with the ṣ Hrm and so O Lt [grant] security

Commentary:
Area A. It seems that the author initially wrote a b or a r instead of a y in b- rʾy and then made a loop out of the angle of the of the b/r. The n and the t of sʾnt have been scratched over and rewritten (by the author?) just below the two letters. h- sʾl might be equivalent to Ar. sīl = “tuberculosis”?! However in view of the interpretation of b- rʾy gml Littmann’s interpretation from Ar. sayl = “flash-flood” is more appropriate. The phrase b- rʾy gml also occurs at the end of SIJ 827 (not read by SIJ but visible on the photograph) in the sentence w syr m- mdr b- rʾy gml. Littmann’s suggestion that it was a place name meaning literally “s [not “the” as in LP p. 117] watering-place of camels” with rʾy being from the root rwy and meaning “watering place” is accepted laute de mieux. Indeed this would fit most of the other instances of rʾy as well. See also Photo Misc PH 20 for the part of the text from kn to b- rʾ.

$l\text{zn'}b\text{lm bn grm'}l\text{bn }d'b\text{ bn }{k}{'n}$

By $\text{zn'}b$ son of $\text{lm}$ son of $\text{grm'}l$ son of $d'b$ son of $\{ Kn\}$

Apparatus Criticus:

LP 430: bl$ for \{kn\}$.

Commentary:

Area A. The stem of the second letter of $\text{zn'}b$ is not as long as it appears at first glance. It was extended up in alignment with it and a more thinly scratched line running round the $z$ was then drawn to join it with the lam auctoris. The very thinly scratched line which crosses the $g$ is extraneous. The third prong of the $d$ is joined to the previous letter. The reading of the last two/three letters is not completely certain: it is possible that the join between the curving part of the $k$ and the vertical stem which follows is accidental (it continues beyond the vertical line and touches the last letter). Five $m$ of various sizes have been incised on the same face of the stone four of them partly or completely covering the text.

Provenance:

Al-ʿĪsāwī, Rif Dimašq, Syria

I[ ]{d}{t} h- bkrt

{By} {dt} is the young she-camel
Commentary:
Area A. The initial letters are preceded by a flattened circle which could possibly be a bn with the n attached to the b and it is thus possible that this text the presence of which at this point on the stone is very odd is in fact the continuation of the genealogy of the author of L 121. No satisfactory explanation can however be offered to explain why he would then have repeated h- bkrt which is very thinly scratched. See L 121.

Provenance:
Al-ʿĪsāwī, Rif-Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. l 'mr bn ḫmyn w l ġdr mn- {s²}n'
By 'mr son of ḫmyn and he shall not be found wanting in the face of {enemies}

Apparatus Criticus:
LP 475: w ḡnbb mn bn <h> for w l ġdr mn- {s²}n'

Commentary:
Area A. The text is written on the ridge between two faces of the stone. LP’s reading is impossible. The letter before ġdr is too long for a n (see previous n). The s² has no zig-zags. The b and the h are 90°. We have taken the l following the w as representing the negative particle là appearing here for the first time in Safaitic which in Arabic is used with the perfect in assertions when an occurrence is considered "so certain that it may be described as having already taken place” [Wright ii 2A]. The asseverative quality of the statement has been represented in our translation by the use of the auxiliary “shall”. ġdr would be equivalent to Ar. ǧaddara “he fell short of what was requisite he was cowardly” [Lane 2266b] with mn in the sense of “as regards to” hence “in the face of”. Alternatively it could be the equivalent of ǧaḍara/ ǧadr “to turn aside” though in Arabic this takes ‘an rather than mn [Lane 2266a]. However if the l after the w is taken as a second lâm auctoris introducing a second author cf. L. 284. But then the rest of the text is incomprehensible. ġdr could = Ar. ǧaḍar “prosperity”

Provenance:
Al-'Isāwī, Rif Dīmaṣq, Syria

\[l \ z(l)l \ bn \ whb'l\]

By Z'I\(l\) son of Whb'l

**Apparatus Criticus:**

LP 478: s'I\(l\) for z(l)l. LP 946: z(d)l for z'I\(l\); whb('l) corrected from whbd on the copy.

**Commentary:**

Area A. The second I is as long as the lām auctoris whereas the n is much smaller. The reading of whb'l implies that the vertical stroke attached to the ' does not belong to the letter. It is also possible that the author wrote this stroke as the final I but that finding it confusing he traced a second one above and at right angles to the letters wh. The identification of this text with LP 946 is certain the copyist taking the ' and the line attached to it as a d. He also copied L 130 [= LP 945] which Littmann had missed. It is not clear why this copyist chose only these relatively insignificant texts from among the 11 on this rock.

**Provenance:**

Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

**Is. L 263**

l {r}{b} bn nhb h-ḥkrt

By {Rb} son of Nhb is the young she-camel
Corpus of Safaitic inscriptions

Commentary:
Area B. The author's name is not certain since the b is written within the curve of the r and so together they resemble a m. They are not joined at the bottom but the tops of the lines have been destroyed by a chip in the rock and so it is impossible to be certain that this is correct. Like 262 this text was clearly written after the drawing had been carved. Since the authors appear to be brothers and both claim the drawing it is possible that s[lm] was responsible for drawing the man and Rb for the camel.

Provenance:
Al-Tsawi, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-Tsawi is the name of a probably ancient well between two headlands on the eastern side of the Wadi Shamm as it runs northwards from the modern Al-Namarah dam to the Ruhab. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-‘Īsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

ḥ rdw ḫb l-ṣdm nqmt mn ’ṣ¹d ’bl-h

O Rdw grant Qdm vengeance on ’ṣ¹d [for or in the form of] his camels

Commentary:
Area B. The m in mn is 90°. The b of ’bl has been partly hammered over giving it the appearance of a k and a short stroke has been added to the hook of the l in the same word. This inscription must have been written before 315 since that text is forced to swerve to the left to avoid the final -ḥ of 319. The reading seems clear but it produces an apparently awkward construction.

Provenance:
Al-ʾĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʾĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namāraḥ dam to the Rubbah. [Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

l dhʾr bn ḥwd bn ḥy

By Dhʾr son of Ḥwd son of Ḥy

Apparatus Criticus:
LP 939: dhʾ(ʾr) for dhʾr.

Commentary:
The “short stroke” which Littmann converted into a t is in fact the continuation of the longer stroke which he took as al. There is a small dip in the surface which can put into shadow the join between them. The apparent continuation of the lower line beyond the join is in fact part of the crack in the rock which runs from the upper fork of the ʾḫ across the r and then back across the lower fork of the ʾḫ. Although not shown on the copy in LP the cross-bar of the y of ḥy is clear in this text though obscured by a chip in M 30.

Provenance:
Al-Iṣāwī, Rif Dimashq, Syria

l grmʾl bn bhm bn ʾlwhb bn ʾsʾwd

By Grmʾl son of Bhm son of ʾlwhb son of ʾsʾwd

Commentary:
The first two names are chiselled and the last two lightly incised. The identification of this text with LP 936 and 937 cannot be completely certain given the crudeness of the copies made by Littmann's companions. But the fact that LP 936 and 937 contain the genealogies in the two halves of M 42 suggests that it is very probable. On the other hand the copies of LP 936 and 937 do not read boustrophedon at least in the form in which they are published.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria

l hwhb bn 'zz bn yz'm

By 'hwhb son of 'zz son of Yz'm

Commentary:
The text was carved in a number of techniques. The first two letters were direct hammered and the lower hook of the ' was then extended by incising with a broad point. The next three letters lwh were incised with the same broad point and the left side and cross-bar of the w are formed by less careful multiple incisions. The b of the first name is direct hammered but the bn which immediately follows it is formed by multiple incised lines. The ' of the second name is shallowly incised with a narrow point. The first z was incised with a broad point. The stem of the second seems to have been formed first by a a very finer point and then incised with a different broad point (or the same point held at a different angle). The cross-stroke of the second z is direct hammered. The b of the next bn is formed by multiple scratches and the n by one such scratch reinforced by a line incised with a broad point. The final name is lightly incised with a fine point.

Provenance:
Al-'Īsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-'Īsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Is.M 60

l 'n'm bn 's'wd

By 'n'm son of 's'wd
Commentary:
Given that the inscription consists of only two common names it is difficult to identify M 60 with LSI 111 (= C 3249) or LP 960 with any certainty. It cannot be LP 486 since this is securely identified with L 28 and LP 960 could equally well be H 195. CHECK IF M 60 IS ON THE "SOUTH SIDE OF THE HILL" THE PROVENANCE GIVEN FOR LSI 111. Some of the letters (e.g. the ‘s¹w of the second name) are lightly incised. The rest appear to have been formed by scraping the surface with a relatively narrow transverse point. On the other hand (and perhaps more likely) this effect may be the result of variations in the pressure with which the instrument was applied to the surface since both techniques can be observed in the d.

Provenance:

l ḥmt bn ḥfy bn rbn <<>> bn bny w wgm ‘l- bny

By Ḥmt son of Ḥfy son of Rbn son of Bny and he grieved for Bny

Apparatus Criticus:
LP 322: Ḥm for Ḥmt; [b][n] h bn bn ‘ly w wgm for <<>> bn bny w wgm ‘l bny

Commentary:
There is a small curving line joining the second and third letters part of which Littmann copied and read this as a ‘l. However compare the ‘ of ‘l- which is a full circle. The fifth letter which Littmann read as n has a clear cross-stroke and can only be n. After Ḥbn the text turns sharply back on itself. To the right of the bn which follows rbn there is a ḥ in exactly the same technique as the other letters but which is curiously placed if it was intended to be read as part of the text. Moreover to take it as the first letter of the next name (ḥbn) as read by Littmann not only requires the restoration of a [b][n] between Ḥbn and the ḥ but also an unnatural reading of the letters which follow (Littmann’s ‘ly where the sequence of letters would at best be l’y or y’l). It therefore seems more likely that the ḥ is extraneous to the text (though see below for another suggestion). If this is accepted the text then reads easily rbn bn bn w wgm ‘l-. Despite the fact that there is plenty of room on the face the statement has been written in a tight circle which places the ‘l- immediately above the final name of the genealogy bny. The obvious conclusion is that the author was grieving for bny and by an elegant device made it clear that the bny for whom he was grieving was his great grandfather. Given that the author did this at the end of the text it just possible that the ḥ discussed above is part of an even more elaborate device. If the name ḥbn did indeed occur in the author’s genealogy between rbn and bny it is just possible that he “telescop ed” the five b-n sequences in the three successive names and the two “ ḥbn”s which separated them making the b-n sequences of rbn and ḥbn do duty also for the following ḥbn’s. However this is a far more speculative hypothesis than the reading proposed above and is not supported by the genealogies in M 85.1 and 85.2 which appear to be by brothers of the present author. It would seem therefore that the ḥ must be treated as extraneous to the text. Ḥbn would be so far unattested in Safaitic since the references in HN p. 175 should be deleted. The name in SIJ 550 is clearly ḥrn (which should be added to HN p. 186) and in WH 3685 ḥbn appears to be a substantive.

Provenance:
Al-ʾĪsāwī, Rif Dimashq, Syria

Littmann did not read this text.

Commentary:
The letters are faintly scratched on a face adjacent to that on which LP 316–317 (Is.M 92–93) are carved.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-ʿNamārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

**Commentary:**
The surface of the stone is rough and covered with tiny pittings. The l’s of the second and fourth names are the same length as the n’s and significantly shorter than the lām auctoris. However in M 99 the name of the two authors’ common great-grandfather is clearly hmlt. The verb wgʾ has not been found before in Safaitic. Ar. wala’a is used of gelding goats and it is possible that it could be used with the direct object understood just as the verb vld which is usually found with h- mʿzy as its direct object can sometimes be found alone (e.g. NSR 10 WH 1114).

Provenance:
Joined at both ends by slightly thinner lines probably by a brother of the author of M 102. The first letter is badly damaged by abrasions. The n of bn was joined at both ends to the b by slightly thinner lines.

Commentary:
The first three visible letters are written very close together and an abrasion half way down their stems gives the impression that they are joined i.e. that they are one letter ʿ. The text appears to begin on the adjacent face but the letters there are too faint to be read. The author appears to have omitted a connective after ml as well as the g-m of wgm and the l of the following ʿl- and added them above the line. However none of these interpolations is clear. The g if that is what it is considerably smaller than the ʿ's of the two ʿl's. The m if that is what it has a cross-bar which makes it look like a w. The l is crossed by a stray diagonal scratch giving it the appearance of a tiny h. Finally there is an extraneous more recent triangular mark just above the ʿ of ʿb-h. The ʿ of the ʿl- is the same size as and a similar shape to the m of wgm as is that of the second ʿl-. While the name s¹k is attested in Safaitic it is possible that the author also omitted a m at the beginning of this name.

Is.M 106 (LP 424)
l mlk bn ʾgyrʾl bn nhb w ngr s¹nt ngy mlk s¹lt
By Mlk son of ʾGyrʾl son of Nhbb and he kept watch the year that Mlk retained power

Apparatus Criticus:
LP 424: mn h- s¹lt for mlk s¹lt

Commentary:
The letters are entirely clear and Littmann’s reading is impossible. The interpretation of the dating formula is difficult. The simplest translation “the year that Mlk rescued s¹lt” is unfortunately unlikely since the use
of of the term sultan as a personal name is not attested until late in the Islamic period. On the other hand, s¹ltn meaning “imperium” in Safaitic is defined in all other examples except one (C 66) where the copy has s¹nt ngy ---m s¹ltn in which the m is probably the preposition meaning “from” but could be the end of the previous word the rest of which is lost in which case it would provide an exact parallel to our text but would be of no help in elucidating it. In all other cases s¹ltn is defined and when following the verb ngy it is preceded by the preposition m(n)- (e.g. LP 540 s¹nt ngy m-nmrt h- s¹ltn). In Arabic and apparently in Safaitic the verb ngy in the I Form means “to be rescued/escape from (mn-) something” and the II Form means “to rescue (someone) from (mn-) something/someone”. We would suggest very tentatively that here ngy mlk means “Mlk was saved” and that s¹ltn is an adverbial accusative (equivalent to Arabic sulṭān) “as regards political power”. In this case mlk must be a personal name since if it represented the title “king” it would have to be defined. Given that s¹ltn seems to be used of state rather than individual power and the fact that the only rulers in the region who we know used the personal name Mlk were the Nabataean kings it is probable that this text refers to one of the Nabataean monarchs of this name either Malichos I (c. 58-30 BC) or Malichos II (AD 40/41-70/71). Malichos II’s name was in fact written Mlkw in Nabataean a form which appears in Safaitic in the forms Mk and ‘bd-mk. It is therefore possible that this text refers to one of several known incidents in the reign of Malichos I or one of others unknown. One possibility is the war between Herod the Great and Malichos I in 32/31 BC the final battle of which took place near Qanawāt. According to Josephus Herod at first beat the Nabataeans but the latter were saved at the last minute by Cleopatra’s general Athenion who attacked and routed the Jewish army just as it was celebrating victory. Josephus notes that the latter “received a great loss in places where the horses could not be of any service and which were very stony and where those that attacked them were better acquainted with the places than they themselves” ([AJ v.1]). Josephus comments “the Arabians [i.e. Nabataeans] had unexpectedly a most glorious success having gained that victory which of themselves they were in no way likely to have gained” (ibid.). On the other hand he gives no indication that loss of this battle would have resulted in the removal of Malichos from power.

l ms k bn ʾbrqn h[n] {m}s j k w rʾy h- qʿn sʿnt sʿrt mlk b- h- ῞rd f Ὸlt sl lm

By Ms k son of ʾbrqn son of {Ms k} and he pastured the sheep the year Mlk served in the great army and so O Lt [grant] security

Apparatus Criticus:
LP 326: sʿnt sʿr (h-) mlk b- h- ῞rd "the year in which the king travelled in this valley (?)".

Commentary:
The inscription was carved after the drawing and M 112 which it carefully avoids. The s is of the third name is attached to the y of yʾwr in M 112 and the letter(s?) before it is(are) damaged by abrasions. The word after sʿnt is clearly sʿrt (on both the original and Littmann's copy) and LP's reading sʿr h- mlk is therefore impossible. For our interpretation see MiBS p. 468. The last three letters are scratched.

l ns²⁻¹ bn s’wr bn s²dy w wg’ ‘l- bny ūḥt -ḥ f m{k}{m} h- “lḥt

By Ns²⁻¹ son of S¹wr son of S²dy and he was sorrowful for the little son of his sister and so ---- the gods

Commentary:
Byn could represent either the diminutive (cf. Ar. bunayy) or the oblique case of the plural (cf. Ar. banj). The latter would however require the assumption that what is a final long vowel in Arabic was a pronounced as a consonant in Safaitic. The is the first occurrence in Safaitic of the plural of ʿlh “deity” cf. Ar āliha. The preceding h could be either the vocative particle or the definite article depending on the interpretation of the preceding word the second and third letters of which are obscured by an abrasion (see SEMB96 22:22 for best view of this passage).

Provenance:
Al-ʿĪsawī, Rif Dimashq, Syria

l ḥgm bn s²r bn ḥṭ

By Ḥgm bn son of S²r son of ḥṭ

Commentary:
No letter is visible in the space between the r of the second name and the following bn. The third name was read on the stone as unquestionably ḥṭ and it was noted that the line which appears to join the tops of the r and the l of this name is a recent abrasion. The name ḥṭ is unattested but cf. Ar. ḥṭt “toothless”.

l ʿqrb bn mlk bn (wḥ)bhlḥ w ṣgm ʿl-ʾb -h w ḏṭn h- ṣʾfr

By ʿqrb son of Mlk son of ḡblḥ and he grieved for his father and 0 ḏṭn [protect?] the writing

Apparatus Criticus:
LP 341: w (ḥ)ṭ h- ṣʾfr “and he made this new inscription” for ḏṭn h- ṣʾfr

Commentary:
The initial letter of the first name and the first two letters of the third name have been have been damaged by heavy over-hammering but are still visible. The “ of ʿqrb is a circle not a “dot” as suggested by Littmann. The invocation is absolutely clear on the stone and what Littmann considered to be a “flaw in the stone” following the ṭ is in fact a n. Thus the prayer is address to the deity ḏṭn found in other texts at al-ʿĪsāwī. Whether the verb has been omitted or is to be understood or the prayer is simply calling the deity’s attention to the inscription is unclear.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. l Ṽ s¹ bn w ḥ bn s² hyt bn s¹ ny w Ṽ rm
By Ṽ s¹ son of W ḥ son of S² hyt son of S¹ ny and he grieved (for) his two brothers for Ḥn and for Wrm

Apparatus Criticus:
LP 386: Ṽ for Ṽ s¹; Ṽ rm for Wrm. LP 1101: s² hyt (t) for s¹ hyt; w[g]m for Ṽ rm; Ṽ l for Ṽ l; Ṽ h (w) for Ṽ w - Ṽ h; Ṽ m for Ṽ rm

Commentary:
The text was incised with a broad point. The third letter could be ḥ or s¹ but its size in relation to the previous Ṽ and compared to the ḥ later in the text suggests that it is more likely to be s¹. From the position of the Ṽ r of the final name it would seem that the author originally omitted them and then inserted them below the line. Littmann’s reading ‘mr is less probable since the r is placed before the m. As Littmann notes this
Corpus of Safaitic inscriptions

The text shows clearly that the dual of ʾḥ in annexation is ʾḥw. Littmann did recognize the identity of LP 386 and 1101 and his reading ʾḥ-h ṻ was based on the assumption that the order of ʿ and Ṽ had been inadvertently reversed by the author or the copyist.

l ḥḥf bn bʿr bn zbdʾl bn s²mt w ḥ/ ṣr f h l t s¹lm m- bʾs¹ w mn- ḥlt

By Ḥḥf son of Bʿr son of Zbdʾl son of S²mt and he spent the season of the later rains in this valley and so O Lt [grant] security from misfortune and from an attack

Apparatus Criticus:
LP 374: mn ḥlt “from cunning” for mn ḥlt “from an attack”

Commentary:
See the commentary to M 142. The final phrase was read m- ḥ/ ṣr ūnt on the original and this would presumably mean “from this drought” (cf. Lane 1448a-b). While the expressions ṣr ūnt (or rwh ḡnmt etc.) h/ ūnt (meaning “this year”) often appear in prayers ṣr ūlm m- ṣr ūnt would be unique the nearest comparison being h l t s¹lm w ḥlšt m- s¹nt bʾs¹ in WH 2110. However on the photographs it is clear that what was taken as the side-stroke of the h is not joined to the stem and that Littmann’s reading mn- ḥlt is equally possible. His translation however seems most unlikely and we would propose “from an attack” based on hallah (pronounced hallī) “attack” (Landberg Glossaire de la Langue des Bédouins ’Anazeh p. 13) possibly related to ḥlā or ḥwla “strength might force” (Lane 675c 688c)?

Provenance:

By Sʰy son of Sʰr son of ḍm son of Ms¹k and he grieved for ḥq[[][]]w and for ḥmlt and for ---

Apparatus Criticus:
LP 356: (')[qwm for ḥqw[[][]]m; w '][l-'] ln ---- for w 'l- ----

Commentary:
Although he copied M 144 and 147 Littmann seems to have ignored all the other inscriptions on this stone (i.e. M 145-146 148-151). Unlike the rest of the text which is incised the letters of the second name are scratched and Littmann apparently did not see and therefore did not copy the ḥ which is particularly faint. He therefore suggested that the ḥ was a monogram of ḥ and ḫ. In fact the ḫ is larger even than the ḥ and forms a link between the first two lines of the text. Littmann regarded ḥqwm as an error for ‘qwm citing w ḥwṃ ‘твержда ‘qwm in LP 410 and ḫl ‘q[w] m in 411 to which one might add w ḥwṃ ‘ḥmlt w ‘q’m in M 150 (on the same stone as this text) but there is nothing to indicate that the same person is referred to in all four texts. However the author did make two errors. He wrote the q of ḥqwm twice making a feeble attempt to erase the second. He also wrote ḥ for l in the second ‘łat. The final name is very faintly scratched and is illegible.

Al-Tašawi is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

**Commentary:**
Associated drawings to be numbered. Littmann’s copy joined parts of three letters from M 148 (the rest of which he did not record) to the tops of the b-d’ of bd’

By ḌṬ son of S’hr son of ‘bd son of Ms’k son of S’rb son of Īlmmt and the first rains began and so O LT [grant] security and he pastured the sheep.

**Apparatus Criticus:**
LP 355: w[b]{(f)}(d) {-h} h-ḥrf “and the autumnal rain drove him away” for w bd’ h-ḥrf

**Commentary:**

By (Ly3) son of Bny son of S’hṛ son of ‘bd and he spent the night here and he fed on dry fodder the camels born [or who had given birth] at al-Namāra in a time of abundance and (his) {goats} {failed to multiply} ---

**Commentary:**

The reading of the first name is very difficult and lys1 is suggested very tentatively. The first two letters touch each other and the “s’t” which is made up of one straight and one curving line could be a k. The sign immediately following the s may be the last letter of the text. Neither lys nor lyk are attested but cf. perhaps Ar. lays “courage” or lāka “to chew” (?). Littmann copied part of the f of ‘f and part of the following h and the m of mrḥt as belonging to letters in LP 355 (M 147). The word mrḥt recurs in LP 357 where Littmann took it as representing the fem. pl. of the active participle of the IV Form of rb ‘mirḥāt (Vocabulary p. 342b) and translated it “spring camels” without explaining quite what he meant by this. As Musil explains “in the inner desert the word ṭḥ does not signify a season of the year” but the abundance following good rains at any season “it is therefore impossible to translate it by the word spring as we may when we are dealing with the settled and cultivated territories. The felāḥān inhabitants of the cultivated territories enjoy the ṭḥ from year to year and as it always begins at the same season the ṭḥ for them signifies the spring” (Rwala p. 13-14). According to Lane (p. 1017b-c) ruba signifies “a young camel brought forth in season called ṭḥ” [of which the fem. pl. is ruba’a’] though Musil says that the Rwala give this name to a she-camel in her sixth year which is when she may first be covered by the male (Rwala p. 333). Lane (p. 1020a-b) says that murḥî (without tā’ marbâta) or mirḥā is “applied to a she camel that brings forth in the
season called rahî or that has her young with her the young one being called rubâ’.” From this it would seem that no appropriate exact parallel to mrîb’t is provided by the Arabic lexica which probably explains Littmann’s choice of the ambiguous “spring camels” but that the translations offered above are probably not too far from the mark. The author appears to have omitted the šîl and to have added it to the side of the text. In Ar. the verb šîl is used of things which do not live up to expectations (clouds which give little or no rain seed that does not produce much growth etc.). If the following word is m’zy the z is imperfectly formed. The -h is followed by two crossed lines more lightly incised than the rest of the text and which may not belong to it. I can make no sense of the rest of the text.

**Provenance:**
Al-ʿĪsāwī, Rif Dimashq, Syria

[Latitude/Longitude: 32.903569 / 37.320314]

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

**Commentary:**
The inscribing instrument seems to have slipped when the author was cutting the ‘ of the first ‘bd. The m of ms’k is apparently covered by an abrasion and s’k are extremely close together. From s’rb onwards the letters are more lightly incised and more carelessly written. After ‘q’m there is a w followed by two illegible letters. An attempt seems to have been made to erase all three.

l s²mt bn zhk bn m'z bn ms²r w (w)gd s¹fr (q) fr (w) wgm 'l- ymlk w 'l- zhk w 'l- m'z w 'l- 'bd w 'l- ns²' f wny f wih 'l- gs² ' h l- 'bd f h t w ds²r w s²hqm s¹lm l- 'd s²'r

By S'mt son of Zhk son of M'z son of Ms²-r and he (found) the writing of 'd and so he was sad (and) he grieved for Ymlk and for Zhk and for M'z and for 'bd and for Ns²' and so he was depressed and will be distraught with grief for ever on account of his raiding party and so O Lt and Đs²-r and S²-tw-h-qm (grant) security to him who leaves intact [or who remains]

Commentary:
The text is written across two faces. The w of wg'd is under a patch of abrasion as is the w before wgm. The f before wh seems to carry on the sequential sense of the previous f and I have therefore translated it simply as "and" rather than "and so". I have taken the sense of the perfect in whl- 'bd to be that of "an act the occurrence of which is so certain that it may be described as having already taken place" (Wright ii 2A) since "he was distraught with grief for ever" makes little sense. It is possible that the five persons for whom he wgm were members of his gs². The author's grief for his raiding party suggests that its members had perished and that only he (or perhaps he and a few others) had survived possibly because they had been left behind with the baggage and exhausted camels (Musil Rwala p. 523). In this case the prayer s¹lm l- 'd s²'r might refer to the author "the one who is left" rather than as is usually the case to "whoever leaves [the inscription] unharmed".

Provenance:
Al-'Īsawī, Rif Dimašq, Syria
[Latitude/Longitude: 32.901569 / 37.320314]

l {Tmm} bn Ḥddn bn Ḥddn d- l dʾf w wld h- mʾṣy sʾnʾt ʿty h- qṣ f h lt brʾ l- h- nsʾ
By {Tmm} son of Ḥddn son of Ḥddn of Dʾf and he helped the goats give birth the year that the [disease] qṣ came and so O Lt [grant] healing to the people

Commentary:
The expression wʾty h- qṣ is unattested and in view of the prayer for healing it probably refers to an epidemic disease. Qṣ might represent Greek kausos which Liddell and Scott (p. 932a) identify as ‘causus i.e. bilious remittent fever (the endemic fever of the Levant).’ However this is not entirely satisfactory for kausos is a true Greek word (from kaiσa “to burn”) and it seems unlikely that an endemic fever would be called by a Greek name in a Safaitic inscription.

[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʾIsawi is the name of a probably ancient well between two headlands on the eastern side of the Wadi Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Commentary:
This is the translation suggested by MCAM in ‘References to ʾSiʾ in the Safaitic inscriptions’ [in J.-M. Dentez: ʾSiʾ]. For šlf see NA Dict. Mf K 196 Ṧb Ṣns mwl h- ʾrd sʾrʾ. This suggests that the verb mwl has something to do with ‘watering’ or ‘fertilizing’. In Classical Arabic the word ʾṣāmūn is used of minor deities not just of their images (see MCAM’s Polytheism and Monotheism) See Milik in Hawran II on introduction of deities to ʾSiʾ.

[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʾĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

**Provenance:**
Al-İsawi, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-İsawi is the name of a probably ancient well between two headlands on the eastern side of the Wadi Sham as it runs northwards from the modern Al-Namarah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-ʿNamārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

By Ḥmd son of Ṣbr son of Ḥḥl (son of) Bhl son of S²hr son of Qms²t

Apparatus Criticus:
LP 493: bn for (b){n}

Commentary:
Area H. The first 3 names are written in the 90° script. The sign(s) immediately after ḥḥl is on the cusp between the 90° and normal parts of the text and is obscured by later hammering. It appears to have been written as a 90° b and the following n omitted though it could be interpreted as a normal b with the n joined to the upper stroke. The h and r of s²hr are incised and the m s² and one stroke of the t of qms²t are scratched as is the “circle” of the q.

Provenance:

l ḥḥgps(y) bn ḥgn

By {Ḥḥgys} son of Ḥgn

**Apparatus Criticus:**
LP 490: ḥgl for ḥgn

**Commentary:**
Area H. The upper part of the y is direct hammered and of a lighter patina than the rest of the text suggesting that it may have been added to a n. The n of bn is a long straight line whereas the lām auctoris has a hook. The final letter must therefore be n. The same distinction is present in WH 497 where the reading ḥgl should be corrected to ḥgn. The text is enclosed in a lightly scratched cartouche. See also colour print Misc PH 19

l gmr b ‘<<>>l b s²mt

By Gmr son of (ʿl) son of S²mt

Commentary:
Area H. This author was almost certainly responsible for Mu 32 as well and in both texts wrote b for bn. For other possible examples see WH 2529 2538 etc. He appears to have been unsatisfied with both texts since Mu 32 was left unfinished and Mu 33 was scratched over. He seems to have been an inexperienced carver since the shallower lines projecting from the the r and ʿ in Mu 32 (and possibly that across the r in Mu 33) suggest that his instrument slipped and if our interpretation is correct he repeated the ʿ of the patronym in Mu 33.

Provenance:
Al-İsawi, Rif Dimašq, Syria

l s¹[d] (b)n mlk bn s¹d bn s¹d bn mlk bn ʿbd bn ʿdr (w) rʿy h- [[[ ]] dʿn f h lt s³lm l- ḍ dʿy [h-] ṣʿfr [w] ḡnm w ḡm ʿl- ḍ h- ṣnt ḫym ṭ ḫwlt ṭ- ṭḥbt

By (s¹[d]) (son of) Mlk son of S¹d son of Mlk son of ʿbd son of ʿdr (and) he pastured the sheep and so O Lt [grant] security to whoever leaves (the) inscription intact (and also) booty and he grieved for his father and he was sad for his father the year the ṭ ḫwlt kym in the Ruḥba

Apparatus Criticus:

LP 344: gll for mlk; ḍ for ʿdr; [w] for (w); ṭ- ṭ ḫn for h- [[[ ]] ṭ- ṭ; [h]ym for kym

Commentary:

Area H. There are a number of unusual letter-forms and signs of carelessness in this inscription. The fourth and fifth letters are obscured by over-hammering. The ʿ of ʿdr is a small inverted triangle. There is a patch of hammering immediately above it and it is possible that it was originally written as ḍ. It appears that the author originally omitted the ḍ of ʿdr but later adapted the preceding ḍ to form a monogram ḍr (compare the ḍ of l- ḍ dʿy). The ḍ which follows looks as though it was originally written as “g” (?) to judge from the stroke projecting from the base of the ḍ and those which can be made out beneath the rubbed area above it. A letter (possibly ḍ) has been rubbed over between ḍ and ḍ. A ḍ has been omitted before s¹ fr and a w after it. The reading kym is clear but its meaning is obscure.

Provenance:

Al-İsawi, Rif Dimašq, Syria

**Commentary:**
Area H. The author wrote a h before dlln and then scratched it over converting it from an adjective to a relative clause. In addition he at first continued writing b’ls⁴ mn on the same face as the rest of the text but then realising that he had insufficient space scratched over the letters ls⁴ mn and continued on the adjacent face. At the end of the text he wrote the fr of s’fr rather carelessly and then rewrote them more carefully. Despite the fact that his copy has wd’ grl LP reads wd’ w kl. This caused him to mistake dlln for a plural (see his commentary and LP p. xix) whereas it is in fact a dual of the passive participle referring to the two names which precede it. Dlln is the plural following the names of the three individuals whose inscriptions the author had found. The name wd’ grl has not been found before. See also Photo Misc PH 28. w ’l- ed’ gr- h dlln (M & Mu)

Provenance:
Al-Īsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-Īsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the
well and on the southern headland, on the crest of which is a stone tower.

By ʿš (son of) ʿšd son of rḥl son of ʿnm son of Msʾk son of ḡlmnt son of ʿbd and (he came to a watering place) in an area of abundant herbage and remained ---- and the winter brought no rain the year Wdn fled from (Rmn)----? and so 0 Bʿlsʾmn [grant] relief from distress and uncertainty

Apparatus Criticus:
LP 406: wrʾd h-nmrʾ(ʾ) w ḡwʾsʾ bʾll [ʾ][ʾ][ʾ][ʾ] ʿr ḡw ʿṣf ḡ- sʾty for wrʾd (b-) (h-) mrbʾt w sʾr rm----(g) w ʿṣf h- sʾty;

Commentary:
Area G. The strange arrangement of Littmann’s copy suggesting large gaps between sections of the text is difficult to explain. As can be seen from the photograph and the tracing there are no such gaps on the stone. The inscription runs along the edge of one face of the stone crosses over onto another at the word mrbʾt and then doubles back onto the first face at the word rmʾ(n). It must have been written after Mu 89 and 90 since it is squeezed into the spaces left by them on this face. Littmann did not record the last 16 letters which are scratched down the edge of this face opposite the first part of the text. The n of the first bn is obscured by the end of an abrasion which crosses the previous four letters. The upper parts of the d-b-h of wrʾd (b-) (h-) mrbʾt had already been destroyed by a chip when Littmann copied the text. The three letters after sʾr rm are damaged by another abrasion and could be respectively ʾl/h/y; ʾ/s/h/; ʾ/s/t/h/y. The third side-stroke of the (g) is lightly scratched and not joined to the stem and could be accidental making the letter a h. The author makes no distinction between b and r except in mrbʾt so it is not certain whether bmn or rmn should be read in the sʾnt clause. The abrasion after rm probably covers only one letter of which the ends protrude on either side. Others abrasions obscure part of the (y) and the whole of the (h) which follow. mrbʾt; cf. Ar. mrbʾt ‘abounding with the herbage called rahʾ [of land]’ (Lane 1020a) See also Photo Misc PH 24. wrʾd ʿl- mrbʾt (M & Mu)

Commentary:
The part of the text between 'bd-hm and w ḫṛṣ has been tampered with: letters have been joined and lines extended to give the impression of a series of m’s (however compare the shape of the genuine m’s in the text). In addition lines have been drawn across the tops and bottoms of the ṭ and ẖ of ṭḥb. See the tracing. The stem of the y of yḥd is rather long but this is explicable by its position at the junction of two lines. Littmann did not copy the complete line and so read it has l (or h) followed by '. There is small to one side of the stem which Littmann thought could be the side-stroke of a h.

By Sʿd son of Ḏb son of ṑdm and he camped here in the season of the later rains and he stayed the dry season and the winter in this place. And O Bʿls l mn [grant] a reunion

**Apparatus Criticus:**

Is: ᵃbⁿbⁿbⁿ dmwḥlḥ-dṛdᵗ f ʾyḏ f s²ˌy h b l s¹ m n qbl
By Sʿd son of Ḏb son of ṑdm and he camped here during the season of the later rains, then the dry sea-son, and then winter so, O Bʿls lm mn, show benevolence.

ʾyḏ: this rare reflex of the verb qyẓ, which exhibits the sound changes q > ʾ and z > ḏ, is attested only once more in MKMR 9; see Al-Jallad (2015: §3.7.4.1) and Macdonald (2004: 498) for further discussion.

**Commentary:**
Plus drawing. ʾyḏ is probably a dialectal variant of qyẓ (see also MKMR 9)

**Provenance:**

Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-\'Isåwî is the name of a probably ancient well between two headlands on the eastern side of the Wådå Shåm as it runs northwards from the modern Al-\'Namårah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

By ʿṣ'y son of ḫl son of Kmd son of ʿṣd son of Qṭn son of 'gmt

Provenance:
Al-'Īsawi, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-'Īsawi is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿIsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿIsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿIsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādi Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-'Isāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-'Isāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-'Īsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined
and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʾĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsawi is the name of a probably ancient well between two headlands on the eastern side of the Wadi Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-Īsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.
