The forks of the ʾ of the first name have been joined as have the arms of the m. The first letter of the patronym appears to have been a ġ to which side-strokes have been added to make it look like a ʾ. Direct-hammered dots have been added to the middle of the stem of the second letter and to the bottom of the third.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

I {ʾ}{s¹}{d} {b}{n} {ṣ} {f} bn bgnmh mlk brkt

By {ʾs¹d} {son of} {ṣf} son of Bgnmh owner of Brkt

Apparatus Criticus:
ISB 95: reads 95 and 95.1 as one text I {ʾs¹d} bn ṣm(ʾ)n w ȝnm h-mlk brkt n- db and translates the narrative as "and the king raided two pools at DB"

Commentary:
The first seven letters have been hammered over and the 7th appears to be an enormous f. The text then runs at right angles to the beginning for the next four letters in which the two examples of b are at right angles to the direction of the text and upside-down in relation to each other. Both features are not uncommon. The text then turns again at right angles to run below the beginning. The bgnmh has not been found before but is of a form well-known in Safaitic in which a common name is placed between b and h to form a new name. The last two words of the text are clear on the photograph but difficult to interpret. Brkt is the name of a place of semi-permanent water, apparently in the area where the harrah meets the hamād to judge from the distribution of the texts which mention it, and could be modern Burquʿ (see Macdonald 1992: 27–30). It seems unlikely that someone would declare himself "king of Brkt" in a graffito like this and so we have suggested translating mlk as "owner", though in what sense he could claim to be the "owner" of a watering place is difficult to imagine. So this interpretation is proposed very tentatively.

$l^\prime \text{mdn} \text{bn } s^3d \text{bn } drs^1 \text{ w d}^\prime \text{ hrt hfg}$

By $\text{mdn}$ son of $S^3d$ son of $Drs^1$ and he spent the season of the later rains in the $\text{hrt}$ [pasturing on] hfg

**Apparatus Criticus:**

ISB: $d^\prime \text{ hrt hfg}$ "he spent the spring in the region of basalt rocks. And the camels’ knees trembled (?)"

Beeston (review of ISB, *JRAS* 1970: 220): hfg is probably the name of the particular ḥarrah

**Commentary:**

Hfg occurs here and in WH 171 and KRS 1836. A member of the Ahl al-Jabal, who inhabit the ḥarrah of southern Syria and north-eastern Jordan, identified a plant of the ḥarrah shown him by Geraldine King as ḥafaq. Dr Sue Colledge later identified it from a photograph as Diplotaxis Harra. $d^\prime \text{ hrt hfg}$ is presumably an elliptical expression meaning "he spent the season of the lesser rains in the ḥarrah [pasturing on] hfg"

By Ḥmr son of Bnḡdw son of Sˁf son of Ḥnf

Apparatus Criticus:
JaS: hmlg for Ḥmr and bḡdw for bnḡdw

Commentary:
The first name is written in square letters. The final letter of the first name clearly has hooks and must be a r. Jamme reads the following bn as a g despite the fact that it is open to the left. There is no sign of the letter he reads as b before ḡdw. The ḍ is of the concentric circle form more common in Thamudic E than in Safaitic. Apparatus Criticus:
JaS: ḡhmnn (or ḡhmnn or zhmn) for Ḥhmnn ḏṣḥlf ḏyṭ “and he got hold of the ransom” for ḍḥlmn( ḏyṭ

Commentary:
The k of Ḥhmnn is not certain. The letters ḍḥ after Ḥmhnn sugest the beginning of an invocation. However the letters which follow on Jamme’s copy produce little sense and in the absence of a photograph it seems safer
to leave them uninterpreted. Jamme’s reading of the ḫ as a s¹ is untenable.

The spacing of the letters on the copy suggests that the verb is wg’ and that the ’ of ‘l has been omitted by haplography.

**Apparatus Criticus:**
JaS: lʿqrn bn lmw [w wg]m l ʿshr-h w/l b-ḥ ḫṯfr *[and he has mourned upon his kinsman and upon his father. he was a saddle maker.]*

**Commentary:**
The third letter looks more like a y than a q on the copy. The following two letters would then be the bn. It is just possible that the second name is a badly copied ḫṯfr though this can be no more than a suggestion. Ar. ṣḥr is not simply a "kinsman" as suggested by Jamme but the kin of one’s wife or husband. Jamme’s interpretation of the final word is unconvincing.

By Nʾr son of (zʾ)m

**Apparatus Criticus:**
JaS: zʾ nm for zʾ( )m.

**Commentary:**
The fourth letter from the end has a very short vertical stroke and resembles a Thamudic E ḫ. The copy has a dot between the second ʿ and the m but the name read by JaS is unlikely. It is possible that the text continues after the break and the name should be read zʾn and the m taken as the first letter of the following word. It is perhaps most likely however that the dot is the copyist’s error or extraneous to the reading of the text which is what has been suggested here.

By Tsʾ kn. Booty to him who makes [this writing] his own and rejection for him who would erase [this] writing.
Commentary:
It is most likely that JaS 35 and JaS 36 are one text. The n of (n) has been turned 90° and is written slightly to one side of the line of the text. The copyist has given no indication as to whether the stone is broken after the f and so it is not possible to tell whether there are letters missing between it and the following l. The first t is rather large and the crossbar is not facing in the direction of the text. The k is a slightly unusual shape and the following n is larger than the other n’s of the text. JaS has restored h for w before the word ḫṭṭ. Whilst this produces a better attested formula there is no justification for doing so from the copy.

he has spent the spring [here] and gone over to 'ḥw and to 'Ts'lm".

**Commentary:**
See JaS 43.1 for the reason this is read as a separate text. It seems likely that the copyist has left out letters at the beginning. JaS suggests that the inscriber drew the stroke of the d of dṯ and then noticed that he had forgotten to write a w and so inscribed it partly over the stroke. The second letter of tsḏwq has a kink and then a short line which runs into the crossbar of the q of the same word which is written below it. The w has been copied as a q.

Commentary:
The reading of the first name in JaS is speculative as only a short line and a line with a circle remains. The latter might be the remains of a yṯ or ḥ. It is most likely that the third letter of the name after bn is an s². JaS reads the letters after the break from right to left but it seems more likely given the amount of space that they should be read from left to right as a continuation of the existing line. After the gap in the copy the fork of a letter remains above the break which might be the remains of an ‘ as read by JaS or a h or a ḥ. There is not enough of the letter after the w remaining to read an s¹ as in JaS.

There is a good photograph of JaS65.1-65.4 in ThNSSMAS. After the d there are traces of an ’ and l and then it seems most likely that the inscription continues in a curve and ends in the letters which have been read as JaS 65.4 although the rock is very damaged and the letters uncertain. There might be a m as suggested by JaS and then there appears to be an ’ w and ’. The w is read as a g in JaS 65.3 and it is possible there is a n before the letter although it seems rather dose and could be incidental. Between the ’ and ’ the letters are illegible. The last four letters are read by the editions as a separate text see JaS 65.4. The third letter from the end seems to be relatively large and should probably be read as a g.

Commentary:
Theeb reads the last part of JaS 66.2 at the end of this inscription. The above reading is made on the basis of the photograph in ThNSSMAS. The rock is chipped after the initial l and it is very uncertain that the next letter is a f. The arms of a k at the end of the first name is visible and part of the following b. The last two letters are written on the edge of the rock and are very doubtful.

Commentary:
Theeb reads the last part of this inscription with JaS 66.1. The initial l is very uncertain. The third letter of the first name resembles the following b. The ’ and d of the second name appear to have been written over later on. After the second bn there appears to be three letters which might be a h y and an’. The last letter is damaged but there appear to be three arms and it should probably be read as a h.

Apparatus Criticus:
JaS read as the continuation of JaS 71.3. See JaS 71.3.

Commentary:
JaS reads this and JaS 71.3 as one text. However the name s²tyḥt as read by JaS in 71.3 is difficult to explain and since the ḡ is written slightly above the y it seems more likely that the letters from the ḡ onwards are part of a separate text in which the preceding letters have not been drawn on the copy or a continuation of JaS 71.2 with letters missing from the copy. The s² is doubtful and it is possible that it should be read as a ḡ as in JaS. The Ὸ of the preposition ‘l has been written slightly above the q and the l has been left out altogether.

Apparatus Criticus:
JaS: l yqz w ḫtw bdḥ lḥḥ Ḫf “By Yqz. And he was grieved at the appearance - O Lḥ - of Ḫf”

Commentary:
The text is written on the outside of the bottom of the same dish as JaS 82.1. It is difficult from the copy to be sure how the text reads or whether the letters belong to only one text. The copy of the letter after the first l is doubtful it is most unlikely to be a y as read by JaS but could be an incomplete w. JaS continues reading the text after the z with the w near the break in the opposite direction to that in which they are read above and then reads the last group of letters from top to bottom in the copy regardless of the fact that the r ḫ l and f all face in the opposite direction. If the letters are all to be read as one text it is much more likely that the part of the text missing at the break curves round and continues with the f and following letters.

Apparatus Criticus:
JaS: reads this and JaS 101.4 as one text see JaS 101.4.

Commentary:
JaS reads JaS 101.4 as the continuation of this inscription. It is more likely however that JaS101.4 is a separate text because the letters are written above rather than continuing directly on from the t. The copies of both the texts begin next to the edge of the rock and although JaS does not mention it it is possible that the rock is broken or the texts begin on another face.

See JaS 101.1. The position of the letters of this text suggest that it should be read separately. It is possible that the rock is broken before the y or the beginning is written on another face. [----]rt bn h(r)m bn ml{k} bn gjft w----hlf----

----rt son of {Hrm} son of {Mlk} son of Gfft w----hlf----

Apparatus Criticus:
JaS reads JaS 118.1 and 118.2 as one text; [----]drt bn hrm bn mlk bn gjft w hlf f bny 'l qnnt w 'l rlf w 'l msrlt w 'l drm w 'l 'dm w 'lm gnm w gm 'lw lskt; translated from w hlf as "And progeny. And he has built upon Qnnt and on Rlf and on Msrlt and on Drm and on Qm and on Gnm and he mourned over Wlskt."

Commentary:
The rock is broken after the first w and it seems likely there are some letters missing between it and the h of hlf. The reading of f bny in JaS is very doubtful. The sign read as f is incised unlike the other letters on the rock which are chiselled and it is inscribed horizontally slightly above the line of the other letters. It is probably extraneous. There are then two hammer marks a chip and possibly a circle. Unfortunately the next part of the rock where JaS reads qnnt is covered by the scale in the photograph and cannot be checked. The remaining letters are smaller and it is most likely they are a separate text. See JaS 118.2.

Provenance:

--- (and) {he grieved} for Ws²kt and (for) {M----z} {and} {for} {M}---- and for {Wrm} and for {'dm} ----

**Apparatus Criticus:**
JaS: the text is read as the continuation of JaS 118.1 see under JaS 118.1.

**Commentary:**
JaS reads this with 118.1 but the difference in the size of the letters and the uncertainty of JaS’s reading of the letters after ḥlf in 118.1 makes it more likely that there are two separate texts. The above reading starts from the upper left hand part of the rock. The ḡ n and m as read by JaS are not visible in the slide but if the interpretation adopted here is correct then the beginning of the text would be covered by the abrasions. The last part of the text which is written on the same area of the rock is also illegible in the photograph. It is possible that the first letter of the fourth name is a circle with a dot but there seems to be a line across the middle. The reading of the second letter of the fifth name is very uncertain. It might be a circle with a dot or simply a circle which would be read g.

l ʾns¹ bn ----w h(n) {s¹}n{j}{k}{d}
By 'ns¹ son of ---w {son of} {s²nkd}

**Apparatus Criticus:**
JaS: l 'ns¹ bn ywbġ bn kd

**Commentary:**
The copy is extremely doubtful. The letter after the first bn might be a y but it has a curve which would be unusual. The letter read as g by JaS is lying on its side and is more likely to a n and the tail of a s¹ which have been joined together. The letter read as k is similarly to Thamudic ġ gas it has a tail. The spine of the d curves backwards at the ends and the loop of the letter is not completely joined. Next to the text there is a copy of shapes which might be joined letters and it is possible that the strange shape of some of the letters in the text is because some of the letters are joined and the copyist did not recognise this.

JaS: The text read here is read as the last part of Jas 162.1.

Commentary:
See JaS 162.1. It seems most likely that this should be read as a separate text although the initial l is between the n of the fourth bn and the b. The text reads down from the corner of JaS 162.1.

By ʾs¹d son of mṣḥḥ son of ḍ‒hj and he spent the season of the later rains the year ws¹q ṣ

Apparatus Criticus:
JaS: l ʾs¹d bn mṣḥḥ bn ḍ‒hj w ḏ ḏʾ ʾs⁰nt ws¹q ṣḥyṣ rdḥ w ld ṭl; translation from w ḏʾ “And he has spent the spring [here] the year he has gathered a small quantity of crushed datestones and ṭl has rebelled”.

Commentary:
The letters ḍ hy read by JaS after ws¹q are written to the left of the s¹ of ws¹q and it is unlikely that they belong to this inscription unless several letters are missing from the copy see JaS 171.3. Similarly the letters rdḥ w ld ṭl read by JaS are inscribed at right angles to the w and q of ws¹q and are either a continuation of this text with several of the letters missing from the copy or the letters of part of another inscription see JaS171.4. The second ṣ is written directly after ws¹q and the text is either unfinished or the copy is not complete.

ṣḥrn bn s¹ḥy bn ḫgrn (----) w mʿyb w ts²w(q)

By Ṣḥrn son of s¹ḥy son of ḫgrn ---- w mʿyb and (he was filled with longing)

Apparatus Criticus:
JaS: s¹ḥy for s¹ḥy; w s²tw b yʿmw "And he has spent the winter at Yʿmw". JMAA XIV p. 195: where JaL 175 is a misprint for JaS 175. Comments on the place name being written in larger letters than the rest of the text.

Commentary:
It is possible the second letter of the second name is a k. The last part is read in the opposite direction to that read by JaS which seems the most likely interpretation given the position of the letters. There is quite a large gap between the end of the third name and the w which suggests that some letters are missing from
the copy or that possibly w mʿyb w ts²w(q) belong to another text the beginning of which has not been copied. The letters w mʿy are drawn in the copy with a double outline suggesting that they are inscribed in a different technique to the other letters of the text.

Commentary:
The first name is written above the following bn and the beginning of the next name. There is then a gap in the copy followed by a letter which might be a g or a m. Apparatus Criticus:
JaS: gddt for {s²}ddt; mmkl for mm{k}l; ḥly for ḥ----.

Commentary:
The stone is broken into two pieces. It is perhaps most likely that the second letter should be read as s² see the other examples of this form of the letter in this collection. The k in the second name after the second occurrence of wgm is a different shape to the other k in the text and is facing in the opposite direction to the rest of the letters. I s¹mm bn ṭw w bny h- nfs¹t

By S¹mm son of ṭw and he constructed the funerary monument

Commentary:
A Safaitic inscription in the collection of Widad Kawar. The second name is unattested but seems clear. It could possibly be ṭw (also unattested) but the second letter is much more a t than a h. This seems to be the first record of someone making a nfs¹t. All the other occurrences of the word are in the context l N h- nfs¹t.

Commentary:
The editor seems to be suggesting that ṣwyn should be translated from the Ar. ṣuwan which can mean a group of beasts or birds of prey. It is more likely that it is a dual form of ṣwy a "cairn".

By Ws’n son of Mlkt

Commentary:
From the copy there appears to be an abrasion between the l and the k which might be where the author has hammered out a mistake. The name ws’n is not in HIn and it is possible that ws’ should be read as the letter read as the first n is a small dash on the copy. The letter after the b of bn is also a small dash and so it is not possible to be certain about this.

**KhBG 345**
1 ’n’m bn ’lm ḏ.- ’lmḏ yq ʾl- {g}{n}f w ’l- ḫdd w ṭwff f(h) lt s[lm w ṣfy m- b’s)
By ’n’m son of ’lm of the lineage of ḫy and he spent the dry season ’l- {g}{n}f w ’l- ḫdd w ṭwff and so {O) Lṭ [grant] security and deliver from {despair}

Apparatus Criticus:
KhBG 345: ”grf” for ”{g}{n}f” and ”ṣfy m r’-h” at the end. ” ʿwa qavyaḍa’alae {grf} wa’alae {ḥdd} wa ḫeṣa” and the end ”sallam aljadi; ṭeṭu”

Commentary:
The letter after the first occurrence of ’l- is a rather small circle and the following letter is more like a n than a r. The final letter has the appearance of a h but it seems most likely that a š should be restored.

By bngn¹ ----

Apparatus Criticus:
KhBG 382: l gn¹ bn ----

Commentary:
The letters bn are written next to the initial l and the following g and it is rather uncertain where they belong. It is possible a compound name "bngn¹" should be read or maybe this inscription should be read as the patronym written as an afterthought of s²ddt the author of KhBG 383. However as the editor points out that would not explain the apparent initial l before the g. It seems less likely that the bn should be read after the name gn¹ as in the edition. The copy seems to suggest the inscription continues.

I bny' mr hn'y h rdy

By Bny' mr hn'y O Rdy

Apparatus Criticus:
KhBG 398: I bn' mr hn' y rdy

Commentary:
The Bny' mr has been found several times before. OCIANA does not alas have access to the late Fawwaz Khraysheh's photographs of the KhBG inscriptions, but supposing that the facsimile is correct, there are several possible explanations for hn'y. It could be the author's nisbah referring to an "I n' or n't. This does not seem particularly likely. It could be the something requested of Rdy, and the root H-N-ʾ would produce suitable subjects for such a prayer, "ease", "plentiful giving", etc. but the form with final ʾy is difficult to explain. A personal name hn'y is otherwise unknown and so it is unlikely that it is the author's patronym with the bn omitted. We have therefore left it uninterpreted for the present.

Apparatus Criticus:
KhBG 494: l ḫb bn ḫs¹n h- dmyt

Commentary:
There are three prongs at the bottom of the sign read as a š and it is possible they do not belong to the letter.
If that is the case the name should be read as ḥby. The following letter has a slight tail and the n is a rather long line with a double line. The b is written slightly below the s¹ and n and was either left out and then added later or else the s¹ and n were written above because there was not enough room.

**Commentary:**

/Pace/ the ed. pr. the script style is the same throughout the text and none of it resembles Thamudic E except for the d sign which however is not uncommon in Safaitic especially in this name. The author has played with the letters of the text placing one within the other at almost every opportunity regardless of word division (e.g. ž mʾ z r f). The y of s¹ly appears to be joined to the l. The last letter in the second line cannot be s¹ (as in the ed. pr.) compare the s¹ of s¹lm but must be h. The first letter of s²nyt must be s² rather than f cf. the f later in the same line.

I grm bn lt bn šrmt d- 'l 'mrt w syr qyq r'y

By Grm son of Lt son of Šrmt of the lineage of 'mrt and he came to a place of permanent water while pasturing in the dry season

Apparatus Criticus:
KhNSJ: 'y for r'y

Commentary:
As in KhNSJ 2 a number of letters have been placed within each other again regardless of word-division (e.g. bnlj bns). However at the end of the inscription the author has applied the same technique to whole words. The first letter after the w is both a q and a š hence the circle is between the middle of the stem and its top and there is a short cross stroke the bottom of the shaft. Similarly the third letter after the w is both the final r syr and the initial r of r'y but is also the z of qyq. Thus it has the short backward strokes of the ġ and the incurring hooks of the r.

Apparatus Criticus:
KhNS]: ’mrt for ’bs²t

Commentary:
The letters of the first name are very uncertain on the published photograph though the ed. pr. says that they are dear on the stone despite enclosing them in ] in his reading. The tribal name is clearly ’bs²t not ’mrt. The letter(s) between rm and qyṣ are illegible on the photograph. Ed. pr. has w on the facsimile but f in the reading. The next phrase is probably qyṣ ’l (cf. SIAM 28) though it is difficult to explain (t)y. Ed. pr. translates brḥ qṣ r l- bṣry as ‘Caesar left Boṣra’ which of course is impossible. Brḥ in Safaitic presumably had a wider sense than Arabic bariḥa ‘to go away from’ (with a direct object) and may have been closer in sense to Hebrew bāraḥ ‘to flee (with l- ’to’) to hasten’ (BDB 138a).

KhS connects the word ḏmt to Arabic ṣadmā-, pl ṣadam "a type of gazelle characterized by a long neck and beautiful eyes". It is so far unattested in Safaitic, so it might be better to regard this as a defective spelling of the word ḏmyt "drawing," with the definite article ḏmt, especially since, according to the formula l-PN def-N, we would expect a definite article on ḏmt, *ḥ- ḏmt. image not available

By ‘s⁴ son of Br‘h and he returned

Commentary:
KhS connects ‘d to the Arabic ‘wd “to return.” He also suggests that it could be connected to ‘adā “to antagonize”, referring to the herds in the drawing. The absence of the medial glide in Safaitic II-weak verbs
is attested but the glide of III-weak verbs is consistently preserved, making the latter explanation unlikely. The edition points out that the position of the sun in the drawing indicates that the hunt was carried out in early dawn. Image not available

The edition argues that the drawing predates the inscriptions that accompany it on the same rock because they are inscribed along the edge while the drawing takes up the most space in the middle. The fact that neither KhS 14 or 15 mentions the drawing might support this view.

l ḥṣ²b bn ---- w bkr l gzr

By ḥṣ²b son of ---- and he woke early to slaughter [a camel]

Apparatus Criticus:
KhMNS: Translation of bkr l gzr "and he woke up early to hunt" (wa bakkara li-l-ṣayd).

Commentary:
Safaitic gzr can be connected with Arabic ǧazara, "he rose early to slaughter a camel" (see Lane 418b ǧazara la-hum "he slaughtered a camel for them" and 419a s.v. ǧazûr "a camel for slaughter" as in the expression raʾati l-ǧazûrū "The camel for slaughter pastured"). The normal word for hunt in Safaitic is syd. [MCAM] If this interpretation is correct, then the inscription does not correspond to the hunting scene that accompanies it.

l ḍr bn msʿk bn hgr bn ʿlṭ w gry h- mhr f h lt rwḥ w h dḥ²r m yʿwr h- sḥfr

By ḍr son of Msʿk son of Hgr son of ʿlṭ and he made the colt gallop so O Lt [grant] relief from adversity and O ḏḥ²r [blind] whoever effaces this inscription

**Apparatus Criticus:**
KhMNS: Translation of gry h- mhr "he made the colt run" (gaʿala ʿl-muhr yaǧrī)

**Commentary:**
Safaitic gry is taken as a D-stem of the Arabic root ĠRY "to run", that is, to cause to run, or, when referring to horses, "to make gallop" (the fastest gait of a horse). The drawing depicts the horseman galloping (the horse is in suspension with all four feet off the ground) in pursuit of an injured oryx attempting to escape, so the sense here fits nicely with the image. The final prayer of this inscription can be interpreted in two ways: (1) the author omitted the imperative ʿwr, which is found in the commonly attested ʿwr m(n) yʿwr, "blind whoever effaces"; (2) the m is a negative particle, comparable to the negative mā in Arabic. This would require us to interpret yʿwr as a passive injunctive followed by its subject h- sḥfr (i.e. "may the inscription not be scratched out"). Confirmation of the latter interpretation must await further discoveries. Image not available

The last letter of the second name appears to have a loop half-way down the stem making it look like a d. However the area of the stem next to the "loop" has been more heavily scored than the rest of the letter and it is possible that the original line was deflected at this point by an unevenness on the surface and that the author then emphasized the intended line of the letter by repeatedly scratching the surface but did not score over the mistake. A name ʿnʾd would be difficult to explain.

By ḫhm son of ṣw

Commentary:
The text is enclosed in a thinly scratched cartouche along one edge of which a modern Arabic graffito has been scratched. The second name has not been found before but must be complete since there is no space for another letter between the ṣ and the cartouche. However ṣy is attested and the alternation of ṣw and y is a known feature of Safaitic see for instance rḍw / rdy and sṭw (CSNS 324) as compared with the more usual sṭy.

l Ṣzr bn ṣḥ ṭ mʾny(n)

By Ṣzr son of Ṣḥ (the) Minaean [?]

Commentary:
There seem to be faint traces of what could be a n after the y of the last word and we have tentatively suggested that this could be the -n marking the determinate state in South Arabian. Thus mʾny would be a South Arabian nisba form (as in CIS IV 84/1 and GIED.1 26) equivalent to Safaitic h-mʾny "the Minaean." On
the other hand it should be emphasized that the final -n is by no means certain and that the names Nḥr and ʾbḥd are unknown in South Arabian. Moreover it is very unusual for an individual to identify himself simply as a "Minaean" though so far from home it would be understandable and one of the South Arabian examples (GIED.II 26) is from the eastern desert of Egypt (see also MNBS p. 106-108). See also Sima WZKM 88 1998 246. However if the apparent -n is not intentional the final word would be an undefined nisba. This would be extremely unusual in Safaitic and would presumably mean "a Mʿnite". In this case it is more likely that it would refer to a social group or place in Syria-Palestine or northern Arabia much closer to Khirbat al-Umbashi (for some possible sites see KMAD).

Commentary:
The last five letters run parallel to the first part of the inscription and are much more crudely carved. It is not certain that they are part of this text.

KhU 71

l tm bn klbʾl

By Tm son of Klbʾl

Commentary:
The second name is previously unattested and would seem to be a surprising theophoric compound. However all the letters are clear and it is difficult to see how else it could be read.

KhU 72

l fn bn ḫbṯ bn ‘hm bn ḫld bn ql

By Fn son of ḫbṯ son of ḫm son of ḫld son of Ql

Commentary:
A son of the author of KhU 35 a brother of the author of KhU 20-21 and probably a nephew of the author of KhU 74. The inscription is enclosed in a cartouche from which four groups of seven lines project. The cartouche has been chiselled and the lines are scratched. Traces of another text can be seen on an adjoining face.

l khl bn zʾbr bn Ṧmr w ḫr f rḏw ḡt

By Khl son of Zʾbr son of Ṣmr and (he kept watch); and so ḡt [grant] deliverance
Commentary:
By the same author as KhU 14. An ‘ has been scratched more thinly than the other letters between the ḥ and the ṣ of ḥrṣ. The text is enclosed in a thinly scratched cartouche which is crossed at one point by seven lines.

**Commentary:**
After ḥrg the text is very lightly scratched and the name Rf't is particularly faint on the photograph. The lower fork of the ' has been obscured by an abrasion as has the ' of Yṯ. The letter which was originally carved after the d of zd'l has been scored over and was presumably an error corrected by the author. The magic sign of 7 lines has been scratched below the name ḥrg and may occur again above Zd'l. The first four names are incised and the others are scratched.

\[ \text{By H}^{5}\text{l's} \; \text{son of Tm son of Mlk and he tracked an enemy [on] foot and he was secure and attained glory} \]

**Commentary:**

\( s^{7}n't \) is either an alternative to the collective \( s^{7}n' \) ('enemies') or a singular ('an enemy'). The letter which follows \( s^{7}n't \) looks at first sight like a \( w \), and it is difficult to make sense of \( w \; l \cdot \text{rgl} \; -h \) in this context. However, the central line of the \( w \) does not seem to be complete and it is just possible that it is a \( ' \).

By Zwlt son of \{(Mghan\} \{son of\} S²br son of S¹ry son of S¹m’

**Commentary:**
The shapes of some of the letters of the second and third names have been altered. The g has an additional curve on the curving part of the letter, both n’s in this part of the text have been turned into loops, the y has been made into an elongated figure of eight, the b’s of bn and s²br have a double curve and the s² of s²br has a line inscribed down one side of the zig-zag. It seems that the author wrote a s¹ after the name s¹ry and then wrote bn s¹m’ realizing that he had forgotten the bn.

By ‘ḥd \{son of\} \{(N’mn\} \{son of\} ḥr’tt \{son of\} ġly \{son of\} Whb’l and he \{found\} the traces of Zwlt and so he grieved in pain

**Commentary:**
The b of the first bn has been altered with an additional curve giving it the appearance of a m the first n of the second name has been given an additional stroke giving it the shape of a small s¹ and the following ‘ has a line across the circle giving it the shape of a small w. The r of the name hr’tt has a line across the h. Commentary:
The inscription is very worn between the letters wgd and y w ghm. There are faint traces of an ’ r and w and it seems very likely that [ỉ]ỉ[r] (w)ny should be restored. After the last occurrence of the connective w the author appears to have left out an ‘.

The loop of the d is slightly uncertain and the following n is rather more lightly scratched than the rest of the letters. It is possible for the text to be read s¹š{l}→b {w} ṭ(y) ḏ(n) ʿ(n)zṭ where what has been read above as a h is read as a w and what has been read as a g is an ‘ although it would be larger than the first ‘ in the text. The letter read as a d might be a y if one of the apparent prongs is incidental but even so the line joining the loop would be rather doubtful.

Commentary:
It is possible the inscription starts on another face of the boulder which was not photographed. The crossbar of the letter read as w in the sixth name is doubtful and it is possible it should be read as a g. The author appears to have left out the m of s²hq and the r of ds²r. A divine name ʿr has not been found before. If, like the previous two divine names, it is lacking one or more letters it is difficult to suggest what they might be. On the translation of qbl meaning ‘reunion’ see Al-Jallad 2015: 333.

l bn bn 'nhlh h-dmy w ḥṣf h ʾslm 'lh dmt rw<<<ḥ

By 'bn son of 'nhlh the Dumaite and he was cold and hungry and so OŠlm god of Dūmat ( [grant] relief from adversity and uncertainty)

Commentary:

There is a m after the second w and the ḥ at the end is written to the side of the other letters. It seems likely that the m was a mistake and that the author finished the text in a different direction rather than crossing it out. There is no drawing with the inscription and it seems that h-dmy here represents the nisbah from Dūmat (Akkadian Adumata, mediaeval Arabic and still today Dumat al-Jandal, al-Jawf) the oasis in north Arabia. This is the only Safaitic inscription known so far in which there is an invocation to the god Šlm, who is here called 'the god of Dūmat', but who is better known from the mid-sixth century BC to at least the mid-first century AD as the chief god of Taymāʾ (see the dedication to Šlm in Taymāʾ Aramaic dated to AD 56/57 in Macdonald in preparation). As yet, neither of the personal names has been found in the inscriptions in and around Taymāʾ or Al-Jawf. However, 'nhlh (as opposed to 'nhlḥ here) is found in a Hismaic text from Qarṭ al-Mazād, north of Sakākā (Al-Ḍuyayḥ 2003: no. 36).

By S\kern m\ son of Q\dy son of Qdm and he was limping while on a hurried journey and so he made a compact with S\hqm for his safety

**Commentary:**
The author has written a \( g \) after the word \( zl' \) and then crossed it out. After the final \( m \) there is a circle shape with three lines across which might also be a mistake that the author has attempted to cross out or it might be a sign. The verb \( m\t\) means 'to travel swiftly, to hurry' and is here the infinitive used adverbially. The expression \( ʾ\dqy\ b-\ s^2\hqm \) has not been found before and is perhaps to be related to the 'af\'al (IV) form of the Arabic \( \sqrt{DMM} \) which can mean 'He made a compact with someone for his own safety' (Lane 975c–976a).

**Commentary:**
The \( n \) of the first \( bn \) is illegible. Part of the outer line of the second \( w \) is not visible on the photograph; the \( h \) of the second \( whd \) has been added later; it seems likely that the author wrote a \( q \) instead of a \( s \) in the word \( ḫrs \) and then attempted to emend the letter by inscribing over one line protruding from the circle and adding a prong to the other. side of the other letters. The letter that has been read as d in the word yhd has a diagonal line running from the base of the loop and it seems possible that a h was written originally and then the letter was changed to d by the addition of the loop. There is what might be a s² after the y of rʿy but there are some lines over part of it suggesting it has been crossed out. The lower stroke of the penultimate letter (f) runs into a h in KRS 38, but it can be seen to be a thinner line than those of the h. For s²tt rather than the more usual s²ty see Al-Jallad 2015: 122. {l’mn bn gn’l bn hy bn $bh bn hy bn [(g)]n’l bn w nyk s’lm ‘mt s’lm

By ‘mn son of Gn’l son of Hy son of $bh son of Hy son of {Gn’l} son of Whb and he had sex with S’lm S’lm’s slave-girl

Commentary:
It seems likely that the author made a mistake at the beginning of the sixth name and inscribed a straight line with a prong on the end which he then rubbed over and another short line. He then changed them into a g by drawing a curve to attach the lines at the top and joining them with a straight line at the bottom. Presumably, the two occurrences of s’lm refer to two different people either with the same name or with names from the same root. The end can be translated either as above or as “S’lm had intercourse with S’lm’s slave girl.”

l {ḥrr}b bn qqm mm--- bn n′mn w nd---bḥ

By {Ḥrrb} son of Qqm mm--- son of N′mn and nd---bḥ

Commentary:
It seems likely that the author made a number of mistakes although it is difficult to be certain. The third letter has a bar across one end of the curve giving it the appearance of a k. However, there is also a hook at the other end which one would not expect in the letter k. It is possible that the second q should be read d but the author has made no attempt to correct it. In the photograph, the letters following the third m are partly covered by another rock. It is possible, however, that there is a f and even less certainly a n and a y which would produce the name mfny. Before the last two letters the surface of the rock has been broken and the top of a ġ above this patch, but it is unknown if anything else has been lost. There is enough room between the n and the b at the end for another letter but nothing is visible on the photograph.

**Commentary:**
The first \( \delta \) and second \( n \) are faint. One fork of the fourth \( \mathfrak{v} \) is rather uncertain and it is possible the letter should be read as \( \mathfrak{g} \). The following \( n \) is rather short. Part of the photograph is out of focus making the reading of the fourth \( y \), the fourth \( w \), and the third \( \mathfrak{v} \) rather uncertain. By \ (Gmq) \ {son of} \ 'h s²\ll \ and \ {he wept} \ 'w

**Commentary:**
The second letter might be a \( m \). The \( bn \) and the patronym are not very clear on the photograph but it seems that the first \( b \) has a hook as does the \( b \) of the word \( b k y \). The inscription appears to be unfinished probably because the rock is rough after the \( w \) although there is a horizontal line above the \( \mathfrak{v} \) and \( w \) which might be an attempt at a continuation.

By ʾdm son of (Ysʾ mʾ l) son of ʾsʾ d and he grieved for his brother for ʾsʾ l and for ḫʾ ḫ d his brother and O Lt [grant] relief from adversity and protection

Commentary:
Part of the final letter of the second name is obscured by an Arabic text. The prayer might be interpreted either as rwʾ ḥ wqyt “the relief of protection” or it is possible that the author forgot to write a connective and intended rwʾ ḥ wqyt “relief from adversity and [grant] protection”. On qyt “protection” see Al-Jallad 2015: 352.

By ʾnʾ m son of Mḥlm son of Hmsʾ k son of Wqr (son of) Wqr

Commentary:
It is difficult to know how to interpret the second occurrence of bn wqr. It is lightly scratched on the rock above the last two names of the text. The letter read as the n of bn is a long line. If it is the continuation of
the genealogy then it is strange the author did not write it after the first occurrence of wqr where there is sufficient space. It is possible it was left out of the middle of the genealogy and should be inserted after mḥlm.

Commentary:
Several of the letters have been altered with the addition of thin lines. The first and second h's have been changed into ū's; lines have been added to the b's and n's of the first and second bn's; the s¹ of the second name has been changed into a h by the addition of a middle line; the l of the fourth name has been turned into a h; the following k and that of the next word have a line joining the inner arm of the crossbar and the bottom of the curve; the next letter is a r with the two arms joined by a line; the following h has been changed into a h and the h after the following n has been altered to a y by the addition of a line across the forks.

By Q’sn son of N\text{ẓr} son of S\(^1\text{ḥr}\) and he found the inscription of {his} paternal uncle and {he was sad}

**Commentary:**
The author forgot one of the \( d’s \) of \( dd \) and wrote it slightly below the other letters. He also wrote an ‘ after the word \( dd \) and then changed the letter to a \( h \). There are two equally possible restorations of the text at the end. The author has either omitted the \( n \) of \( ng \) as suggested above or he has left out a \( w \) intending to write \( w \ wg \) “and he was sorrowful”. There is a series of lines on another face of the rock.

**Commentary:**
Only the curve of the second letter of the final word is visible but it is most likely that it is the remains of a \text{k} and the word \text{bkrt} should be read. If this is correct, the drawing is most unusual since there is a very widespread convention in Arabian rock art including that associated with the Safaitic inscriptions, of showing female camels with their tails curled up and male ones with their tails hanging down (as here). The inscription and drawing are surrounded by a cartouche and there are scratches over parts of the inscription.

Commentary:
This is an unusual inscription on several counts. Slaves traditionally “do not have” relatives, but this text is full of them. Possibly, Whblh belonged to another tribe in the area and had only recently been enslaved by the \( l\)\( \sim \)rt (probably a small social group, which is not otherwise known, since it is difficult to imagine how it would work if he had been a slave of a larger group). He is therefore missing his immediate and wider family, and this is the first time the term \( mrby \) “foster child” has occurred in Safaitic, while \( h\tn \) “wife’s relations” is known from only one other text (C 4980). The text is clearly and expertly carved but the form of the final letter is puzzling.

### KRS 196

I ----lm bn ḍkr bn ḍ([h])ḥt h- b(y)f

By ----lm son of ḍkr son of (ḥdṭ) bb(y) f

**Commentary:**

There are some lines before the beginning of the inscription and the first letter of the first name has been damaged by hammering. In the third name, the interpretation of the letter after the ḍ is difficult. It is most likely that the author intended to write ḍḥdṭ and wrote a d and then realising that he had left out a h he added a fork to the letter to change it. He did not however rewrite the d which then needed to be added. There is a h, a ḍ, a long line with a loop which might be a ḫ, and a possible f after the third name which are difficult to explain.

By Rhdt (son of) ---- (son of) Hys’t r son of ḏḥdt son of ʾs’d y is the (carving)

**Commentary:**

The text between the first and third names has been scratched over and is very faint. It seems likely that the second name should be restored as brbr as the name rhdt bn brbr occurs in KRS 199 and the genealogy rhdt bn brbr bn hys’t r bn ḏḥdt bn ʾs’d y occurs in KRS 189. The ḫ of ḫṭṭ is damaged by scratching. The drawing shows a horseman spearing what appears to be another equid, possibly an onager.

**Commentary:**

The text is surrounded by a cartouche. The author omitted the ḧ of the fifth name and squeezed it in above. The n of bn gadr was also originally omitted by the author and then added to the right of the b. The third letter from the end is slightly damaged and it is possible it should be read as a w. However the line in the circle is shallower than the other lines of the text and is probably an incidental hammer mark.

By 'kr bn 'brq'n is the young female camel and he camped here [among] spring herbage and may he who is arrogant be thrown of the grave

Commentary:
The text is surrounded by a cartouche. The last part is presumably a curse in which the author has omitted the deity's name. He has written ṭ 'ty twice. The author seems to have carved a r before the l near the neck of the camel. 'ty is probably to be interpreted from Arabic 'atū "he behaved proudly".

t l- ṭwṣn (ṣ)y r- rʾy gm{l} s¹nt ṭwm m- ḥrbt
This [the writing] is for {Wṣn} who [return{ed to a place of permanent water} during the rising of Gemini the year Wgm died of extreme old age

Commentary:
There do not appear to be any letters before the first t which is written below the horse’s head. It is possible that the text is a continuation of KRS 210 but it would be unusual as the end of that text is at the bottom of the rock and these letters are at the top end. The second š is doubtful as the prong seems more lightly scratched and might not belong. It is possible the letter should be read as a y. The second l is more lightly scratched than the other letters of the text. Interpretation AA. For the translation of b- rʾy gml as “during the heliacal rising of Gemini” see Al-Jallad forthcoming. A similar phrase is found in SIJ 827: w yr m- mdbr b- rʾy gml. The interpretation of ḥrbt is based on Arabic hariba, a dialectal form of harima, “to become extremely aged” (Lane 2889 b-c), something unusual enough in the desert to be suitable for dating.

Commentary:
The reading of y at the end is clear although it is difficult to explain. It is possible that it is a dual form “two paternal uncles” although one would expect the enclitic pronoun -h “his”. The two possible interpretations would seem to be either that ddy is a previously unknown personal name, or that the author has changed to the first person and it means “my paternal uncle”.

[l (h)mʿ đ bn db h- s¹knt]

By {Hmʿ ḏ} son of Db is the dwelling [?]

Commentary:
The second letter is rather ineptly inscribed and the fork is not clear. Despite the presence of a drawing of a camel the final word is clearly not bkrt but s¹knt, which would mean "a [single] dwelling". The implication is something permanent rather than a tent (bt). The word recurs in WGG 1 (see Al-Jallad 2015: 341). For a discussion of possible settlements of the 'lḌf, see Macdonald, Al Muazzin, & Nehmé 1996: 462–464.

l ḏḥy bn sʾwr w ʾnw {f}grḥ h rdw bdd ʾm ṣgrḥt h

By Ḍḥy son of sʾwr and he was obedient as a hired man and so ṡRDw [grant] his share of his {pay}

Commentary:
The reading of the second ’ is rather doubtful as one of the prongs of the letter is indistinct and it is possible it should be read as a ḥ. For ’nw cf. Arabic “anā (√NW)” “he was obedient, submissive” (Lane 2178b).

Corpus of Safaitic inscriptions
By Nʿmy son of Brkʾl and O {Yṭ} join him with the one whom he loved

**Commentary:**
The letter read as ṭ is partially covered by the letters of KRS 309 and is restored on the basis of the context in which it occurs. It is possible there are two ṭs after then s² but one of the small circles seems much fainter than the rest of the text. Translation as in Al-Jallad 2015: 98.

$l$ $hʾṣd$ $bn$ $kd$ $g(h)$

For $Hʾṣd$ son of $kd$ is the (scratching post)

**Commentary:**
The penultimate letter is rather carelessly inscribed. We have interpreted $gd$ from Arabic $جدد" a post, or piece of wood, that is set up in in the place where camels lie down, at their watering place, for the mangy camels to rub themselves against it." (see Lane 397a). Alternatively it could be related to Arabic $جاعه "happy". In earlier editions of this database there was a cross-reference to $hʾṣd$ $bn$ $ʿkhdgʾ$ in KRS 594. However, this is the same inscription and has been removed.

By ġyrʾl son of S¹ʾd son of ġyrʾl and he found the writing of Zkr and so O Lt [grant] security to the descendant of Zkr

Commentary:
There is an extra / at the beginning of the text at a slightly different angle to the rest of the text presumably the author decided to xarve the inscription in a different direction to that in which he had originally started. In the light of KRS 379, it seems likely that the author here is using the word bn to mean "descendent" rather than "son".

Commentary:
There is a straight line after the final y separating it from an earlier part of the text. For ṣḥt cf. Arabic ṣuffāḥāt, the plural of ṣuffāḥ “camels whose humps have become large so that the hump of the she-camel occupies the whole of her back” (Lane 1696a).

By {Wṛ} son of {N} s¹ son of āmrt son of ḫr-­‐-­‐-­‐-­‐

Commentary:
A cross has been scratched over the w and a line across the ‘; the n of the first bn has been joined by two lines to the following letter which is probably also a n; the next letter is partly covered by hammering and only a short line is visible; there are some miscellaneous lines after the next bn and there is a line through the ‘in the following name; the arms of the next two r’s have been joined to the back of the letter by diagonal lines and the arms of the next two t’s are joined together. There is hammering after the final r and no more letters are legible. The names nks¹ bn āmrt bn ḫrg occur in KRS 1829 and 1830 and it is possible that nks¹ and ḫrg should be restored here for the second and fourth names respectively.

--- bn ‘ḥl{(m)} w ‘wr h-­‐-­‐-­‐-­‐ s¹fr

--- son of ‘ḥlm and he scratched out the writing

Commentary:
What comes before bn hl{(m)} is difficult to make out on the photograph. The m of ‘ḥlm has been altered by the edition of an extra lin to make it look like a w. This is an usual text as the author seems to be claiming that he “scratched out the inscription”. Both KRS 391 and 392 are to some extent damaged by hammering.
However, the fact that some letters of KRS 392 seem to be written over some letters of the present text suggests that KRS 392 was written later and that the author is not referring to this particular damage. It seems more likely that he is referring to the changes made to the letters of KRS 391.

lʾb bn sʾdy h- ḫr w qtl hgmł

ʾb son of Sʾdy was here and he fought with Hgmł

Commentary:
There are some scratches covering the inscription. The text has been translated from Form III of the root qtl qātala "he fought" but there is not enough context to be certain of the translation. It is possible that the verb should be translated on the basis of Arabic Form I qatala "he killed" and that the phrase should be translated as "he killed the camel" or "he killed Hgmł". However, the former translation begs the question "which camel" (one might expect rather w qtl gmł (*and he killed a camel*, for food or sacrifice), while the latter would be a dangerous announcement to make.

By Mt---(n) son of (mt) and he longed for --- and for Qymt and (for) Khl (and) for W¹l and for Whbn (and) for ḡrb and for (Shbn) and for (Hnn)

Commentary:
The inscription is badly damaged by abrasions and hammering. The first n is rather short and the second m is damaged. After the first occurrence of l there are two lines with prongs which are partially covered by an abrasion and which might be s's, s's, or b's. There is sufficient space in between them for another letter. No w is visible after the name qymt and the following l is damaged as is the w after the khl. The w after whbn is covered by an abrasion. The s is an unusual shape consisting of a small circle with two lines attached, and the last two letters are damaged by hammering.

{By} Ms’h son of (Gzl) son of S²rk son of (Gyr¹l) son of Ms²r and he pastured the ḫrh and so O Lt [grant] security and blind whoever {scratches out} [the inscription]

Commentary:
A prong has been added to the initial l. The s, k, and b of the first name and the following bn have been inscribed so that the letters are touching each other; lines and scratches have been added to the t of ġzl; the y of Gyr¹l has been changed to a s and the ḫ has been joined to the l by the addition of a third line to the prong. The w of the last word has been obscured by a chip. The last part of the inscription is written on an adjacent face. The word ḫ- ḫrh is difficult to interpret. All the letters are clear, but it is difficult to find any parallels to such a word. The context requires it to represent a type of animal, a topographical feature, or a type of pasture.

l w(g)r bn ----

By {Wgr} son of

**Commentary:**
The text is written vertically behind and below the smaller camel and is difficult to interpret as it has been tampered with by the addition of lines and infilling. The w has been joined to the initial l by a line. The third letter might be a g but the variation in technique of some of the hammering suggests that it might have been a b and then the arms were enclosed by a line. The r has been joined to the following b by a line. The n is joined to the following letter which is an infilled circle. It is small enough to be an " or it might be a g or w. The next letter is a line with a slight protrusion in the middle. It might be a q with the loop filled in or a t or the protrusion might be part of a line joining the letter to the preceding one in which case it should be read as a l. The last letter is a line with infilled loops at either end. It might be a ḫ or a ǧ.

Commentary:
Some of the letters are damaged. One end of the penultimate letter is covered by a hammer mark and it is possible that it is a ʾ, ṣ, or ḥ. The word ḏ(y){ṣ}{y} is found referring to a drawing of an oryx in SIAM 26. However, there is no sign of a drawing of one here. An alternative explanation of the final word is that it is a nisbah but no group with a name *l dʾ(t), ḏs(t), dhʾ(t) is known.

{l} ʾṣhb bn ṭḥrt bn ḏb’ bn s¹ḥb bn {r’}

(By) ʾṣhb son of ṭḥrt son of ḏb’ son of S¹ḥb son of {R’}

Commentary:
The initial l is covered by abrasions. The penultimate letter might be a r although one arm is at a strange angle and the other is not quite attached to the line. The second ʿ is on the edge of the rock and it is unclear whether or not the inscription continues on another face. If it does not and the reading of r is correct, it is possible that the letters are a metathesis of the name ʿr. The sequence of names ṭḥrt bn ḏb’ bn s¹ḥb(b) bn ʿr occurs in KRS 734. \[ l \{s\}dm \{\{b\}\}\{\{n\}\} \ wty \ \{\{b\}\}\{\{n\}\} \ f----(h) \ w \{w\}\{g\}m \{f\}l: \ w---- \]

By \{sdm\} \{son of\} Wty \{son of\} F----\(h\) and \{he grieved\} \{for\} W----

**Commentary:**
Most of the inscription is covered by KRS 696 and some of the letters seem to have been altered and so the reading is very uncertain. The second letter could be a t and the third letter might be a q. The n's in both the occurrences of bn appear to have been extended to enclose the arms of the b's. All that is visible of the second letter of the third name is a line. The third letter of the name might be an ʿ or a h. The central part of the third w and g are covered by parts of the letters of KRS 696 and the ʿ is a rather large circle. After the fourth w there are lightly scratched lines and it is difficult to know what should be read.

---- son of ḏl son of Bsʾlmh son of Mkm bn of -----

Commentary:
It is seems likely that KRS 749 should be read as the beginning of this text. The letters of the last name are very faint.

Provenance:

KRS 751

I kf---y bn ---fn h- bkrt wbḍ---

By Kf---y son of ---fn is [the drawing of] the young she-camel wbḍ---

Commentary:
There is hammering between the f and y and there is room for one letter which might be a r. Some more hammering is covering the first letter of the second name and the last part of the inscription. After the d there is probably room for one letter and then the fork of the last letter is visible and it might be the remains of a ʾ, h, or s. There is a drawing of three camels claimed by this inscription and KRS 750.

----d b(n)\(\{(f)\}h b n f w(l)\)

Commentary:
The text is written along the edge of the rock to the right of the end of KRS 789. It is possible it should be read as a continuation of KRS 788 and that some letters have been obscured by abrasions before the d read here and what has been read as the end of KRS 788. Commentary:
The ṣmd often occurs in connection with ḥ:mm "sacrifice" and since in Arabic al-ṣamad can signify al-nasab "the setting up or erecting a thing" (Lane 1726c) and ṣamad means "elevated ground", it seems possible that in Safaitic it may have meant a place where sacrifices were made.

---(y)w Ṣḥq {ḏ} ṣwr ḥdl---- and he watered at (al-Namārah)

**Commentary:**
The text is written on three faces. The first was not photographed and, from what is visible of it, it appears to be covered in lichen. The first legible letter might be a y, s, or t as only a line and a loop can be read. The letter read as ḏ is doubtful as the lines of the prong are short and indistinctly inscribed. The fork of the first ḥ is rather doubtful. After the ḥ and before the fourth w there is a rather large curve shape and it is difficult to know what was intended. The photograph is not good enough to be sure that the letter at the end is a t.

By ġyrʾl son of ʾšʾr b----rr bn ((()))⁺⁺⁺⁺h

Commentary:
There is some scratching after the first n which suggests the author made a mistake and then crossed it out. It is difficult to interpret the rest of the inscription as it seems that some letters have been changed and other letters have been written over them. The letters dgm have been written over the patronym. After the second b the photograph is not very good and no letters are visible until the two r's. The letter after the second n might be an ʾ but it seems possible that it was originally a l and then a curved line was added to one side, either to change it into an ʾ or to superimpose a r. The following letters are quite clear although their meaning is obscure. There is a m written across the fourth ʾ and the h, possibly because someone else was trying to turn the original name into his own name. There is a possible t above the inscription and perhaps lines of other letters as well.

By Wzy son of Kff and he pastured the camels on spring herbage and the later pasture

Commentary:
Ḫlf would appear to be the equivalent of Arabic hilfah that is plants that grow up after the spring herbage (bql) or "that comes forth not from rain but by reason of the cold of the latter part of the night", or herbage that appears in the season of syf (Safaitic ṣyf) "after the spring herbage has dried up". Commentary:
The first letter of the second name looks more like a w than a ḫ, but the sequence of names in other inscriptions on this rock suggest that ḫ was intended. It is possible that the author left out the name q after ḫbd as the sequence mlk bn ḫbd bn ḫ occurs in KRS 979 and 981, and mlk bn ḫbd bn ḫ bn s²rb in KRS 982 on this rock. The last letter of the text is slightly damaged and the photograph is not very clear. It is possible that it should be read as a r.

**Commentary:**
The lines of the second ' are slightly doubtful and the fourth d is doubtful as there is an extra line which gives the letter the appearance of a g. The author seems to have made a mistake after the deity's name s's\ 'hqm and then attempted to cross it out. Another example of how 'm is used of the grandfather and all direct ancestors above him. \(\{By\}\) \(S^{1}\)----son of \(S^{1}\ ny\ son of M\ h\ n\ n\) and he grieved for \('s^{1}\ h\ r\ \)

Commentary:
The first name and following \(b\ n\) are partly covered by hammering. It is possible that \(s^{1}\ ny\) should be restored on the basis of \(s^{1}\ ny\ b\ n\ s^{1}\ n\ y\ b\ n\ m\ h\ n\ n\) occurring in KRS 984 from the same site. There are some letters directly after the name \(m\ h\ n\ n\) which have been scratched over. They appear to read \(w\ wg\ ----mg\). The \(g\) is written to the side of the other letters and the hammering completely obscures the next letter before the \(m\). It seems likely that the author was going to continue the inscription in this direction and then changed his mind and wrote the second part of the text curving up the rock instead.

By Ṣʔrk son of Ḫr son of (Sʔ knr) son of Šbh and so O Sʔḥqm blindness to whoever (scratches out) [the inscription] w ----ḥdrḥ(d)rnḥnsf̀ḥwn’mh

Commentary:
The author wrote a ḫ at the beginning of the third name presumably because he forgot he had already written the name Ḫr. He then scratched out half of the letter leaving a V shape with a vertical stance which he appears to have used as a sʔ at the beginning of the name. The m of sʔḥqm has been decorated with lines. The two letters after the second w are partially covered by lichen. The first might be a sʔ, g, or w and the second might be a t, s, or y. The loop of the second ḫ is damaged and rather doubtful. The author has omitted the w in y’[w]r. It is difficult to make sense of the end of the inscription

Apparatus Criticus:
Macdonald 1995: 286: s’t qttl hrdš "the year Herod died mad"; probably referring to Herod the Great

Al-jallad 2015: 131: s’t qttl hrdš - the year Herod waged war

Commentary:
The ‘s and ts have "square" forms. After the w following the name ms1k the text continues in two directions one of which has been abandoned. The author wrote wgm ‘l m and then presumably decided that if he continued in this direction there would not be enough room to complete what he wanted to say and so continued to the right instead. There is scratching over the ninth ḡ and the fourth letter from the end is a loop which might be a g or a m similar in form to the m of the word s’tm. On the interpretation of s’t as "he served [in an army unit]", see Macdonald 2014: 159–160. We have interpreted s’t [l-] ḡ’f ḡw as "he served {under} ḡfr the commander", literally "he served, ḡfr being commander", compare Arabic 'alay-hi amr “command lies upon him, he is in command”, (Lane 2145a, and see Macdonald 2014:160, n. 78). **Commentary:**

The line of one prong of the ‘\( t^r \) is rather faint. After the \( t^r \) of the second name the author continues the inscription below the beginning of the text probably because he calculated that he would not have enough room unless he made the loop of the inscription rather larger. ---- son of Hy son of ɿb h son of Hy son of {Gnɿ} {son of} ---- bn and he camped here

Commentary:
The beginning of the inscription is not visible in the photograph and the n of gnɿ and the following bn are faint and uncertain. The sequence ɿb h bn hy bn gnɿ bn ɿb h occurs in KRS 1047 and 1281 but it does possible not seem possible that the last name here could be ɿb h.

By Dʾyt son of ʿsʾlm and he pastured on account of (Suhayl)

Commentary:
There is a slight gap between the second m and the following letter but there does not appear to be anything written there. The letter read as the second sʾ is a different shape from the first one and is written the other way up. There is a further straight line after the third l which might be a another letter or intended to be part of a cartouche which was never completed around the inscription. The word m- sʾhl probably means "on account of Suhayl" (Canpous), the star whose rising introduces the first winter rains in October. See Musil 1928: 7–8. See also Macdonald 1992: 2.

**Commentary:**
The ḏ has a loop in the middle of the vertical stroke and it is possible that someone has tried to alter the letter probably to a d. The line below the animal and after the g above it are more lightly inscribed than the letters and are extraneous to the inscription.

l {ḥ}(m) bn ṭdg bn ḥl bn ḏḥdt bn k(f)bt bn ḥmyn

By ḥm son of ṭdg son of ḥl son of ḏḥdt son of ḫbt son of ḥmyn

Commentary:
The second letter has a slight abrasion over it and the third letter, if it is a m, has not been completed at one end. One loop of the f is doubtful. The following letter appears to be a b. The sequence ḥl bn ḏḥdt bn k(f)bt bn ḥmyn occurs in KRS 1076.

{lĥ}lf bn ----{r} w wgd 'tr 'b -h f ng'

By {ĥlf} son of ----{r} and he found the traces of his father and so he grieved in pain

Commentary:
There is a line in the middle of the first letter and it is not entirely certain whether it is part of it or extraneous. It is possible the letter should read s¹. The first letters of the second name are partly covered by an abrasion and it is unclear how they should be interpreted. The first r is also uncertain.

{l}q---- {bn 'dm w h lt w s²][f][h]q[mt gyrt w w---- n'm f ng'}

By Q---- {son of} 'dm and O Lt and {S²'hqm} [grant] abundance and w---- n'm and so he grieved in pain

Commentary:
The letters after the first q and the fourth w are covered by abrasions. It is quite likely that w/g/d/ {s²}[f][f][r] n'm "he found the inscription of N'm" should be restored in the latter case. KRS 1124 which is on the same rock is by someone called N'm. The author appears to have omitted the ' and h in the deity's name.

By N'm son of Rgl son of S'd son of 'lyn son of Mrwn and he grieved for 'n'm and for Nṣr'l and (for) Qdm and
for ’bgʁ and he kept watch for the enemy and so O {Lt} may he be secure and blind whoever scratches out [the inscription]

Commentary:
There is a hammer mark after the fourth bn and it seems likely that the author made a mistake and then crossed out what he had written. The sequence š’d bn ’lyn bn mrwn recurs in KRS 1567 and š’d bn ’lyn bn ---- wn in KRS 1233. The author has omitted the l of ? before the name qdm and there is an abrasion after the l of the deity’s name. From the shape of the damage it is most likely that the damaged letter was a t. Commentary:
The loops of the first and third yʾs are doubtful and the crossbar of the second wʾ is faint. The letters after the fifth ḥʾ are written on the edge of the rock and it is not entirely sure that there are not further letters between the ḥʾ and the ḫʾ.

\( l \text{mg} t \text{bn} \text{n'1 w wrd f ny tl hms}^{1} \text{m-} \text{nmrt f h b'ls'mn [][][][][][]} \text{rwh} \)

By Mght son of Gn'l and he came to a watering-place f ny tl hms\(^1\) m- nmrt and so O B'ls'mn [grant] relief from adversity and uncertainty

**Commentary:**
The passage between wrd and the prayer is difficult to interpret. It seems unlikely that nmrt here refers to al-Namārah since this always appears as h-nmrt in Safaitic. The author wrote mrwḥ after the deity's name and then crossed the letters out and wrote the word rwh next to them.

By Bnt son of Z'n son of Hts'\(^1\) son of Ws'\(^1\) m is [the drawing of] the horse and O Lt may whoever {scratches out} [the drawing of] the horse be thrown out of the grave

**Commentary:**
The inscription is partly covered by later hammering over the drawing. There is a w carved slightly below the inscription between the w preceding the deity's name and the q of nq't. It is inscribed in a different technique from the rest of the letters in the inscription. There is a letter that has been crossed out by being filled in after the y of y'w. The w and r of y'w are covered by the later hammering. The r and s' of the second frs' are carved on another face of the rock and cross the last three letters of KRS 1167.

l wdl bn sʾm b[m]t mtr bn ʾws{ } w syr hrṣ f h lt w dsʾr slm

By Wd son of Sʾm son of Mṭr son of ʾws and he returned to a watering place hungry and cold and so O Lt and Dsʾr may he be secure

**Commentary:**
The word hrṣ can mean “he was on the look-out” or “he was hungry and cold”. Since there is no w between syr and hrṣ, hrṣ describes the circumstances in which “he returned to a watering place”, in which case “he was hungry and cold” would seem to be a more appropriate translation, though “keeping watch” is not impossible.

Commentary:
There are two lines and traces of a small curve at the beginning of the text. There is a horizonatyal line at the top of the lām auctoris which, however, is different from the other lines in the inscription. The y of r'y has a fork at the top as if it is serving as both a y and a h. The following word seems to read 'by or 'bm. The second line of the text is very uncertain.

Commentary:
The second letter is faint and there is some lichen over the next letter or letters which makes it difficult to know how it should be read. It seems likely that the author wrote a r after the second g and then realising that there was not enough room to continue the inscription down towards KRS 1213 wrote another smaller r and then, without crossing out the first r, continued above KRS 1213.

Commentary:
The second letter is considerably larger than the other ᵇʾs in the text, but ᵊyn seems a more likely reading than glyn. The sequence rgl bn ᵈʿd bn ᵊyn bn [][] mrwn occurs in KRS 1124. The author appears to have made a mistake before the fifth name and then crossed out a letter which also seems to be the case in KRS 1124. The sequence ᵈʿd bn ᵊyn bn mrwn occurs in KRS 1567. By ----l son of ---- son of ----(h)r son of ---- son of ʾs²ll

Commentary:
The inscription has been hammered over and only a l of the first name and some lines of the second name are visible. There might be a further letter after the second bn or the name might be (h)r. The name before
bn ʾs²ll is illegible because of the hammering.

By {Ḫf}

**Commentary:**
There are scratches over the first part of the text. It is possible the first name should be read $hll$ or $h(d)l$. By Ḥdr son of Drʾl and he grieved for ʾš’d

Commentary:
There is a short line after the ḥ but it is lighter and inscribed with a thinner point than the rest of the text and is probably extraneous. The n of the following bn is a long line attached to the arm of the b, see the second bn in KRS 1278 which is inscribed in a similar way. There is a line across one fork of the ‘giving it the form of a š.

Commentary:
There is a step in the rock between ʾšʾlm and nḥb and it is possible that a ṣ was inscribed very lightly because of the awkwardness of the surface or simply left out. The letter after the ʾd is more like a ṣ. There are
some further letters on another face of the rock which it is not possible to read with certainty from the photograph. They might be a continuation of this text and might read ḥlʾ or possibly ḩlʾ.

1 bh/lj bn nqr bn w’l bn s²zht

By {Bḥlh} son of Nqr son of Wʾl son of S²zht

Commentary:
The second l is a rather short line. The sequence wgm bn ’s²/l bn nqr bn wʾl bn ḥztr recurs in KRS 1569 and it seems likely that the fourth names in these texts should be read as the same although the readings in both cases are clear and it would assume a metathesis of the middle letters in one of the texts. None of the roots from the possible combinations are attested although s²ḥzn is attested as a man’s name in Qatabanian (see DASI).

{l m(j)l} b{n h(h)r} m h- h(k)r

By {Mʾll} son of {Hḥrm} is [the drawing of] the {young she-camel}

Commentary:
In KRS 1300, which is below the left camel on the same stone, we find what may well be the same sequence, mʾ ll bn hḥrm. In both cases the ʾs in the first name have short horizontal lines at their tops, even though the lām auctoris does not. In each case too, the ʿ has a medial stroke making it appear like a w. The second and third letters of the second name are partly obscured by the drawing. It is possible the third letter is a r, although only part of it is showing. A line has been added across the fork of the first ʾ; possibly in an attempt to change it to a y. There is a lightly scratched line turning the k into the shape of a m.

\[ l \{(h)\}n'(\{f\})\{(b)\}\{(n)\}\ q'(\{s\})mt\ bn \---- \]

By \{(Thn')\} (son of) \{(Q'ṣmt\} son of----

**Commentary:**
It appears that many of the letters have been altered. The fork of the h has been infilled to form a y and one fork of the ṣ has been changed into a loop to form a s. The arms of the first b have been joined by a crudely scratched line and following n has been extended and a loop added in the middle to form a d. A crossbar has been added to the ṣ and a short line drawn across the fork of the ṣ to form a ṣ. The end of the inscription may be under the wasm or the drawing.

{l} b {s¹}m h-gml

By l son of {s¹}m is [the drawing of] the male camel

**Commentary:**
The reading of the names is doubtful as the author of KRS 1318 has written over parts of all the letters of the name after the third one. He has probably also hammered round the originally scratched outline of the camel and the g and m of gml. The letter read as b has a rather shallow curve and what looks like a fork at one end, though this is probably a mistake. The tail of the s¹ is rather long. There might be another letter after the first m covered by hammering although there is not much room.

l bny bn zn¹l bn tm w wgm ‘l-‘b-‘h w ‘l-‘s²y’-‘h f wh l-‘bd w h s²qm rwh l- }(ḍ) s¹lm ḥll (ḥ-k)

By Bny son of Zn¹l son of Tm and he grieved for his father and for his companions and so he was distraught for ever and O S²qm [grant] relief from adversity and uncertainty to {him who} s¹ln ḥll (ḥ-k)

Commentary:
The eighth letter has three prongs with a line going across the top. It might be a y but the enclosing line is shallower than other lines of the letter and it seems more likely that the letter is a d and that the line was added later. The line of the k at the end does not continue beyond the curve of the letter probably because it is written on the very edge of the rock. It is possible that the text continues on another face of the rock which was not photographed.

Commentary:
The letter read as ʿ in the word s²r has a shallow tail but it is almost certainly incidental. There is a shallow stroke after the first Ṣ and it is possible it should be read as a n. See Al-Jallad 2015: 333 for Ṣbl, and 152 for mʾḥwq.

By Rb' son of Bqr son of (Rf't) son of S^{q}qr son of Gml and O {Yt'} blind whoever scratches out [the writing]

**Commentary:**
The ends of the line of the first $f$ have been joined with a curve which gives the letter the appearance of a $m$. The name $s^{q}qr$ was presumably left out originally and was then inscribed in between the lines of the first names and final names of the text. No $bn$ was added before it. The $\text{}$ of $yt'$ is much larger than that of $w{r}$, and
does not seem to be a complete circle. But is difficult to see what else can have been intended to be.

Commentary:
Several of the letters in the text have been tampered with. The second letter is a large oval with a line across it. It seems likely, given that the w's of the text are smaller, that the letter should be emended to a g. The r's of the first name and the deity's name have been changed to m's. The n of bn has been altered to a h, the first n of the second name has been changed to s, and the second has been changed to a t. The k of ḡkr and the b of ḍbb have been altered to b's. l qtl bn ḥrsʾn bn qnʾl bn kmd w wh ṭmtkr ḥbb f ḥbb f ḥbb f ḥbb w ḥṛṣʾ l- qa ᵃ r f h lt w s²ḥqm <g>nty

By Qtl son of Hrsʾn son of Qnʾl son of Kmd and he was distraught with grief remembering friend after friend
after friend after friend and he kept watch over those who remain and so O Lt and S²ḥqm [grant] abundance

**Commentary:**
There are some scratched out lines possibly letters before the beginning of the text. The fourth letter from the end is a s² but it seems likely that it is a mistake for g and the word ǧnyt should be read.

By (Qḥs²) ---- and (he pastured) the (camels) and so (Lt) may he be secure from despair

**Commentary:**
The letters are very faint and some of them seem to have been altered. There appear to be traces of a h and two g’s after the first name. The r after the w has been changed to a m the b of the next word has been made into a g and a cross line has been added to the l of the deity’s name giving it the appearance of a s¹

and so he became weighed down [with grief] and so O Lt [may whoever remains be secure

**Commentary:**
The author wrote a w after the first h and then scored over it realising that he had made a mistake. The penultimate letter of the fifth name is very worn and the middle line of the $d$ in the eighth is not visible. The cross-lines of the second $d$ in the ninth name are faint. The author wrote three w's after the word $ywr$, presumably by mistake.

**Commentary:**
Many of the letters in this inscription are turned at 90° to the direction of the text. The ʾ and n at the beginning are clear and then there seems to be an extraneous line, a y, and then a slightly curved line which might originally have been a r but which has had a loop added to one end and possibly a fork to the other turning it into a s. The fifth letter has a slanting extension which is probably an extraneous hammer mark.

Commentary:
The last letter of the fifth name and the two following letters are damaged by a chip. It seems likely that ṡ should be restored at the end of the fifth name given the curve that remains of the letter and the occurrence of the sequence sʰhyt bn ʾs¹ bn ḥg in KRS 1486, 1489, and 1491. Enough of the following two letters remains to restore ᵙ and ῥ given the context of the next part of the inscription. On the possible spelling of the month name nīsān with a s see Al-Jallad 2015: 45. If this interpretation is correct, having to go to a place of permanent water in this month (March-April) would be sufficiently unusual (and disastrous) to be worthy of mention. The next word is difficult to interpret. The plural relative pronoun, ʾdw, is unusual in this formula. Despite the damage, the third letter from the end is clearly a ʾ (i.e. one form of the definite article) not a ḥ, and author appears to have omitted the ḥ.

Commentary:
The rock is scratched after the s¹ but there are traces of letters. There is a circular shape after the bn but it is inscribed in a different technique and is most likely extraneous. By Mʿz son of S¹dʿ w ---- the {young she-camel} w{l} {ḥ}t w fl{m} ----{l}s¹

Commentary:
The author has crossed out a letter after the z. After the first w there are traces of letters but it is unclear what they are. The letter read as r is doubtful as it does not appear to have two arms. The five letters after the second w are damaged by a chip. The l and ʿ are doubtful and the following letter might be a r, ʾ or ʿ. After that, there are two letters of which only the V-shapes of the the forks remain. The end of the inscription runs into the end of KRS 1492 which makes the reading difficult. There is a ḏ written over the second m and the following w should probably be read with KRS 1492 although that leaves a rather large gap in this inscription. The next letter is partially covered by some scratch marks. The following n belongs to KRS 1492 and the l is connected to the arms of a b in KRS 1492 and the s¹ is partially covered by the r of that text.

By ('rs³) son of 'nhm (son of) ('twb) and (he returned to a watering place) from settled lands the year of the war of Ḥbq and 's²ll

Commentary:
Several letters of the text have been altered. In the first name a loop has been made on one fork of the ʾ forming a s, a line has been added in the middle of the s¹ forming a h, and a line has been drawn across the ṣ forming a w. There are scratches attached to the n of the second name and the h of the name has two lightly scratched lines added to one fork of the letter. The lines after the second b are difficult to interpret. The n seems to be written under the arm of the b and attached to it with a line and then there is the form of a s² which might have been added later. A scratched line has been added in the middle of one fork of the next ʾ and the curve of the following b has been joined up to form a m. The loop of the s has been hammered over and only part of the circle of the q is visible on the photograph.

Commentary:
It is difficult to read the beginning of the second name as there is a slight hammer mark and scratching over the letter. The sequence ḏbb bn bdʾl occurs in the genealogy of KRS 710 and ḏbb bn bydʾl occurs in KRS 519 and 520. It is possible the author wrote a letter and then scratched it out. l l(fl) (b) n bḥḍh

By (Lf) son of Bḥḍ dh

Commentary:
The reading of the inscription is difficult and it seems possible that some of the letters might have been changed although there is little difference in the technique of the additions that might have been made to create the changes. The second and third letters seem to have been joined but it is unclear whether the second letter should be read as a l or a n with a slightly longer ligature. The fourth letter might be an ‘ with a second circle added later. If these corrections are right then the first name would read nf. The following letter should probably be read as a b with the shorter prong having been added later.

By Mks’r (son of) {Nd}r and (he pastured) (the) stony tracts (whilst migrating with tribe)

Commentary:
It seems likely that a number of the letters have been tampered with but it is extremely difficult from the lines of the text to be sure how the original letters should be read. The b and n of the first bn are joined. The following n has been hammered over. The prongs of the g have been joined up and a line and circles seem to have been added to the arms of the r. An additional line has been added to the middle of the third r possibly joining it to a ‘ in the form of a dot. It is possible that the next letter should be read as a ʿ, but there is a hammer mark over one line of the fork and it seems more likely that it should be read as a y. The next letter might be a ʿ or a h. The third n is attached to the arm of the preceding r. The crossbar of the w is rather carelessly hammered and the final letter might be a ʿ although the second dot at the end of the line is rather carelessly done.

Commentary:
The first name is carved in much larger letters than the rest of the text. The reading of some of the most crucial parts of the inscription are doubtful. After the first h the depth of some of the lines of the letters suggest that they have been altered. It seems likely that the letter after the h should be read as a s² which has been turned 90°. That it is not an h is suggested by the fact that the fork is much deeper that those of the other two h's in the text and the tail of the letter is not so long. The letter has a circle but it is not as carefully cut as the other lines of the letter and is shallower and it seems likely that it was added later to turn the letter into a s. The following letters are difficult to interpret. They are both the same and consist of lines with a slight curve at one end. They are too short to be ʿs and are different shapes from the ʿs and r's in the text which are respectively deep curves and lines with distinct arms. It seems most likely that they should be read as n's. As with the previous letter, it seems that they have been changed in this case to a r and a ṣ by the addition of arms to the first and a loop added to the middle of the second. It appears possible therefore that s³n h was what was originally carved and that it was then changed to ẓr d. After the second h, the n was incised almost touching the arms of the preceding r but there does seem to be a sufficient gap to be certain of this interpretation. For the interpretation of s³n h here and perhaps in KRS 1701, cf. Arabic sanan "a way, beaten track" (Lane 1438c).

Commentary:
It seems likely that the author wrote a m after the initial l and then changed it to a g by adding a short line across the indentation of the m.

lḫl bn ḏrh ((b))){{(n)}} s²{{(b)}}{{(k)}} jy ((b)){{(n)}} gm{l} w h yt’ flt l- ’lgṭ -h

By Ḫl son of ḏrh (son of) {S²bk} {son of} {Gml} and O Yṭ [grant] deliverance to his ḏlgṭ

Commentary:
The second and fourth b’s are attached by scratched lines to the n’s that follow turning them into circle shapes. After the s² there are two circles, the second with a tail. Although it is difficult to tell from the incised lines whether they have been tampered with, it seems from changes made to the other letters that the first circle was originally a b and the second was a k and in both cases the arms of the letters have been closed by the addition of a line. The last letter of the fourth name consists of two lines drawn parallel to one another. The sequence ḏrh bn s²bk bn gml occurs in KRS 1792 and s²bk bn gml in KRS 902.

Commentary:
For gr perhaps see Lane 400c ġurrah "a piece of wood about a cubit long having a snare at the head and a cord at the middle with which gazelles are caught". If this interpretation of gr is correct it is not clear whether the she-ass is wild and snared on purpose or a domestic one and snared by accident.

l (wb) nb (bn) ‘my (bn) ḫml ḡ{l}mt

By [wb] son of [bn] is [the drawing of] the slave girl

Commentary:
Incised vertically down the left edge of the face. Several letters appear to have been altered or joined together obscuring the sense of the text. It seems possible that the second letter is a w and lines have been added giving it the appearance of a g. The b has been joined to the following b by inscribing the back of the latter along the line of the b. The following b and n have been joined together as have the b and n of the second name. The next b and n have been joined together and a cross line has been added to form a w. The n of the next bn has been joined to the first letter of the fourth name giving it the appearance of a ḡ. A line has been added to the l after ḡ giving it the appearance of a s¹. All four inscriptions on the rock claim the drawing.

\[ l m\{\}'\}s b n nq d \{\}w\{s\} \]

By [M's] son of Nq ṭw\{s\}

**Commentary:**
The third letter is a line with an infilled circle at one end and infilling or destructive hammering at the other end. Originally it might have been an 'ṣ, ẓ, ḥ, or y. The next letter might be a ẓ but the way the loop is attached to the line and the slightly rougher technique used in inscribing the fork suggest that both might have been added later and that the original letter was a l. The third letter from the end looks like a ẓ but again, from the texture of the line of one loop, it is possible that it was a ẓ and the fork has been closed up. The last letter has the form of a ẓ but the fork is rather doubtful and it is possible that it was added later to what was originally a y. It is difficult to be certain about these changes but if the interpretation is correct then the word at the end would read ṣwy "he built a cairn". The reading ṣwy at the end is difficult to explain.

\[ l m'd b\{n\} \{h\}\{l\} b\{n\} \{'l\}b \]

By M'd \{son of\} \{H\} \{son of\} \{'l\}

**Commentary:**
The above is one possible interpretation of the inscription as the letters are crudely hammered and the author appears to have attempted to join them together. The circular shape after the fourth letter is probably a b and n joined together. The next letter might be a h or a t and the following line a l attached to a b. The next letter is probably a n with a hammer mark attaching it to the back of the d. After the ' there is a straight line, possibly a l, joined slightly to one fork of the ' and then joined to the next letter which is a b.

By ḥs'n son of hrn son of ḥs²kw bn {s²}{ḥ}ly w h'ns¹bh----dfs¹jl'qhqğzz

Commentary:
It looks as though the author wrote an ' and then surrounded the letter with a loop either as decoration or to form the w in the name ḥs²kw. The first letter of the fourth name might be a z. The next letter is damaged by hammering but three prongs are visible and the i is written to the side of the h and y and it is difficult to know whether it is a letter or extraneous to the text. The letter after the second h is damaged and badly formed. It is possible it should be read as a ʿ.

Commentary:
The name and patronym of the author of the inscription are hammered and the last part is scratched. There is a line of hammered dots near the end of the inscription. The last part is difficult to interpret. It is possible that after the second w the author wrote another w by mistake and then crossed it out. Commentary:
The loop of the ş has been hammered over. Given the context however the reading is probably certain. The inscription is notable as being one of the very few containing the second person pronoun suffixes, both singular (though apparently referring to two deities, see Al-Jallad 2015: 99, 143) and plural. It is also worth noting that the author invokes the Gd of both the two major tribal divisions (wj and DJ) in the area, cf. C 2246 whose author, however, had been pasturing herds of wдж and DJ.

By \text{Wqf} son of \text{Sfn} son of \text{Grm} and he protected two inscriptions belonging to \text{Gnt} from \text{Yfr}

Commentary:
There are some scratches over the inscription after the \text{r} of \text{s}'fr but the reading is clear. There are two inscriptions by someone called \text{gnt} on the same rock and it is possible that \text{Wqf}, the author of KRS 1693, felt they needed protection from someone called \text{Yfr}. Another interpretation of \text{m yfr} would be as a relative clause “who was keeping watch” referring to \text{Gnt}. In this case \text{yfr} would be the 3rd person masculine prefix form of \text{nfr} where the \text{n} has been assimilated.

Commentary:
There is a shallower line at a slightly odd angle which gives the last letter the appearance of a ḥ, but is clearly extraneous. The letters ḥmlk might be the proper name Ḥmlk or could be read as ḥ- mlk "the king". On the use of ‘yṯ for ‘wr here see Al-Jallad 2105: 125.

The second letter of the second name is written by a crack but it seems most likely that a k should be read. The first letter of the word after ḏtʾ might be a n as it is slightly longer than the dot of the other ‘ in the text. To {yb}t {son of} qm’t son of {M’y[r} {son of} {Bwb} {son of’rs’s} belongs the shelter and he grieved for {a friend} [who had been] killed

**Commentary:**
Lines have been drawn across the inscription and drawing and some of the letters have been altered making reading the original difficult and uncertain. The third letter, and the penultimate letter of the third name, which have been read as y have a line going across the loop and it is possible they were originally ḏ’s with the prongs closed by a line. The crossbar of the fifth letter is shallower than the down stroke and it is possible that it was originally a n. The following b and n have been joined together to form a circle. The fifth b has several lines forming the curve. There is then a line which was presumably a n which has been extended with thinner lines and a crossbar has been added at one end. There then appears to be another b, w, and b which are difficult to make sense of as a name. The following b and n have been joined to form a circle. A circle has been drawn around the first ṭ of s’tst. A curve has been added to the b of ḏb forming a w and the last b of the word has been changed to a g.

\( l \{m\}{d}d \{m\}\{n\} \{m\}'h \{h\}- dm---- \)

By \{Mdd\} \{mn\} \{M'h\} \{the\} \( dm---- \)

**Commentary:**
The shapes of the letters give the impression that the author was rather uncertain as to how to write. The second letter seems to be an unfinished \( m \) and the next letter is a carelessly inscribed \( d \). The sixth letter has the shape of a \( m \) as does the eighth, although the letter is indented and a different shape to the other \( m \)’s in the text. It is possible that the letters of this part of the text have been altered but, if so, it is not possible to distinguish the original lines. The first \( m \) could originally have been a \( b \) to which a curve was then added, the \( n \) to have had a loop added turning it into a \( d \) and the second \( m \) might originally have been a \( l \) to which a wavy line was added or a \( f \) to which a straight vertical line was added. The last word is partly hidden by another rock. It is possible that \( dmyt \) ‘drawing’ should be restored.

Commentary:
The reading is doubtful because it seems that the shapes of some of the original letters have been altered by attempts at joining them. There is a slight extension to one line of the d which joins it to the preceding l. The \{(b)\} of bn has been joined to the preceding l by two dots, making it look like a s', while the n has been joined to the following l giving the combination the appearance of a d. Commentary:
There is a recent wasm hammered across this inscription and KRS 1774-1775. The third bn, and the fifth and sixth names are covered by the wasm. The letter following ṛʿy has the shape of a s² but it is presumably meant to be a f. The r of ẓr and part of the fourth letter from the end are covered by the wasm. The latter might be a ṣ’, or a h. It is possible that a s² should be restored before the following m and {h-} {s²}my read but there does not seem to be enough space for another letter. By ‘by son of Ḥrg (son of) Bhṛmh son of Rft son of Gml son of (Zd’l) son of s²ll son of Ghł son of S²bk
Commentary:
There is a what appears to be an extraneous circle between the $b$ and $n$ of the second $b$. The sequence $b_{rg} \, b_{hrmh} \, b_n \, r_f't$ occurs in KRS 1289, 2723, and 2823.

{(l)} {{(b)}{(l)}}{{(d)}}{(r)}{{(l)}}{(l)}{{(b)}}{(b)}{(k)}rt w h- dr

By Bʿdh son of Sʿb son of ḏrh son of Sʿbky son of Gml is [the drawing of] the young she-camel and [he] was here.

Commentary:
Thin lines have been added to some of the letters. There is a slight curve added to the back of the initial l; a curved line has been added inside the arms of the b; two lines have been added to the ṣ and a line has been added on either side of the ḏḥ. An additional prong has been added to the ḏḥ and a fork has been formed at the other end; a line joins the arms of the ᵃ and a line is attached to the ends of the l of the fifth name. A line has been added to the following h forming three prongs at one end and a fork at the other; the b has been changed to a circle and a line has been added through the middle of the k.

l <ʿ>wdʾl bn s²----mh bn qdm<<<{t}

By {ʿwdʾl} son of {S²----mh} son of {Qdmt}

Commentary:
The second letter has a line across the circle but it seems likely it should be emended to ʿ. The d has been hammered over and there are scratched lines across the ʿ. The second letter of the second name is difficult to interpret but might be a s¹. The first three letters of the third name are rather squashed together and have been scratched over. They are followed by a h and a t which is doubtful as one line of the cross seems to be less definite than the other. It is difficult to explain why there is a h but perhaps it was a mistake that the author did not correct. Another possibility is that the lines read as q and d are in fact a q where the additional vertical line is incidental and the slight rubbing at one end of the h covers a loop, in which case the letter should be read as a ʿ. The name at the end would then read qmṣṭ.

By Dh son of Gyz son of (Ḫḫb)

Commentary:
The sequence "gyz bn s¹ḫb" occurs in genealogies in KRS 104, 519, 521, and 2447 and it is possible that the third letter from the end in this inscription has been rotated 90° giving it the appearance of a h rather than a s¹ with a tail.

l hn’ bn bs¹’ w wgd s²[f(r)] ‘s²[hy]’ -h f {s¹}dd

By Hn’ son of Bs¹’ and he found the (inscription) of his friends /{s¹}d(dd)

Commentary:
The arms of the r are uncertain. It seems likely that a y should be restored after the s² to read ‘s²[hy]’. The third letter from the end is indistinct it might be a s¹ or a h in either case it is difficult to make sense of the last three letters. There is part of a cartouche surrounding this inscription and part of KRS 1834.

Commentary:
The author has written s² instead of f before the deity’s name and in the word Ḫfg. Ḫfg occurs here and in WH 171 and ISB 113. A member of the Ahl al-Jabal, who inhabit the Ḫarrah of southern Syria and north-eastern Jordan, identified a plant of the Ḫarrah shown to him by Geraldine King as Ḫafag. Dr Sue Colledge later identified it from a photograph as Diplotaxis Harra. A deity Ḫ- brk has not been found before in Safaitic and it may be a way of referring back to B’ls¹mn. The translation of <f> h b’ls¹mn ḫlm mt- ḫ qbl w r’y h- ‘bl ḫ<f>g b- r’y’ qbt is that of Al-Jallad (forthcoming).

Commentary:
After the g there is the shape of a y where presumably the author forgot to extend the line on the other side of the loop to form a d. The last letter is on the edge of the rock and it is possible that the inscription continues on another face. It is also possible that, if ḫb is complete (i.e. that a second b has not been lost), it should be interpreted as a proper name "the inscription of ḫb".

Commentary:
One line of the letter after the word ks¹’ is faint and if it is a s¹ it would have a different stance to the other s¹ in the text. The following n is rather indistinct. The second q is doubtful as one half of the loop is filled in and it is possible the letter should be read as a d. See the commentary on this inscription in Al-Jallad (forthcoming)

There is possibly an ʿ which has been filled in after the first r. The sixth letter has a crossbar which appears to be slightly shallower and was probably added later. If it is intentional then the word would read b t "daughter". The letters of the second name have been altered. The first has been filled in and lines have been joined to the arms of the next letter. KRS 1964

l ḏbr bn s¹bʿ bn ḥl w s²ty ‘ny (‘)lt f ‘ḥls ‘‐ d’n ḏ’ ḥls

By ḏbr son of S¹bʿ son of ḥl and he wintered taken captive (or suffering distress) [and] {in deficiency} [of provisions] and he made safe the sheep of the lineage of ḥls

Commentary:
It is possible that the first letter after ‘ny is a ḥ but the form of the letter is probably closer to the examples of ‘ in the text than to those of ḥ. ḏ’ ḥls is carved in larger letters and the ḏ and ḥ have the Hismaic forms of these letters. It the ‘ before d’n is an article then the lineal affiliation must refer to the author rather than the owner of the sheep.

l mrḥ bn ymlk w sṭr f ḥnn ʾl-ḥ

By Mrḥ son of Ymlk and he had withdrawn far from his family and yearned for it [his family]

**Commentary:**
sṭr has been interpreted on the basis of Arabic šāṭara "he withdrew far away from his family; or broke off from them, or quit them in anger" (Lane p. 1550c). Although, Lane gives this as the meaning of šāṭara ‘alā ahlihi, the meaning of the active participle šāṭir "one who withdraws far away from his family; or breaks off from them, or quits them in anger" (Lane p. 1551b) suggests that the verb can mean "he withdrew from his family", etc. without specifying ‘alā ahlihi. In Arabic, the verb ḥanna "he longed for" takes the preposition ilā (Lane p. 652c) which suggests that the letters ʾlh after ḥnn should be interpreted as ʾl-ḥ "for it", rather than ʾl-ḥ "his family".

**Commentary:**
Part of the first r is damaged and the shape of the k resembles a h with a short tail or possibly a s¹. There is a short line after the second b but it is probably a result of the scratching over the end of KRS 2054. l s²ṭm bn grm(l)ḥ- gml[ŋ]

By S²ṭm son of (Grmlh) {is} [the drawing of] {the} {two camels}

Commentary:
The eleventh letter has a loop at one end which is not completely closed. The name grmy is not attested and neither is grml as read by SIJ. It is possible the letter should be emended to l and the name grmlh read. If this is correct, the final -ḥ and the following definite article may have been treated as a geminate consonant and therefore not carved twice (see Al-Jallad 2015: 38). The last letter is only a slight dash.

l s¹krn ـــf bn ṭ h ṭdy ḡ(n)mt m- ḡwlt h- sᵗṛṭ h- s²ṛs²

By S¹krn ـــf son of ṭ O ṭdy [grant] booty from ḡwlt [to him belongs] the shelter [and he was present at] the rugged place

Apparatus Criticus:
SIJ 253: l s¹krn bn ṭ ṭw bn ṭ ṭ h- ṭdy ḡnmt
SIJ 254: ḡwlt h- sᵗṛṭ h- s²ṛs²

[JSaN] p. 112: reads the second half of SIJ 253-254: ṭ ṭdy ḡnmt m- ḡwlt h- sᵗṛṭ h- s²ṛs² ṭ ṭdy ḡnmt m- ḡwlt h- sᵗṛṭ h- s²ṛs² O ṭdy [grant] a young girl, from ḡlmt, the modest, the beautiful

Commentary:
This inscription and SIJ 255-256 (= KRS 2077-2078) were originally on a boulder which had cracked into three parts with SIJ 251-252 (= KRS 2079-2080), KRS 2081 (not read by SIJ), and SIJ 257-258. The bulldozers creating tracks for the oil exploration vehicles in 1989 broke up the boulder and the parts were scattered around. SIJ 257-258 were not found by the Rescue Survey. The letters of the first name have been joined up by carelessly carved ligatures. After this, the text was very heavily scored over and SIJ’s reading of (s²ṭ bn) ḡf is not justified on the original. The third n is rather long and might have been added to later. After ḡnmt, SIJ reads the letters as a separate text (SIJ 254) but the spacing of the letters indicates they should all be read as one text, as suggested by [JSaN] p. 112, although his interpretation is clearly wrong. It is unusual that the author did not place a connective before the beginning of the prayer and it is possible that he left out a connective or preposition in the last part of the text.

A line has been added across the fork of the eighth letter giving it the appearance of a y and further lines join the preceding d to the letter and then other lines join the eighth to the ninth letter and the ninth letter to the tenth. There is the rough shape of a d after the bn. It seems likely the inscription is unfinished.

**Commentary:**
After the word hb the interpretation of the inscription is difficult. The line after the b is probably part of a chip. One of the forks of the eighth letter has been hammered over and the fourth letter from the end has a tail and looks like a s¹ but it is possible the tail is a ligature joining the letter to the preceding m.

**Commentary:**
The thirteenth letter has short arms and it is possible that it should be read as a r. It would however be a different shape to the other r in the text which is a slight curve. The other l’s in the text have one hook and it is possible that the bottom hook of this letter is simply the result of the careless hammering technique used to carve the inscription. The letter read as a g has a hammered dot on one side of the circle. The divine name S²n’r occurs in KRS 36. There is no clear second ‘ in the name here although possibly a small hammered dot above the preceding n is intended to be one and was added later having been left out. If that was the case the name should be read S²n + ‘ + r.

**Commentary:**
The letters are written carelessly and are lightly scratched on the rock. The prong of the second h is slightly covered by lichen. The prongs of the following ḫ are rather unclear and the next letter is not very straight. The prong of the third h is very shallow and the crossbar of the first t is doubtful as the line has a black patina and might not belong to the inscription. There is a chip out of the rock between the third s¹ and following t. The third t is rather small. The crossbar of the second q is curved and uncertain and the prongs of the second ḫ are roughly formed. The crossbar of the penultimate letter is doubtful. The rock is damaged after the final letter and it is possible there are further letters after it.

{l ŋr w (b)<<<<rṣ f h lt s¹lm}

By ŋr and (he was on the look out) and so O Lt may he be secure

**Commentary:**
The lines of the ŋ are slightly doubtful and there is a line after the h which is presumably extraneous. It is not absolutely certain that the letter read as the initial l is the first letter of the text as it is written on the edge of the rock and it is possible there are letters before it on another face which was not photographed. Equally, it might be a continuation of KRS 2274 although it is difficult to see why the author wrote the l on the edge of the rock and not after the b of hbb.

The first letter of the third name has a slight tail which is probably an incidental stroke made when inscribing. There is part of another letter after the sixth n and then the rock is broken and the inscription continues on another line with a s². There are some scratched lines after the z and it seems likely that the
author made a mistake and then erased it. The sign read as r at the end is rather long and thinner than the other letters of the text and it is possible that it is extraneous.

Commentary:
The author has written a \(b\) and a \(a\) or possibly a \(ṣ\) after the \(q\) of \(qbl\) and then the letters have been lightly scratched over. After the second \(l\) of \(qbl\) there is a straight line with a kink in it which is presumably extraneous.

The last part of the inscription is written on the edge of the rock and was inadequately photographed. By ḫr son of š¹ son of ḫr son of (š¹) son of Mḏny of the lineage of {Ms¹----} and he pastured the sheep at ’nzṭ on spring herbage

Commentary:
The first letter of the fourth name and the lineal name are partially covered by a drawing. A fork of the former is visible and it should probably be read as a ṣ rather than a š or h which are the other possibilities and enough of the second letter of the lineage name remains for it to be read as a š¹. In view of the narrative w r’y h- d’n b- ’nzṭ "and he pastured the sheep at ’nzṭ", it is worth noting that the area where this inscription was found is known today as Khallet Anazah.

1 (q)(b)(j)t (b)((n)) s'(b) (b)((n)) (g)s²(w)

By (Qblt) {son of} {Ṣḥ} {son of} {Ṣḥw}

Commentary:
The letters have been joined together and possibly tampered with and it is very difficult to be sure of much of the reading. The first letter looks like a q although some of the hammering over the loop might have been intended for joining and the letter could have been a d. The next letter is either a b or a s² and the next one looks like a t although it is possible that one hammered dot was intended to join the letter to the previous one. If that is the case the letter could have been a y. The following b and n have been joined together forming a circle. The letter after the ṭ is possibly a b although it is difficult to explain the thick line joining the arms of the letter. It seems most likely that the next part of the inscription should be read downwards and parallel to the first part although it is still difficult to make sense of the patronym and it would also be possible to make a case for reading the letters up the rock except for the last one which would be difficult to explain. The b and n have been joined together with a line which also runs into the next letter which could be a g. The next letter is possibly a s² and the last one possibly a w.

By (Ryd) {son of} (Ntn) son of Mṣ son of ----wq son of Wrđ son of (Ṣḥm)

Commentary:
As with KRS 2376 the letters have been joined together and possibly changed making the reading difficult. The third letter has the appearance of a t but it seems likely that one of the hammered dots was used to join the letter to the second arm of the preceding letter. The first n is joined to one arm of the preceding b and then by a small curve to the second n. There is a line going from the second n through the t and through the next letter which might be a another n. The third b and n have been joined together to form a circle. The following letter is very difficult to interpret. It might have been a s² but there is possibly a y inscribed over it. The following b and n have been joined into a circle. The fork of the third letter from the end is doubtful and it could just be an attempt at joining in which case the letter would appear to be a y.

lʾqr bn nbh w rʾy h- mʾzʾy f ḫrš h- [,] šy w wrd “ʾly h- ʾswʾ bgr b- ‘-. (d)r(n) f h bʾlsʾ mn rwḥ b- mlr

Byʾqr son of Nbh and he pastured the goats and so he watched h- [,] šy and he came to a watering-place [and] raised the cairn [for] ʾbgr in a {place of abode} and so O Bʾlsʾ mn [grant] relief from adversity and uncertainty in rain

Commentary:
There is a small line between the h and š after the word ḫrš. It is possible that it is a n and the words h- nšy should be read. However, its position near the tops of the other letters rather than in the middle as is usual in the Safaitic script suggests that it might be incidental or a false start at a letter. The loop of the d and what is probably a n in the word before the beginning of the prayer have been hammered over.

l ʾbdʾl bn ----nn h- g(z)lt w rʿy h- nʰl

By ʾbdʾl son of ----nn h- g(z)lt and he pastured the valley

**Commentary:**
There are lines joining the initial l to the ‘ and the ‘ to the following b. There is also a line going from the n of bn to the following n. It is unclear whether the name nn should be read or whether the line covers another letter possibly an ‘. The letters of the next word are joined as well making their interpretation rather difficult. The h is joined by a ligature to the back of the following letter which is a circle shape. The next letter might be a z, n, or l. If either of the latter then a bar has been added to the top to join it to the preceding letter although it does not reach to the following one. The l is then joined to a crossbar of the t.

Commentary:
The author has written s¹ rather than b after the first name. The letter read as a r after rʿy h is a line with a hook and is facing in the opposite direction to the following letters. The author probably had to change the direction of the text because there was insufficient space.

ḥ yʿš tḥ ḫbn w ṭsr ʾl sʾbk w sʾlm ṭslṣnt ṭwn w ṭsr nny

O Yl help Ḥbnk and he was on the lookout for [the people of] the lineage of Sʾbk and grant security to [the people of] the lineage of Yl the year of Ywn and he awaited Fate

Commentary:
There is a shadow over some of the letters of the middle of the inscription and they cannot be read from the photograph. The field copy however clearly reads ʾl sʾbk w sʾlm in the middle. The n of the word sʾnt is written slightly above the other letters.

Commentary:
The name ṣḥl has so far been found nowhere else in Safaitic. The letter read as r resembles the b’s of the text and it is possible it should be read as such although it would be difficult to suggest a translation. The letter read as the sixth l is rather shorter than other l’s in the text.

1 {{ʿ}}{{b}}{{t}} bn ʾṣḥ r {{b}}{{n}} zwr

By ʿbt son of ʾṣḥ r son of Zwr

Commentary:
Several letters of the text have been altered. The second letter is most probably an ‘. There is a dot and lines have been added on either side. A tail has been added to the following b forming a k and a circle has been added around the t. There is a short line next to the letter. A middle line has been added to the next b to form a h. A dot has been hammered on to one arm of the r and the following b and n have been joined together to form a shape that resembles m or g. The cross bar of the z has been hammered over. There are two lines to the right of the inscription.

1 kṯ {{b}}{{n}} sʾd bn n {{n}} g(y) {{b}}{{n}} {{ʾ}}{{g}}(r)

By Kṯ (son of) Sʾd (son of) Ng(y) (son of) ʾgr

Commentary:
The inscription is difficult to interpret and presumably the letters have been altered. We present one possible interpretation here. The fourth letter has the appearance of a w but it seems possible that the b and n have been joined together and an additional line has been added. The b has been joined to the n of the next bn. It is possible the next letter was originally a n and a cross-bar has been added later. The b and n of the third bn have joined together to form a g. A line has been added across the fork of the ʾ to form a š and an additional loop has been added to the following g. One arm of the final letter has only a slight curve and the other has been hammered over.

Commentary:
There are scratches and some hammering covering the inscription. The letter after the first ‘ is damaged by hammering. Given the context it seems likely that y should be restored. The letter read as the first s¹ has a vertical stance unlike the s¹ at the end but it has a short tail suggesting that it is most likely a s¹ and not a h. It also seems most probable that the author left out a n between this letter and the following t and that h- sʾnt should be read.

By {Rd} son of Qynt son ofʾsʾym son of Mʿnʾl and he pastured the ṣ{r}{b}

Commentary:
Most of the letters in the genealogy are joined by ligatures. The first name is very doubtful as it is difficult to distinguish between the lines of letters and the lines of the ligatures. The third letter from the end of the text might be ṣ although it is rather carelessly carved and then there appears to be a r and a b which are largely in shadow in the photograph.
